

## THE CRUMBLING U.S.A

22/07/01

In the US we have a Clinton, a charming liar who liked to bomb different nations.

Now we have an am**BUSH** who likes to destroy the whole planet with increased global warming.

Yes, am**BUSH** is doing a lot of good for his country, he is spending billions to defend himself against himself, and at the same time he is attracting all kind of “natural” disasters for his own countrymen.

But, he goes to church and is much more ethical than his predecessor.

I would not be astonished if he will be the one to bring his big nation to crumble.

But, possibly he conceived his defense system against ‘mother nature’, who, with 100% certainty is going to attack and punish him and the nation that in reality did not even elect him!

There is another “strange” personality, a person called Greenspan who has given himself with the agreement of the nation the power to predict the economy.

Have you ever looked at this man? His skin is “grey” and he does look gloomy.

How could such a personality lead anyone to prosperity?

I would just like to mention another rather important pollution coming from the world’s most powerful nation (for how long?): Coca-Cola, junk food and materialism. These are nicely spreading, bringing in its trail unhealthy and unhappy people.

History has shown again and again that when a strong nation takes no responsibility for its strength, it **crumbles**.
