## A NEW SLANT ABOUT AIDS AND DRUGS

As we already know, the AIDS Virus has been produced in laboratories. The purpose was and is; to get rid of population. For the One World Government only one third of the actual population is needed.

The Greys are masters in technology. The cloning of animals is THEIR work. It has been developed in Bases some time ago.

So, they can produce the bodies they think are “perfect” for their purposes. THIS HAS ALREADY BEEN DONE.

Now back to AIDS and DRUGS. In some drugs, as there is no control over its production, the HIV Virus is introduced in them. One does not necessarily need to be an addict, but just trying it for “fun” can result deadly.

People are not dying fast enough. Drugs, AIDS, Terrorism, Wars, Pollution, Burning Forests, Droughts, Earthquakes and Floods are kept as “natural” catastrophes. This is all a LIE. You can see on my Page that even the weather is MANIPULATED and so is our communication system.

Some films are depicting all this. Possibly many think it is Science Fiction, but, sorry, it is NOT.

### TO FIGHT DRUGS IS AN IDIOCY!

**You**, reading this article right now... *ARE YOU ON DRUGS?*

Possibly not. Why? Simply because you have better things to do than ruin your life. You have a purpose and may be a goal that you still wish to achieve.

Now, if **you**, reading this, are taking drugs, you certainly have not found any meaning with your life, have no goals you think you can achieve, and have decided to let drugs lead your life towards delusion.

You see, here we can let people decide how they want to live and die.

As soon as we start to prosper and there are jobs and possibilities of a better life, drugs will start loosing their grip on such a society,

Right now, instead of legalising drugs, over a billion of your tax money is used to “help” Colombia fight drugs.

Also, mostly Americans, in this case, are using their money to buy these drugs.

**Who loses?** The American Citizen.

**Who earns the big money?**

- The Armament Industry. They sell to guerrillas as well as to the drug police.

- The Governments, making many good deals. The American government just uses YOUR money to make profitable businesses with all the weapons, etc.

Naturally the Colombian government must be delighted with their profits too.

To use tax money is easy. It sits there. The ones throwing it away did not have to work hard to earn it!

*Where does the tax money go? In whose pockets?*

This is not only aimed at the US. It could be asked for most countries that are led by corrupt governments.

Possibly you have thought about the "new"-composed trap- in this article:

## **THE COMBINATION OF AIDS & DRUGS**
