

THE WEAPON CAMPAIGN

Information received 10/4/1998.

For the moment, we are seeing and hearing quite a lot about problems and tragedies in schools, where children are using weapons against each others and teachers.

It seems that the media wants us to believe that the reason for this is that the parents have weapons at home, and some even teach their children to use them.

Well, as far as I know, in the US, people have been allowed to have these weapons since they came to this country of freedom.

How come that **now**, children start to use them in a criminal way?

I suppose that most of us **know** that with the influence of TV, films and cheap literature, the mind is filled with pictures of criminality in different forms.

But, how many of us **know** that all this is part of a very well prepared program to keep us immovable and powerless. You all might have heard of mind contro! Well, this what is happening right now is a good example of its efficiency. It works on children, and makes us think, *whatever* they want us to believe!

Just to illustrate it I would like to mention what I have seen on the beach. My grandson, age two and a half, took a stone, and started "shooting" at the see. None in the family has a weapon!!!!

The **purpose** of this campaign is simply to tighten CONTROL over the population.

Citizens should give up any possibility of self-defense, while;

- The police, sometimes corrupt, are allowed to be armed.
- Criminals of all kinds will **always** have lots of weapons, as we well know.
- The army has the most lethal weapons (what for?) you can dream of, no need to be looking at science fiction!

This is written with the hope that citizens of the world will not permit their freedom to be diminished nor control over them increased!
