

THE HIDDEN DANGER FOR SECTS

15/03/01

Have you ever thought why so many people give their money and often lives for certain "strange causes"?

Lets look at what a sect or logia is today.

It is often a small group of people perverting some good intentions started by the founder, and using it all for some hidden purpose.

Did you know that ALL sects, loggias, clubs and religious or mental movements are directed by a very hidden group called the "16"?

They have them ALL registered in their computers and are directing them towards globalization and enslavement. I often wondered why people are so "stupid" as to give all they have, and later, when being lucky enough to leave the sect, stand with nothing in their hands

In our modern age with so much new high technology we are starting to get aware of **mind control** through waves.

We can see how, with monitors, high politicians are being seen doing their corrupt money transactions.

We have all heard about the power of the HAARP project and TESLA experiments as well as sublimation messages all over the place.

What we seldom do is look at these things in regard to ourselves.

Many are involved in secret or less secret organizations. These could be Skull & Bones, The Masons, The Illuminati, Scientology, Opus Dei, Rotary, The Bilderbergers, CFR, The Moonies, TM, etc, as well as Islamic and Buddhist Groups. You can even take the Vatican and far less known congregations.

The most important ones have meetings in exclusive, well guarded (against what?) buildings.

I would say that at least 90% of our top citizens are members of some important groups. Here I include politicians, church leaders, intellectuals as well as business people.

It all sounds great while you are together with your brother members. Agreements at TOP level are often made. The purposes vary from group to group.

Agreements are often followed by a strong urge to do certain things, which one would otherwise **not** do. Examples, donate your wealth, change some laws, and do some businesses you never thought engaging upon.

That meetings are being watched through monitors is not agreeable, but what is **much** worse is that during certain meetings subliminal ideas are transmitted through the media

being used. Sometimes the thoughts these hidden leaders want implemented are sent by WAVES in the meeting places.

Naturally, this could also be done on a personal basis, if the person is important enough.

Please, be aware that all this is done in a harmonic and mostly positive environment. The speeches you hear are often directed towards **helping** different aspects of our world.

Many of these, which I call sects, appear as helpers for the society.

How come that after so many helping societies, great speeches, etc, our planet and civilization is sinking at such a tremendous speed?

Obviously something is not as it seems to be.

I have often heard the expression; “Joe is not as he used to be, he changed since he started with that group”.

Changes could be positive, but often are not.

I think that this electronic mind control has also driven many to the point of suicide. But this is only an experiment as what they want is have all the TOP citizens they can get hold of alive, and 100% under their control.

This is a very subtle way of manipulating us all. Most politicians think they are the important people on earth, while they are being manipulated as robots.

At the rate people receive all these waves, they become less able to such a degree that they can die of heart attacks, cancer, etc.

The people that have the urge to control us are FEW.

We can retain our health and sanity only if we wake up and see what is going on in our vicinity as well as on our Planet as a whole.

In our electronic age drugs and hypnosis are not necessary to create exactly the same effects.

You could ‘wake up’ by thinking twice before doing something you are not totally convinced about. Try to go mentally back to your meeting and remember your thoughts **before** the meeting and then **after** the meeting.

I do hope this could help some not to legalize wrongly or throw their money and lives away.

Some day a thorough search will be undertaken in some of these “holy” places, and MANY devices will be found, all hidden from view of the ‘victims’.

When this time comes, the search must be led by electronic experts, not only in computers but also in mental manipulations
