

GLOBALIZATION

Definition

GLOBAL DESTRUCTION

1/2/01

Please, just take a look at our GLOBE.

You can do it with maps, a globe with everything on it or just imagine that you see the planet turning around, in your mind.

Then, find places where you consider people are living with possibilities of education, work and **improvement**.

Possibly you will find, as I did, very few spots with these possibilities.

Now, do the same, look at the globe and find out what is happening with the climate, pollution, “natural disasters” as you surely know already a lot about.

Both these things are GLOBAL.

Strange that in this situation we have *Global Corporations and Businesses* with VAST profits, not counted in millions, but in billions of dollars each year.

It seems that as they get richer the GLOBE gets poorer for each turn around the sun.

I suppose that this is already “known” to us, only we better **LOOK** at our GLOBE as a whole, and understand what is going on with *our air – our animals – our vegetation*, and *our PEOPLE!*

For me it is really sad to think that my dog lives a better life than most people on Earth.

GLOBALY we are allowing these things to happen. For example, the US is harming a lot even though they are “educated”. And now president Bush is not willing to help in environmental problems.

We have already seen that very FEW are willing to stop the production of thousands of unnecessary things for our **SURVIVAL**.

The **VITAL** things are being ignored. This will, in the long run give a deadly result in not too many years.

Imagine year 3001.....!

How many more millenniums do you think we will be able to live on this?

GLOBALIZED GLOBE

Please DO this exercise of LOOKING around on a map or GLOBE.

Thank you so much for helping in this simple way.
