

PLANETARY CHAOS (RUSSIA AS PART OF IT)

20/9/1999

There are forces wanting us to succumb and ask for some miraculous help, which, if it appears will only lead to a greater human misery.

Huge efforts are constantly being made to provoke wars, using "independence" as an excuse.

At this moment there is an obvious intention to make Russia totally unstable, and get her in a war against the Islamic world.

Who would win with all this? Naturally the One World Government, which come apparently from the US, but is 100 % directed by "our" great organizers and infiltrators, the Greys.

There is a threat for the hegemony of USA, and it is the expanding European Market.

Russia would be a "natural" partner for this United Europe, so this must be prevented. If on top a big War could be made, such as Russia against Islam, the US would be delighted, and would surely help delivering good weapons, which would increase its industrial wealth.

What a pity that the US citizens, mostly very decent people are being used, through their tax money in so much destruction.

Now, to help this Planetary Chaos, please, do not forget diseases such as Aids and others; drugs, terrorism, economic crisis, "natural disasters".

Somewhere in Alaska - Canada, there are places that CAN make weather changes. Unfortunately this knowledge is used to DESTROY, enforcing hurricanes, droughts, tropical storms, etc.

Pollution is increasing, atomic underground tests also help to the general state of chaos.

There are quite some of OUR people that know all this, but for some momentary profit, help to the general destruction.

All this can happen because so few, if any, of us are willing to look at the possible CAUSE of our current situation, and much less willing to do something about it!

For US Citizens: do you know that all these terrible shootings around your country are staged to pass a law against your rights to have a weapon?

As you can see, we are being beautifully manipulated, and this will continue to be possible just as long as we do not LOOK at what is going on, but only listen to the media that is, today, geared in leading us towards HOPELESSNESS!

Possibly I repeat myself, but we can do something to create a saner planet!
