MONEY – MONEY – MONEY

EL NIÑO

You know, God forgives always, man forgives sometimes, **but nature NEVER forgives.**

In the press they are trying to tell us that all our current disasters are natural for this time of the year.

Yes, they are a **natural result** of man's greed for money and power.

Big International conferences are held to handle the pollution problem on the planet. The result from these meetings is pretty sad. Practically NO reduction of the waste products sent in our atmosphere.

On top of all this, atomic explosions are still being made.

Obviously some people are afraid to lose money if their production, of mostly unnecessary goods, is stopped, to protect our nature.

So, today **MONEY** is God, with the result all of us can start experiencing in different horrendous degrees.

Already 30 years ago I have read about the danger we were getting into if we did not stop the pollution race. This means that we have been warned. If this **MONEY** race continues, no **MONEY** will be able to buy us back our **healthy nature!**

We will surely get back what we have sent out; D E S T R U C T I O N.

I wonder WHO thinks that this is a good business.
