ANTARCTIC

DESCRIPTION AND LOCATION OF 2 ALIEN'S BASES

Information received 3/8/96.

Place: Admiralty Mountains - Mt. Levick - On top of the Ice.

Purpose: Weather regulator after orders from a Space Ship.

Human experiments to make bodies tough.

Radio interference, and checking communications of Southern Hemisphere.

Can set in their communications at will.

Interception of any message considered important.

Homo Sapiens cannot communicate outside this planet without colliding with their interference.

Composed of: 25 ET's - 73 Homo Sapiens, for labor and training - 55 Hybrids - 11 Space Ships for weather regulation.

Equipment for the control of Television

Highly sophisticated Atomic Reactor.

Unconventional Atomic weapons for attack on other planets. Earth is their Base for warfare against inhabited planets in this area of the Milky Way.

Place: Surr Rondane Mountains.

Purpose: Fauna Experiments.

Here they work on the surface, make different climates with their Atomic energy heating.

Hybrid animals.

Communication with other Bases that work on similar projects.

DNA of their own animal species. Making new species.

A Purely Scientific Base.

Composed of: 26 ET's - 100 Hybrids - 21 Homo Sapiens - 7,855 animals from earth - 4,350 animals from other species - 20 Space Ships for freezing their transport. They are accustomed to do this even with human bodies.

ARGENTINA

DESCRIPTION AND LOCATION OF 31 ALIEN`S BASES

CORDOBA

Information received on 18/7/1997.

Place: Northern part of the Province - Area Villa de Maria -

Purpose: Investigation of the Results of their experiments in the Andes Area.

What they want is submissive people, not all dead!. Reason for bringing people from the areas where they use their biological and electronic weapons.

Some of the prisoners are radiated directly from a very short distance.

As they get new weapons, they use us on this planet to test them. Their usefulness is also for other planets.

Composed of: 50 ET's as scientists - 75 Hybrids. 31 Homo Sapiens as scientists - 20 Ships, small and fast, to pick up and bring back people - Space for 160 prisoners.

Often the victims are taken back to be able to observe the reactions when their are in their environment. It is rather easy to do in deserted Andes areas. small isolated villages are rather useful.

Andes area is for them the *vital spine* from where to direct the Continent.

Distances mean nothing to them, so, most of the South American Bases are situated here since more or less 500 years ago.

Before they were mostly as watch posts, for Andromeda to know what is going on here.

About 50 years ago they became more aggressive as they do not want this planet to go out of their hands and **control**. This is the only reason they want to take it over.

We, here on earth are not easily subdued. **Some** strong beings are giving them a hard time.

Even in the Andes, they look submissive, but in reality are **not!** This confuses them as they are so accustomed to OBEDIENCE.

Their main purpose, as I have stated many times before, is full control over everyone, as this is *their* way of life.

SAN JUAN

Information received 23/7/1997.

Place: North West from the Province - Area Cerro las Tyrtolas - IN THIS AREA THERE ARE TWO BASES!

People living in this area will know a lot about them.

Purpose: POLITICAL BASE. Their territory to survey is Argentina, Uruguay, Paraguay and Brazil.

The main purpose is the gathering of information.

These countries can never come out of their poverty, although these are in themselves rich areas in many ways. The economy is monitored toward poverty, through clever manipulation and a complete check on the educational systems.

Some few families are allowed to gather wealth, but only up to a certain point. Only the big bank funds may have the economic power, and behind them is the ETs Organisation With their fabulous communication system and strict obedience to their programs, they keep an iron hand on Politics, mostly through Economy. Behind this success there is a great organized work, part of which is in this Base. Information is arriving through different channels, spies are much in use.

In this Base the information is being processed and suggestions for different moves are made. This is done adding to Programs which link to those already in existence. It is STRICTLY FORBIDDEN to start on any new action without due permission. This comes from "central" for each region, but has been approved by the Boss, who possibly got the OK from Andromeda (depending on the importance of the program that should be implemented).

In this Base some high intelligence is gathered.

Composed of: An elite group of ET's of about 10, all trained in Andromeda - ET's as clerks 45 - Hybrids, also of a higher capacity than average 70 - Homo Sapiens NONE! - Ships 7 - They work tightly with the other Base in the area.

They also have their own "Internet" system into which we cannot come, but if we do we are immediately traced and "handled" in different ways such as death through suicide or accident, abduction, made to appear crazy in different ways.

They do not want interference in their communication system, but they monitor ours! A truly unfair game. There is more information about this Base through the next one.

Information received 16/11/1997

Place: Same as the one before, Cerro de las Tyrtolas, South of the prior one. A tunnel connects them. The entrance is kept secret, and is only permitted to special messengers

Purpose: Communication with the outer world.

Get the necessary supplies.

Execution of orders.

A more "primitive" Base.

Looks extremely busy. Many messengers are sent from here.

Here we have an implant, as well as a briefing and a debriefing section.

No one is sent on a mission without getting installed a monitor. This means that there also is a section for the following of the different missions that are in progress.

If somebody fails them, he or she will be neutralized through the monitor. This may explain some strange sudden deaths, which often occur with an explosion in the brain area. In such circumstances the body, naturally dies, and the spirit "obediently" returns back to the Base to be re-programmed for whatever they might need. There can be a loss of bodies, but not of beings!

This is only possible due to their advanced technology in implants. (We recycle paper, they recycle spirits).

In this Base we have an easy going supply section, and a tough spy and intelligence Part.

Basically this is all part of Organization, which, compared to ours is *deadly efficient*.

Composed of: Highly specialized ET's 150 – Ordinary daily organizers as ET's 200 – Hybrids 380 – Homo Sapiens, only as prisoners, space available for 50.

Monitor machines.

Machines to ensure their security.

Ships 16.

The area is surrounded by Electro magnetic waves, which are disconnected when ships have to pass.

Defense against telepathic approach. But, their telepathic knowledge is far less sophisticated than their machines! It is rather similar to witchcraft, which in my opinion only has reduced power.

A very good decode and computer system through which orders are received and passed on to the correct divisions.

The advantage that they have is that on this level **there is no corruption.**

If someone fails them, he is finished!

*Could you imagine **us** working without holes in our different systems?*

Not that they are so clever, only that they are **well** organized!

Place: North of the Maipo Volcano, but less high than the volcano itself. There is water in the area from the river which is passing through the villages of Bustos and San Carlos.

People in the area are aware of their existence because of the lights that are seen, people that are missing and animals they find dead, without blood.

Purpose: Food Supply Base for the Area.

Blood is part of this supply.

Compressed food, where plants are being used, is also produced here.

Having to feed Greys, the food has to be adequate for those kinds of bodies.

Hybrids can eat our kind of food.

As there is scarcity of space in their transport system, they became experts in producing compressed nutritional things, which can be injected in the veins.

Here they keep humans on which they make experiments. For them, *we* are less valuable than the hybrids.

Here there is suffering, with no hope of liberation!

As their values are different from ours, we cannot get sympathy for our sufferings.

Villages do not feel safe, and have no means of defense.

Some of the things are delivered in barns, but only after the ones delivering them have seen the money in their Bank accounts.

The greys are not afraid of being cheated, as their revenge for such an action is always death!

This means that they do have their own Ethic Standards, which also gives them strength.

Composed of: ET's specialists and trainees for making compact food production. These can also be used in other Bases.

Through their information system, anything of use found in one place, after thorough tests (there are enough guinea pigs in us) is immediately transmitted all over the planet. Here again their Organization makes them capable and strong.

Specialists 50 – Trainees, hybrids included 80 – Homo Sapiens as prisoners 70 – Animals for experiments, to produce what they need, all different sorts 185 –

Humans and animals are treated equally!

17 Ships for transport, which in these areas are also used for abduction.

Some machines come from Andromeda, others are put together on this planet in Bases specialized in this kind of work.

For small airplanes to fly in this area is rather dangerous because they can be shot down with Electro magnetic rays.

Place: Area Cerro Aconcagua on the Argentinean side. TWIN BASES.

Purpose: Political Base.

This one is more oriented on Argentina. Buenos Aires is not "far".

Interested in the Economic Union of South America, and its alliance with USA.

Same as usual, they train and send infiltrators into the government.

They are interested in being in good standings with the ones that are governing the nation as well as each province.

When they influence with their *help*, they make everybody dependent of the International Money Found, which in reality is totally under *their control!*

All this is so simple, too simple to see and believe!

Obviously, the languages most in use in this Base are Spanish, Portuguese and English

Each Political Base has a total grasp of the situations in their assigned areas.

When all this information arrives to Central Base on Mars, their view is astonishingly clear!

Composed of: ET's as organizers 85 – Other ET's on computers 50 – Hybrids 320 – Homo Sapiens in political training, but when sent out are being monitored, about 20, and as instructors 75 –

Ships small and fast 20 -

Apparently, there is no duress in this place, it has a very peaceful appearance. But their manipulations in politics are provoking *miser*y for ordinary people in which they have **no interest!**

They are in possession of some spying devices which we cannot see, which record conversations and take pictures. This information is transmitted directly to the relevant Base.

On our "secret" meetings they can get their first hand information at will.

CRUZ DEL EJE

Information received 21/7/1997.

Place: Area Cruz del Eje.

Purpose: Serum Production.

They need some protection themselves as they are in contact with our civilization and live mostly under earth, so they make vaccines. They want also to keep their bodies fit.

Reactions are tested on humans and animals. Some extracts are used out of plants.

There is an interchange of information about the workability of a product before it is sent into a real production. At the same time tests are made on our own people in "how to calm them down". (It is much easier to kill). For this Andes villages are great.

If something they can use is found, they see that our medicines also get it. These things are often sold as miracle medicine! It is made known through TV, etc. The help is mostly less pain and feel less. A gradual descent into unawareness.

Their work is very methodical, no hurry at all. Feel certain as no one ever detects them. The equipment is very sophisticated.

Composed of: ET's 30 - Hybrids 70 - Homo Sapiens as scientists 10 - Animals, also for their need of blood 1,150 - There is great suffering as no one cares about their fate.

In medicines they put **live cells** which are supposed to do specific things, mostly destructive to bodies. Naturally that for themselves, constructive **live cells** are produced. They have advanced techniques and long practice. Ships 3 - Capacity for 50 human prisoners.

RIO NEGRO

Information received 14/12/1997.

Place: Rio Negro, border to Neuquén, near latitude grade 40. Nearest village on the map; Piedra de Aguila.

Purpose: Tourism

They do not want to have people nosing around their working areas.

They make information about the "free" areas available, which are delivered to the tourist offices.

Generally they do not abduct tourists in order not to draw attention on themselves.

Composed of: few people, no ET's, only Homo Sapiens, all monitored. This place is **not** hidden, but works to help their Organizations.

About 30 people work here with standard terrestrial equipment of good quality.

TWIN BASES

Place: South West of RHO Negro, near the border to Chubut. They use the River Chubut. Area around villages El Bolsyn and Norquincy.

Purpose: South America's Organization – Economy.

They also decide of how much space should stay "virgin" for later use. This is part of the planning for the future.

They know how to draw our attention to the areas they want us to be looked at!

Here the work is done with thorough information and exact topographic maps, as well as knowledge about the population.

No interest in uneducated people.

One could say that this kind of Bases is sort of "theoretical".

With ships they can easily scan the areas, and informants they have plenty of.

Composed of: For both Bases, 125 ET's – 86 trained Hybrids – menial workers 35

Ships 6 –

Naturally, there is an extensive communication system. Maps, etc are seen through computers.

NEUQUEN

Place: Area of village Loncopuñ – North of the Province – Water used from the River Agrio –

Purpose: Genetic Experiments.

People from Chile are also being used. They produce hybrids with different races, here people from South America are being used.

As usual, there is no sympathy for their experimental offers.

Tampering with D.N.A, the genes of bodies.

Research and experiments are their passion. They work with us as they are used to work with machines, where they did reach a sophisticated stage, at least, compared to ours.

Composed of: ET's 88 – Hybrids at work 180 – 28 Homo Sapiens as scientists, some are here as volunteers – Prisoners, all young people. Space for 300 –

20 ships necessary for human transport as well as for supplies -

Here intelligence tests are in use. Similar to Hitler, they want the *best*. Bright children in school could be their target.

As there are relatively few Bases that produce Hybrids, after a certain age they are "exported" to places where they can get the necessary training.

Some are born by natural birth, but most are born in laboratories as this is a very well known technology for the Greys.

They have trained people for stealing children. Most of them are our own people who are doing the job just for an easy profit.

For money, we on this planet are helping them in many ways, but, **Without our help they would NOT be able to survive!**

Our ethics is so much out, that we are willing to ruin our own people with drugs, only to earn some cash!!!

We basically live in the society we ourselves create, or allow to be created.

Information received 7/12/1997.

Place: Area Parque Nacional Lanin. Junhn de los Andes is the nearest town. Here

People could give information about it.

Purpose: EXPERIMENTAL BASE

To find what kind of weapons to give to the terrestrials.

The ones that receive their "help" will win.

Great care is taken **not** to give us anything really sophisticated!

Weapon factories get some of their data. Even though they want us destroyed, this should only be partially. People are also trained to use them. Some will become future guerrilla soldiers.

Composed of: ET's 125 – Hybrids 180 – Homo Sapiens 155 – Ships 4 –

Even though everyone that leaves any Base will have a monitor attached, in this base we find some that come as volunteers. It has a certain **status** to be a terrorist or a guerrilla leader.

Quite a weapon arsenal meant for our own destruction.

Orders are given in how to train each group, depending on the country they will be operating. As usual, nothing is left to chance.

Training done in rough mountain areas. The ones that do not pass the test are shot, and the spirit is trapped and used for their hidden manipulations.

Once a person falls into their hands, he stays under their control, even if he thinks that he is a free being now!

There is schooling in strategy. All trainees are intelligent people.

Women are also used.

CHUBUT

Information received 15/12/1997.

Place: Near town Corcovado, there is a river there. Placed in the Western part of the Province, from the middle a bit North.

Purpose: Planetary Watch Post.

Naturally main interest is in the Southern Hemisphere.

There is a reason that no other Aliens visit us officially. *If they approach our planet, they will be disintegrated!*

The Greys have an iron hand over us, "protecting" us from any other invaders!

Composed of: ET's 50 – Hybrids 35 –

ET's are being pilots and clerks dealing with the sending and receiving of information.

A very quiet Base.

All sheer routine work.

7 Ships **very** strongly armed with weapons we have never seen other than in "Science Fiction" movies.

Place: West Side of the Province, Northern part. Area Lago Futalauquen.

Purpose: Machine Base.

Repair place for Ships.

Storage for spare parts, mainly for South America.

Construction of new ships. For this, some metals, fuel and electronic devices must be brought in from other planets whose technology is more advanced than ours.

Here captured Homo Sapiens is used as slave labor.

Dead bodies are just left out in the snow.

This is a very busy Base, which is working day and night.

Technicians as well as spare parts are taken to the places where they are needed.

A very well organized Machine Base.

Composed of: ET's 125 with high technical qualifications.

The Greys have possibly the most advanced technical civilization in this part of the Physical Universe.

Hybrids 124 – Homo Sapiens as slaves 286 –

The number of ships varies continually.

Tunnels filled with all kind of spare parts, under perfectly computerized control.

Message received 18/12/1997.

Place: Area RHO Pico. Latitude about 44 S grades. North of Arroyo Apeleg.

Purpose: Management of Chile.

Very near to the most populated areas, but at the same time far away enough to be able to work undetected.

In few words they have a **total** knowledge of the country, which helps them in their manipulation of it. The sad thing is that their purpose is detrimental to our survival.

*All would be much clearer if we knew that we, as well as our governments are being manipulated, and that **THIS IS THE REASON FOR OUR RAPID PLANETARY DECAY.***

Here abducted people deliver information under the effect of drugs. Many do not have any conscious recall of this event, and at the same time some ideas are being implanted in their subconscious mind!

Composed of: ET's 88 – Hybrids 118 – Homo Sapiens, some in training 35 – Other Homo Sapiens as prisoners, these come and go.

The usual sophisticated computer equipment.

12 Ships, small and fast.

Place: South of the Province of Chubut . Area RHO Mayo.

Purpose: Preparation of Implanting Programs for the South American area.

(Was very hard to approach)

Composed of: 58 Andromeda Specialists in Implant handling – Also some in training, about 15. This way they do not need so much transportation from the other Galaxy!

Hybrids as clerks and menial workers, around 100 –

Experimental areas with capacity for 70 victims. These "guinea pigs" are implanted, sent to other locations and tested for reactions, or in the same Base, just moved to another area.

They cannot afford to "export" an unworkable product!

Boxes of trapped spirits are brought here to be prepared and used as ammunition against us.

Different areas need different programs. Most are being prepared here, and sent to the places where they will be used.

Their perfect inter-Base communication system makes this smooth co-ordination possible!

We could call this a Psychiatric Base.

Most of the prisoners are young people from South America.

Their Technology is done in a very **exact** way, with a great amount of preparation behind it.

Ships are used from other Bases, as a quiet space is needed for this work.

SANTA CRUZ

Place: Area Cerro OrHiggins, about latitude 49 degrees...A very beautiful area!

Purpose: Landing place for bigger ships.

Materials arrive here to supply South America of things proceeding from outer space.

Composed of: 28 ET's trained in ship repairs and the assembly of different kind of machine. They are very dependent on these supplies, as what comes in cannot be produced with our materials.

Plain Et as workers 70 – Hybrids 250 –

9 Ships for re-transporting the goods. These are cargo ships.

Place: South of Cerro OrHiggins, area between the town of Tres Lagos and Monte Fitzroy. Latitude about 49.5 degrees.

Purpose: Military Base.

Storage for weapons and ammunitions of different kinds.

Some to be given to South American guerrilla and terrorist groups.

These groups are of vital importance to their plans to create a worldwide Police State.

Without them, we would not be willing to pay for a Military Police Force. The militaries sneak in, as the Police are not efficient enough. In all this, corruption is playing an important part.

A training place to test and teach how to use these weapons.

Some of them are being used from their ships, or from our airplanes, as was the case in the Persian Gulf War.

Composed of: 80 ET's as instructors in tactic and strategy. They are much better at this than we are – Hybrids 135 – Homo Sapiens as "volunteers" 175 –

Here, the prepared implants are applied *before* anyone can leave.

The trainees will "forget" all about this location. When back on post, it will seem as a kind of a dream.

Could be of interest to interview such guerrilla or terrorist leaders!

15 Ships of different kinds, depending on the cargo that needs to be moved.

Homo Sapiens as prisoners in order to get the exact knowledge of the situations in the regions of their interest. They want to know who will be joining their cause.

When there is no more use for the prisoners, they get killed. Bodies are used, depending on what the needs are at that time. The spirit is trapped and sent to be implanted.

They do not want any of them to "go back home!", not even as spirits!

The amount of these prisoners varies.

Some have the hope that this Base Network one day will be disclosed and abolished!

Place: Area Cerro Mesa, West of Cerro OrHiggins –

Probably inhabitants from the town Gobernador Gregores will be able to tell about sightings to anyone that makes some inquiries.

This whole area has plenty of water.

Purpose: Santa Cruz seems to be a Military Triangle.

Weather Control, as nothing should be seen from any place.

If not camouflaged, their movements are pretty visible.

This Base is kind of a "watch dog" for the other's security.

Composed of: 25 ET's, trained to spot anything unusual in the area, and shoot it down! Here **their weapons** are being used.

168 Hybrids, some well trained, mostly in shooting, while others do menial work.

The weather they regulate with machines, specially when big Ships arrive from outer space. What they do is ensure deep FOG and SNOW.

Clouds can be produced any time for "daily" use.

15 Ships

This area is the one that has least interference for their work in whole South America! Therefore this Province is so much in use

Place: Latitude about 47.8 degrees. Area in between Lago Moreno and Lago Nansen, North of Cerro OrHiggins.

Purpose: Intelligence Base.

Training spies. Naturally, mostly for South America.

Orders are received about the areas that need to be surveyed. Here they get trained and instructions are given.

Implant devices are easily available.

Composed of: 85 ET's as High Intelligence Officers –

They must be able to code and decode messages as well as train people and implant when necessary. –

25 Hybrids as pilots, not to risk the loss of the trained officers – 80 Hybrids for other tasks –

Capacity for 150 Homo Sapiens –

Naturally here is all the data pertinent to what they have to execute.

A very efficient Base. Feels quiet and busy.

15 Ships, all fast and small, but with long range to connect to their planetary spying system.

For money, terrestrials work for this spy system, giving **any** information they want.

We are selling ourselves out!

Computer systems are VERY helpful, for this they use "our people" as computer spies. Big Corporations, Tax Departments as well as Governmental Institutions and Police Departments are a good source of information for the Greys.

This is also the reason they have "helped" us develop our Computer Age!

Their television networks allows them to oversee many situations. This is a great help for a better training of their spies and terrorists, as they much easier can become "part of the scene".

LA RIOJA

Information received 14/1/1998.

Place: North West of the Province. Area Cerro Bonete Chico. Water from Laguna Brava is used.

In the village of Jagъй, people will have some knowledge about "lights" in the sky.

Purpose: Agricultural Base.

Development of seeds as well as of animal embryos to learn what could be used in South America.

They have their own ideas of how this planet should look like once they have full control over us.

Things get started in their efficient laboratories under scientific conditions. As soon as something seems of real interest, it is tested in different regions.

For this work Homo Sapiens is needed. This people are presented as "wise men", etc, to get it tested with the least possible suspicion or interference.

Naturally, our seeds and animal sperm is mixed with seeds and cells from other planets, possibly also from other galaxies.

Fascinating experiments, only a pity they are all so hidden.

This kind of work is only done on planets they feel they have to take over in order to maintain **control over a specific Sector**. (Our galaxy has 24 sectors + Sector 0, where the administration of the galaxy is situated, and which is in the "middle" of all the Sectors. This way we do have 25 sectors!)

Composed of: ET's 150 – Hybrids 80, for menial work – Homo Sapiens 250 – Many are here as volunteers. They return into our society with some "new" genetic discoveries!

As usual these people have been treated not to remember their experiences nor the location of the Bases, and at the same time are monitored, which means that if something goes wrong, instant death will occur. This will happen with different symptoms, which all will seem natural or plausible.

Machines which would be a real delight for any laboratory on this planet.

32 Ships -

Live animals and plants are being used. This is a "double edged" system; to better conditions, or to kill through "natural sources".

Very similar to the Nazirs ideas, they wish to get rid of *inefficient* people. No need to feed them or worry about how they are going to live.

*Their educational system is **OBEY**, enforced through implants.*

Information received 17/1/1998.

Place: Sierra de Famatina. About latitude 29 degrees.

Villages of Chilecito and Famatina will have some knowledge about the existence of this Base.

Purpose: Surveillance of Chile, Argentina, Uruguay, Paraguay, and southern Brazil.

These are vast territories, much of it scarcely populated. They have an urge to keep an eye on the different parts of the planet in order to avoid disagreeable surprises such as unexpected attacks.

Surveillance is done by air, as well as by gathering data on the ground.

It seems as if they would have too much data, and would get confused by them, but their data processor helps to sort out only what they are interested in.

All regional data goes into a Central Computer; this helps to always be in possession of accurate data to analyze the planet's situation.

*Having this they **know** exactly where to set in whatever they want.*

This way there is always something tragic going on somewhere on the planet.

*It seems unrelated, but there is a thread of **well planned** confusion in all what is going on for the moment.*

Composed of: 85 ET's as clerks and pilots – 100 Hybrids – 20 Homo Sapiens for strategic purposes, some as volunteers, others as prisoners.

Here they only gather information and make exact maps. Programs and handling are made elsewhere.

18 Ships with strong lenses. They **can see us clearly**, but we do not see them, specially not during the day!

"God is watching you" could very well be them doing this surveillance job.

Place: Eastern part of Sierra de la Punilla, also about latitude 29 degrees.

People in the towns of Villa Union and Palacios will have seen a lot of movement, as there are 2 Bases in the region. One East, and another West of Sierra de la Punilla.

The one on the East uses the water of Rho Bermejo.

Purpose: Genetic Base.

Women are used, inseminations are made, and some kind of monsters is also being born.

Cloning is a usual thing here.

Please remember that for them there is no difference between research made with humans or animals!

The most I can say about this is that here huge suffering is daily routine.

The situation is hopeless, as there is no help available.

The worst part of it is that some of our own scientists are part of the research team!

The purpose of the Greys is to create a more resistant race.

They consider their own bodies too vulnerable.

Basically what they need are slaves or robot workers and some leaders. All what is in between is of no use to them.

Composed of: 18 ET's as genetic specialists – 25 ET's as doctors and scientists – 92 Hybrids trained to take care of the management of the victims – 16 Homo Sapiens as scientists.

Space for 85 victims, grown-ups.

"Children" can be: monsters, bright ones, of different colors, some are even grey, white ones, etc.

This really looks like "Science Fiction", but is in reality **human tragedy**, with no family life.

Here we have the killing of the unusable, and hard training for the usable, which ends in LIVE ROBOTS!

No ships here.

Place: West from Sierra de la Punilla. The Rho Blanco is being used. On the border of the Province of San Juan. No villages to be seen on the map.

Purpose: Supply for Bases in the Area.

Ships can freely fly in and out without being seen.

They receive raw materials from different places, as needed. Here they have the facilities to process them for their special uses.

Some materials come from other planets and are mixed with what we can supply here on earth.

It looks like a food factory!

Composed of: 15 ET's, specialists in food production, from Andromeda – 26 ET's as technicians in laboratories. (Products are being tested for quality. They must meet their standards!) –

75 Hybrids, well trained as workers –

65 Homo Sapiens as "scientists". They have this status, but in reality are just being used as workers.

Some are being sent outside to get the goods they want. They **have to** use terrestrials for business and trade.

There are plenty of machines for food processing, laboratory equipment, storage space for the processed products, and for raw materials.

A VERY busy place.

8 Sips of considerable size – 15 smaller ones.

Here ships from outer space can land without being disturbed.

MENDOZA

Place: Area of Cerro Aconcagua, on the side of Chile. They use the water of Rho de los Patos.

THIS BASE WORKS FOR ARGENTINA AND CHILE

Purpose: Watching on Chile's most populated area.

Most interest they have in the government through which they have a hold on the country.

There is a Base for each country, and as communication is not withheld it is rather easy for them to influence the Present and Future of the different places.

*Have you ever noticed the meager results of **TOP MEETINGS?***

*The **REAL** enemy is for them **INVISIBLE**, so they use their time and strength in fighting criminality, terrorism and drugs, but never spot the cause of these!!!*

This could be the "conspiracy" so many are always looking for.

The purpose is that Chile, and whole South America should be working with the U.S. This way there is an easier control system.

Indirectly they are helping in the training politicians receive. In their hands there is much of the preparation of different studies which these future leaders are doing.

Abducted people are brought here.

There is a specialization of the dissemination of **IDEAS**.

Unfortunately all this is unknown to the guys that start working with them, because even if all sounds great, if not correctly analyzed, these will end up in destruction for the countries that put them in use.

Composed of: ET's 200 – Hybrids 75 – Homo Sapiens 75. They have been abducted, and live here as prisoners. These are being used to produce books and to analyze different situations.

Ships 15 – Some of them small and fast for abductions.

Printing machines. People are working on checking the books that are brought to the Base.

Anyone writing some things they consider dangerous is then on their list, is traced and handled according to the danger it brings to their Organization.

The Bank and Tax system gives them plenty of possibilities to trace the people or countries that might become too strong for their liking.

In order to keep us all down we have continuous crisis and devaluation.

Information received 20/11/97

Place: Area Cerro Sosneado. West from San Rafael. The water from the River Rafael is used.

THIS BASE WORKS FOR CHILE AND ARGENTINA

Purpose: Guarding the navigation on Atlantic and Pacific Oceans.

Satellite control.

As they are aware of the possibility of "invaders", someone has to check the area from the air.

Our *advanced* satellite communications can **easily** be controlled and monitored by them. The more we get accustomed to machines, the better they can manipulate us.

Cargoes transporting drugs receive their help. This help to the drug cartels is not easy to spot. They use their technical advantage to their purpose, which mainly is to ruin the current civilization, take it over and run it as a "New World Order" where they are in control of everything.

This Base works under the motto *Sovereignty over Air and Water*.

Composed of: ET's 58 – Hybrids 115 –

Equipment which we have never seen. They can fly over a satellite, stand still in the air and work with whatever they want to do on it.

This is the reason why no Homo Sapiens are placed in this Base.

5 special surveillance ships, small, very fast, equipped with lenses that can see **much further** than the ones we have in our observatories. Compared with them, we are "blind". They intend to keep us this way.

All necessary equipment, as well as spare parts, food supplies, etc, come from other Bases with "ordinary" transport ships.

Information received on 26/2/1998.

CATAMARCA

Place: South West of the Province, also South West of the town of Fambaló, between Fambaló and Santa Rosa. There are some rivers in the area.

It seems of importance to have water. This can be from lakes, rivers or underground sources.

Purpose: Repair of ships and all different machines used in Bases. Not the very refined ones, such as the ones used for gathering information nor laboratory equipment nor implanting machines.

A very busy Base. Seems that there is a lot of things which break down. Often due to inexperienced handling (slaves do not work too efficiently).

Spare parts is a huge problem.

The nearest storage place is Mars. As one can imagine it is rather hard to predict everything.

Pieces can be produced, but the EXACT raw materials are needed, of which not all are available on this Planet.

Here we find prisoners used as cheap labour, drugged to be in a submissive state.

Composed of: 35 "imported" ET's, from Andromeda. These are very professional – 188 ET's as technicians – 170 Hybrids – 38 Homo Sapiens, also used as technicians.

It is **essential** that these terrestrials know what they have to procure from our Planet.

Naturally, there is intercommunication with other similar Bases all around the Planet.

Their power lies in their smooth Organisation. Here we find robots, but **no** intentional lies nor corruption.

Space for 150 prisoners which are often also used as guinea pigs to test the efficiency of certain machines such as room ventilators, energy sources, etc.

What a pity that we are so much at war with each other and so terribly corrupt in all layers of our "civilisation". We seem to be reaching a kind of barbarian state with only a THIN patina of culture and education.

Ships 21 of different sizes.

A machine for producing clouds, to protect them from unwanted space explorers.

There is a heavy traffic in the area due to the necessity of food supplies as well as of the needed artefacts for making the repairs, and the incoming of damaged pieces, as well as the outgoing of the repaired ones.

People living in these practically deserted areas must be seeing all kinds of movements, specially at night.

A campaign has been made to warn them not to talk about what is happening. They are threatened by the extinction of the whole town. This can be made as a "natural catastrophe".

Place: North West of Hualfñn. In the middle of the Province, a bit South, latitude 27.5e. Again there are some rivers in the area, one of them is called Belñn.

Purpose: Genetic and Pharmaceutical Base.

Genetic experiments are appearing quite often in the pictures we are seeing in our movies. SCIENCE FICTION IS **MUCH LESS** FICTION THAN WE THINK.

Whatever you see in the movies, **REALITY IS WORSE.**

Technical advances in our medicine stem very often from these Bases.

The main purpose is to create a race that can work for them. Their way of life is much more "uniform".

Please, understand that here there can be made **any kind** of experiments. Death and sufferings are of no importance whatsoever.

LOTS of their products are getting into our Pharmaceutical Industry.

The purpose of their products is to make people weak and conforming with their fate.

The way it works, is that it apparently helps, and often creates addiction. Doctors will never see that the cause of de patient's deterioration is the MEDICINE he has prescribed. Often the great "miracle" that occurs is PAIN IS GONE!. But, what really happened is that the body has been drugged into numbness!

Composed of: Here we find 110 top-notch pharmaceutical specialists from Andromeda. Food is also been experimented with.

53 Homo Sapiens as Scientists – 180 Hybrids –

Domestic animals are also being used.

Space for 200 Human *victims*, mostly young people, age between 15 to 27 years.

Children, of their own "production" are used here.

6 Ships, some very fast ones, for abductions.

In the area people are disappearing, often with the help of our own. If we can see a "profit", we are many times so corrupt, that we will do anything to "help" our enemies.

For a scientist this place must be a "El Dorado" as he has at his disposal whatever he wishes, and failures are not being held against him. Their equipment seems to us as coming "from another world".

Right now we are not only been influenced by communication media, but also through some of our medicines and food.

*Sounds terrifying, but all these things have **very little influence if you KNOW the POWER in YOURSELF** as a spiritual being.*

If you consider yourself just being a body, the chances are quite big that you will be the effect of these manipulations.

Information received on 27/2/1998.

Place: Eastern part of Catamarca, on the border to Tucumán. Area village Santa María. There is a river in the area, possibly called Pasaje.

Purpose: Abduction Centre.

Kind of modern times slave centre.

There is a huge territory with the name of Chaco. This is also part of Paraguay, and going further east we get into Brazil.

After some investigation, they decide from where they will pick up the people. Here there is no problem with governments or the press, as the inhabitants live primitively by themselves.

Through their usual planning, orders are given for what is needed and wanted. Always **young** people, but sometimes children or babies are required.

This is general abduction, to differentiate from political, scientific or specific cultural ones.

Poor people are very much exposed to this as no one cares what is happening to them.

In this place, things are getting "sorted out" through tests and what is plainly visible.

More intelligent prisoners are used for more qualified jobs, less bright ones as guinea pigs for all the different experiments that are in progress, others for plain hard labour, as slaves.

As the casualties are **huge**, fresh supplies are often needed.

Abuses done here, before they are sent to their destinations, are hard to imagine.

Sadism and cruelties are unpunished. People are treated worse than animals. No one cares if they die before delivery as they simply pick up some new ones.

*When a known millionaire is kidnapped, the whole world is horrified. Here thousands disappear with the "approval" of governments, as they surely must have heard about all the losses in so **many families!***

Yes, we live in a far more cruel world than we have information about.

Poor people have no rights and no protection. Most of it is due to NO responsibility of our own governments. If we had any dignity ourselves, the greys would have a much harder time to manipulate us.

Our own people are helping with these abductions!

Composed of: 180 ET's, rough ones, with low intelligence – Hybrids none, instead our people are being used. The situation is very similar to the Nazi concentration camps.

Space for about 300 persons. They never stay much longer than a fortnight.

A miserable and dirty space.

The place is surrounded by electrical beams.

Ships 14.

Place: About latitude of 27°. There is about the same distance, North to Paso de S. Francisco (a road to Chile) and South to Fambaló. Two rivers come together in the area, these become River Salado.

Purpose: Coordination Centre.

Here information is compiled and sent to the Base on the Moon, from where it is sent further to Mars.

Intelligence is at work. From the huge amount of data, the essentials have to be sorted out. Naturally most data stem from South America. There are 2 such bases in the South American continent.

Composed of: "Out of this world" computer and communication systems in which there is no interference, while ours are controlled from many different sources.

No Homo Sapiens here.

130 very experienced ET'S. New ones come in once in a while to train or replace the others.

Hybrids, bright ones, about 100.

No ships of their own.

There is an Energy screen around the place, which makes it "invisible" and unapproachable. (Even mentally it was hard to get through).

Whatever comes near this place will inexplicably crash. Naturally the Energy screen is switched off as soon as their own ships approach the place.

Information received 12/4/1998.

A DIFFERENT BASE!

Place: Area Sierra de Calalasta, North of the Province of Catamarca. About Latitude 26 degrees. Nearest town, Antofagasta de la Sierra. There are 2 rivers in the area. It is the salt region for Chile and Argentina.

Purpose: Surveillance and Control of the Planet.

Controlling their own ships, that is, checking the South American movements. There are plans and schedules that must be followed, and the job of this Base is to ensure orders are executed and that **no interference** comes in.

They want our skies only for themselves!

We can fly around as much as we like, as long as we do not leave. Our outer space ventures are 100% monitored by the Grey's. Also, wherever we go, we are **only** allowed to see what **they allow us to see!**

Difficulties to get to Mars are due to this, also we saw exactly what they wished we should see.

The way to detect any interference or unexpected movements is through **their** Satellites system, which "for us" have an unbelievable power of detection through ultra sound waves. As soon as something is detected, they can quickly find out what kind of object it is, and handle accordingly.

Possibly this is **the reason** that for the time being, we only have the Grey's flying around.

Any other ships that approach our planet get pulverized already in outer space!

There **are aliens who wish to help** our "prisoner" planet, but the prison is well guarded!

Naturally, there are 5 other Bases of this kind, and they work in 100% co-ordination. It functions as a Satellite Program.

There are no ships in this Base because their movements would interrupt the Wave connections.

Supplies are provided from a nearby landing place that can be reached by underground connection.

The machines in use are rather small and hard to detect.

They have created, around our planet a deadly web, invisible to the eye, but detectable by sophisticated detectors.

They say that every one that wishes to come is welcome. Quite some ships have fallen into this trap, so warnings are given **not to approach this area!**

Composed of: Only Et's and Hybrids.

80 Et's with high technical skills and 110 able Hybrids to help out.

Intercom machines with the other 5 Bases are constantly on.

The Satellites can be moved from these Bases.

In constant connection with some specific Military Bases on Earth, as well as outside of it.

DISTANCE IS NO PROBLEM FOR THEM!

A machine that permeates their surroundings, also working with waves, to know exactly what kind of ships is approaching the area. If anything unwanted comes too near, ray cannons will be used.

A very important Base!

SALTA

Place: Area of Cafayate town, about Latitude 26. There is a river in the area named Calchaqui or Pasaje.

Purpose: Genetic Base.

To produce labor and find out what kind of people, from this vast area, (the whole Chaco, and further East) has the best endurance for work in different climatic surroundings.

Tests are made to ensure that they are "worth" sending to the different needed places.

Some of the abducted people are even taken outside of the planet.

Composed of: 30 Et's as organizers - 150 Hybrids, not too bright ones - 40 Homo Sapiens to be sent out for the collection - Place for 300 prisoners.

5 Ships

Machines for measuring body resistance.

No one gets back home, what cannot be used as labor, is used for many other purposes, as blood is much in need, organs and guinea pigs for lab tests.

Information received 12/4/1998.

Place: Northern tip of the province, border to Jujuy Province. There is a lake nearby, Laguna de Guayatayoc, and a river that makes part of the border between Salta and Jujuy. Near the Tropic of Capricorn.

Purpose: Chile as its prime Target.

Control over the country.

Interest in **mining areas**. For this, people are needed that are under their organization.

Kind of Geographical Base where mining areas are under research and catalogues are made over what is available in the Southern Andes.

In whole of South America, we will find most of the Bases located in the "Cordillera de los Andes". Here we also find the very much-needed Electro Magnetic areas.

Homo Sapiens are trained in Geology, and in how to find different minerals. They find also gold and silver, but they search for other things with special detectors that can permeate 6.000 meters under the surface.

The extraction is done by another Base, under this Base's supervision.

Sometime "Military Zone" is written in the places where they are working with their special machines. We permit them to do it (under pressure), but without our help they would **not make it**. A pity that we, terrestrials are so **frightened and corrupt!**

Composed of: 50 Et's, specialists in this field - 175 Hybrids - 70 Homo Sapiens, some of them have their own interests in finding these things, but they do not know how tightly they are monitored.

11 Ships -

Apparently a very friendly base, pity that the consequences are not so friendly.

Perfect maps of the Andes.

Antofagasta is an important port, and there is a check made to ensure that "strange people" do not go nosing around the "Military Zones".

Some metals are taken out of our planet, without our knowledge or consent. This is an exploited planet!

There are several of these kinds of Bases around the world, mostly in mountain areas rich in minerals.

We are looking at an excellent organization. We could learn **this** from them. They work as a whole, **not** in competition we each other!

AUSTRALIA

DESCRIPTION AND LOCATION OF 6 ALIEN's BASES

WESTERN AUSTRALIA

Information received on 13/8/96.

Place: Mt. Allott near Lake Gillen GIBSON DESERT.

Purpose: Direct Line to the Russian Base which is not far from Bering Strait. They coordinate their patrolling. This Base has the responsibility for the Southern part of Asia. Their control of the population is based on keeping them in ignorance.

Main leaders are all in their computers.

Training leaders to take over different areas.

Experiments with Asian and Australian races.

Many slaves in the Base.

Kill sheep to provide the blood they need for their feeding.

Use crystals for provoking typhoons.

Very aware if anyone should come to help people out of their present ignorance. If someone should attempt it they start a discredit campaign on the people or person involved. Program to produce rain in the desert.

They want Australia to be isolated in order to be able to use it as "their land", or Central Base.

People they "train" believe they have been on another planet when coming out of this place.

This is a **POLITICAL BASE**.

They have models of the different areas they should handle, and with them they follow the population flow.

Their purpose is never to have a united planet, so they help producing local quarrels and antagonism between East and West.

Study center for Eastern Cultures.

Ready to send infiltration as needed.

Much of Asian Politics is run by them.

Big and efficient training center. Can train up to 1500 people at the same time. They "recruit" young people, also for spreading positive propaganda about them.

Studies are done using films of actual events.

Main training in how to get one party against the other.

Also study the main figures in politics in order to be able to send thoughts on them, or a prepared being to take him over.

CONTROL OVER ASIA IN A HIDDEN WAY.

One of their priorities are languages. So they kidnap different teachers.

Infiltrators must learn to be exactly as the people they infiltrate.

To be able to take over the planet it is a MUST to have control over Asia.

Composed of: ET's 363 - Homo Sapiens of different races 3,750 - Ships for transport 16 -

QUEENSLAND

Information received on 19/8/96.

Place: Great Artesian Basin - Hoods Range - Eastern Australia.

Purpose: Check on Australia and the surrounding islands.

Genetic Experiments with aborigines and others.

Supplies food for all four Australian Bases.

Control of the communication systems. Their responsibility is over Australia, its politics and economy.

Composed of: ET's 50. They do not want anyone to look into this area. An electrical zone. There is some deadly electromagnetism in order that no one should pass their limits.

Hybrids, mixture with aborigines, 120 -

Homo Sapiens, kidnapped Australians, come and go. When they "go" they are their subjects.

Can "treat" 200 people at a time.

Homo Sapiens as staff, scientists and doctors are Asian and Australian 150 -

Ships for people transport 5 - Ships for population control with rays, etc. 25 -

Information received on 25/8/96.

Place: West from great Dividing Range - South Queensland, near the border to New South Wales - Murra-Mura, nearest town.

Purpose: INDUSTRIAL BASE

Generators to supply the electromagnetic power for all 4 Australian Bases.

They repair any machines out of order this can be ships, computers, weapons, etc.

They have specialized people from Andromeda because they will not show us how to repair or produce these things.

Any terrestrial who sees it gets shot with rays which burn up the body.

"Military Zone"

Able Asian technicians are used, but they also get killed when their work are accomplished.

Composed of: ET's 150 - Asian technicians 150 - Hybrids, a mixture of Asian and ET's, as slaves to clean, etc. 200 -

Ships as machine carriers 4 - Small Ships 10 - They give their ships out while they repair the ones that are damaged.

NORTHERN TERRITORY

Place: MT Davenport - Near Lake Mackay Reserve.

Purpose: AGRICULTURAL EXPERIMENTS.

Supply of aborigines.

Experiments in seed developments, mixing our seeds with seeds from their home. Also animal experiments to increase their breeding.

Experiments with humans and animals too.

Distorting DNA.

Composed of: ET's 25 - Homo Sapiens from all over the planet, agronomists 20 - Hybrids 70 - Ships for plant and animal transportation 3 -

NEW SOUTH WALES

Place: Eastern Australia - Northern part of New South Wales, near Collerina.

Purpose: Laboratory, works with animals, crossing races.

Also laboratory for plant life, to cultivate desertic areas.

They know in what shape the planet is, and when they take over they want, to re-generate it.

Bring people in for training in a new way of agriculture, changing Asian customs.

People will be trained to do what their organization needs.

Planning the Agricultural Scene in Asia.

There are agricultural "spies". Any captured person will from then on work for them, but not on their own volition. It is done through mental commands.

All carry a "needle" which is their monitor.

Composed of: ET's 56 - Aborigines as slaves 200 - Homo Sapiens from different parts of Asia 100, they are there as stable staff.

120 that come and "go". They have all been captured.

Ships for transporting captured people, plants and animals 7 -

Smaller Ships for photographing and patrolling areas 6 -

Very sophisticated laboratory machines for splitting atoms, seeds, etc. and to implant persons to make them become "their" subjects.- An ozone transformer.

SOUTH AUSTRALIA

Place: Strzecki Desert Area.

Purpose: Bring leaders from Asian regions to a fast "treatment". This is totally unknown to them. Change thoughts in their favor.

Working together with "Bering Strait" Base.

Composed of: Highly specialized mental doctors and equipment.

This is a small Base. ET's 20 - Homo Sapiens as doctors and scientists, of any race 40 - Hybrids (Asian and ET's) trained as "nurses", as this is a delicate job, 15 -

Place: Southern Australia - Cordillo Downs Area.

Purpose: Procure for all the lake Strzecki's needs. Ships stay there too.

Composed of: ET's as technicians and communicators, from this Base communication are sent and received, so that no attention should be drawn to the other Base. Ships from outside come down here where they "change planes" to go to other Bases.

Storage for the things they use to shoot at population for mental control.

Training for pilots and shooting.

Computers where all Asian leaders are registered.

From here programs are made and sent out. Naturally they communicate with the "Bering Strait" Base. They work in combination on the political scene.

Here we have doctors and professors in political science, economy, sociology, criminology.

They think that their knowledge will help their countries, whereas their data gets worked through computers for the ET's advantage and purposes.

Most of these people get killed after their use is over.

They work under mental duress. Some, when they find out what this is all about, commit suicide.

Manipulation of Asian economy. Connection, through computers with different banking systems.

They trace wealth to suppress it.

In direct communication with Andromeda Base, which makes this Base a receiving place for their orders.

There are 200 ET's in the Base. 200 Homo Sapiens, captured.

175 Hybrids as workers. 6 small and fast ships. For heavier transport, 20 ships.

BERMUDA TRIANGLE

Information received 4/2/1999

LOCATION OF THE 12 BASES OF THE BERMUDA TRIANGLE

BERMUDA (One base)

ANTIGUA AND BARBUDA (Four Bases)

SANTA LUCIA (One Base)

PUERTO RICO (Three Bases)

BAHAMAS ELEUTHERA (One Base)

ACKLINS (One Base)

LITTLE INAGUA (One Base)

BERMUDA

Information received 22/2/1999

Place: Bermuda – 195 Km West of Somerset Island. The location is under water.

Purpose: Electricity Base.

Pulling energy in from water and air, to charge turbo and hydroelectric machines needed for their experiments of life forms.

Machines come in to be recharged.

Water is pulled in, goes through powerful centrifuges where the necessary molecules are extracted, then compressed in not too big machines which are installed in different experimental areas.

This energy is used because nuclear power of their production kills the life forms they work with.

Please, do not think that it is made with the purpose to protect anyone, no, just to get better results for their purposes, and protect their own bodies.

Same system, to suck in air, up to 35,000 meters, pulled into metal containers where the wanted molecules are extracted. When the rest of the air is thrown out, waves appear in the ocean. Not to draw too much attention they let it out with some care, but in the inflow, no care is used, as big quantities must come in in one pull.

Here we have Andromeda's technology to provide non nuclear energy.

This Base is "old", constructed in 1938, helped by the United Kingdom government (only few people know about it) in exchange for some of their experimental machines.

Our new technology could have been originated by this exchange. The Greys have made their payment with the least sophisticated machines, even obsolete ones, which they gave us.

Today they produce this electricity using less force, their technology also improved, so plains and ships are in less danger now. Naturally, they used what they could, such as metals, BODIES and supplies, from the planes and ships that ended in the ocean.

From the start a technically strong Base, with seniority over the 12 Bases in the area.

This Triangle, with all the information it has gathered, has been an important link for future Base Organizations.

For them it is vital to organize what they do, ***this makes them strong, and is at the same time their weakest point because they rely on organization and NOT on any individual.***

For aeons they have not thought as individuals! So, if organization brakes down in one link, only very, very few are able to re-establish the lines. In the meantime, the greys at work are in a great confusion as their "brain" is cut off.

May be, you can now understand the reason for such tenacity in the persecution of able individuals, and all the help that is given for the GLOBALISATION and the transnational enterprises.

The importance of this Base is the precedence it has given to the history of our planet.

The structure of this Triangle has been successfully copied all over Earth and, other planets have the same kind of system!

Composed of: only ET's. In the start, only the best-trained ones from Andromeda were here. They had experience in building Bases in a "virgin space". Yes, we do have much older Bases around the world, but those were more in single form. Here 12 Bases were planned.

Today its importance is greatly reduced, it has served its purpose.

At this time their machinery is up to date, but its crew is of a lesser rang than before.

There are 129 ET's – 220 Hybrids to handle the machines.

No ships of their own. Space for 3 ships to load and unload. If a ship is needed it comes from one of the other Bases. With logistics, it takes from one to two hours.

Yes, this is part of a good organization!

ANTIGUA AND BARBUDA

Information received 23/2/1999.

Place: Antigua Indian Town Point direction East, before it gets too deep. About 160 Km out to sea.

Purpose: Surveillance of Caribbean area.

They want it for themselves, and no intruders are allowed to land there.

Was kind of an entrance point to the eastern side of the US.

Also a place for gathering information.

Composed of: Extensive kind of radar machines with which air traffic is being continually checked.

Before their installations were made, **other ships landed in this area.** Somehow the Greys have taken over. This could be done due to agreements with various governments. The other aliens did not intend to settle here, only landed, did what they came for, and took off. Their purpose seems to have been trade and support, NOT conquest.

Only 65 ET's and 70 Hybrids.

No ships of their own. Ships come with information and upon request.

Place: 180 Km north of Barbuda, under water.

Purpose: Genetic Base.

This is what they always do, try to use what they can from the area they occupy. They do need food supplies, blood being the most urgent commodity. So, they must figure out how to provide it. Animals and humans are the providers.

For them it is fun to do genetic experiments of all sorts. It even seems that for them, it is a natural endeavor.

These Bases are rather small compared with the ones on main land.

Composed of: tiny rooms, which look more like cages.

Incubators. Here their electricity is used. It is very powerful and seems to be also nourishing.

Resources are also brought from outside our planet. These are used as well for growth and for food made out of powder.

Here we have Homo Sapiens as prisoners and used as jailers at the same time. It has some similarity with the concentration camps.

ET's 128 – Hybrids 75 – Homo Sapiens 1048, here dead bodies are included.

This looks worse than any Science Fiction film.

2 ships, only for emergencies.

Place: 260 Km North West of **Barbuda**

Purpose: Different Machine Repairs, mostly for their Communication System.

They would have been lost without it.

Here prototypes are kept. They are needed as a model for repairing machines all over the planet. As these Bases are now relatively small and little traffic is going on, it feels as a pretty safe storage place.

*As it is not too deep down, a bomb in the right place would produce havoc. The problem is that the men working **BEHIND** our governments protect them.*

It is used as emergency sender as all their equipment is in perfect order.

Composed of: 15 very specialized ET's and 50 ET's learning through experience. No Homo Sapiens – 91 Hybrids with some intelligence as the machinery is of a delicate nature.

Some Ships so that the finished product can be sent right away.

Place: North of **Antigua**. It points toward **Barbuda**. Placed in the middle, between these two islands, as the water is not too deep.

Purpose: Processing and Programming Base.

Seems to be one of the first Bases. Used for planning. From here they took off to do the treaties for further constructions.

A "comfortable Base". Still used to make top secret projects. All looks so elegant and safe. (This is naturally the trap in which our people fell).

Unexpectedly I am finding the history of the Base agreements, and plans of how to secretly take over our Planet.

Surprise, WE have given our OK, otherwise it would not have been possible. Here you can see some "minor" consequences of corruption!

In this place data is processed and plans made of how to keep going in the direction of globalisation and One World Government, which is THEM!

Their planning is subtle, they proceed slowly, and we follow everything they say. This IS the reason for less and less freedom, done through expert computer systems. People have every day less, and they have us practically under their, until now, hidden control.

Their "great" organization started at this innocent Base.

Composed of: About 50 Top-notch organizers, some have taken our kind of bodies - No Hybrids – 25 Homo Sapiens as staff. These are highly trained and implanted! (They do not know it).

Ships only as requested.

The computers they possess have very little similarity to the one they "gave" us.

The reason for this development could stem from the rule that individual thinking is forbidden. Very few leaders are allowed to do this, but they are, naturally, needed to create the plans and programs on which they operate.

SANTA LUCIA

Information received 24/2/1999.

Place: Santa Lucia, Mount Gimic. Source of many rivers, with all the water supplies needed.

Purpose: Mental Experiments With Humans.

How to subdue us without our knowledge. A vital technique in order to get us to build for them. Total mental amnesia, but the bodies must be able to produce.

As far as I can see, it is the way they operate in every planet where they work in a clandestine way. This makes the technology highly refined.

All these Bases look so small, but they are the prototype of future constructions. The area made it possible to take people and send them back without much questioning.

Today it is used more as research and refinement of control over the masses. It is made for various purposes such as strikes, revolts, voting and psychosis of different nature.

Gases thrown from Space Ships are also used.

On an individual basis, special drugs are the best, and naturally, implants.

Waves that vibrate on a high frequency used on population. These include the commands they want us to obey.

With electrical waves they send agreements about the terrible situation we are in, among which are the deadly diseases appearing all over the place.

We are treated very much as cows. To the animals we play nice music in order to get a higher production.

*To us they play **NEGATIVE** waves and news, to keep us in apathy, and obedient to them.*

They, to keep us in constant confusion stage all the revolts and wars we see.

Tests can be made on islands, each with a different wave or gas.

*In reality we do not know if, or when these tests are **USED** on all of us. It includes the whole planet.*

There is a tight communication with other experimental areas.

Composed of: 75 ET's – 183 Hybrids – 275 Homo Sapiens – Prisoners come and go.

All their machines are up to date, the newest development from Andromeda are here. In this place we do not have quantity, but quality!

Seems such a nice and safe Base, but it is deadly for us terrestrials.

5 Ships equipped for tests.

They are very busy, as this project is supporting the political scenario, which is 100% manipulated by them.

Some diseases are spread this way, therefore we have strange epidemics which doctors cannot really cure. But, we take lots of useless medicine, which work as "drugs" for people that are not actually on drugs.

*They prefer kind of zombie population, being **AFRAID** of any possibility of us handling our own lives. In case this would happen they would be **LOST!***

PUERTO RICO

Information received 25/2/99

Place: Puerto Rico, North of Ponce, in the Cordillera Central, nears the river, which ends in Playa de Ponce.

Purpose: Infiltration Base.

The Greys have always worked with data and they train people to work for them. The work of this Base would be impossible if it was under water.

The Cuban situation could have been staged by these organizations. Not all people working for them were forcefully abducted. Some agreed to a fantastic adventure.

Naturally, the work started with people around the area. We have a good start with Che Guevara, ever since guerrillas have been and still are all over the area.

This Base is used as a training camp. The climate is also easy to work in. In these primitive places less attention was drawn on their work.

In training, sophisticated weapons and "persuasion machines" are used. The training consists mostly in covert warfare. An area is infiltrated, and wars keep going on as long as needed by the organizers. (You have Yugoslavia as a living example).

Please understand that for a fight to continue endlessly, SOMEONE must keep instigating it. It is relatively easy to do, as we terrestrials "love to hate each other".

Base still in use, but now only for very specific aims in different places of the world. The Base with most experience in this field.

Composed of: Differently trained Greys. Some are experts in programming, others in executing. Naturally the data they operate on is NOT local. They use worldwide co-ordination with strong attention on the area they want to get into. The result of their "attention" is generally turmoil of rather similar character.

YOU can easily spot it in the International News.

This is vital to be able to bring in a New World Order. (Before this can be done, they NEED disorder)

Some are very knowledgeable in how to INFILTRATE and create fights between neighbors. Sounds crazy, but there IS a technique to it. This is the psychological side of it all. Here is taught how to use the "invisible weapons" in order to make us do what they want.

There are also physical trainers. For guerrilla wars one must be fit. They must also be able to "teach" the people they infiltrate. There is far more psychology and implants involved than we can dream of.

About 200 Greys – 150 Hybrids which are mostly used as guards, to ensure no escapes.

The ones that fail in training are being used in different Bases, for human experiments, but for security sake, memory is erased first.

Space for about 180 trainees.

8 Ships.

It seems as if some shield through which ordinary telepathy cannot pass, protects whole Puerto Rico. One must be able to go "over it"

Here lots of "intelligence" work is going on. They DO work with the human mind, controlling intentions. They also must have full knowledge and control of what their "pupils" are doing.

Sound incredible, but we fall for these hidden robots. They often play the role of "liberators", but give us only death, misery and confusion.

The Mexican EZLN leader, Marcos, could easily be such a product.

Place: Puerto Rico. North East of Cerro de Punta Cordillera Central. They use the river going to Lake Caonillas.

Purpose: Hangar Place for Space Ships.

There is naturally also maintenance. Some Ships can go under water, also some of them are getting old, so nearby there is a dumping place for unusable metal, etc. It is melted down and hidden or used again.

An efficient Base, as several other Bases depend on them.

Composed of: 85 ET's as pilots and mechanics – 128 Hybrids. Some high technology machines for repair and maintenance.

There is death penalty for mistakes. These should not happen. Special computers check everything before using a ship.

Information received 28/2/1999.

Place: Puerto Rico – Cordillera Central. Area Monte Guillarte where Rio Grande de Arecibo starts. This river flows into the Atlantic Ocean. Again, it s obvious that they need water.

Purpose: Construction and Logistic Base.

Whatever was needed of imported materials for the construction of the other Bases came here, and still does today, for minor replacements. It still supplies the needs of the 12 Bases. The shipments were, compared with today, much smaller.

Some parts are assembled here. For easier transport things are kept as flat as possible.

Computer system geared on construction and maintenance. This has to be organized very thoroughly, as shipments are not arriving every day.

Seems that Mars does receive the very big Intergalactic Space Ships. From there things get distributed as needed. It is obvious that Puerto Rico is too small a space for intergalactic transportation.

Mars is undisturbed.

Much of what is found on Mars is kept highly confidential, but I am rather sure that we DO HAVE most of the information. Simply because this huge project could never have been made without the knowledge of the terrestrials.

Movies make as believe that they are made of some "other dimension stuff", but all is very much in our dimension. Their bodies can die, their machines can brake, they need water, etc.

Composed of: ET Engineers as well as Homo Sapiens – There are 80 of our people, naturally all monitored the usual way – Erasure of memory, chips in head or body or implants – But, these people, even though they are being used, are feeling OK. The monitoring is on the subconscious level.

Many abducted people do not even know that they have been gone! They have become living spies, without even knowing it.

185 ET's – 310 Hybrids

Space made for storage and for assembling things. Planning of constructions. Their know-how is kept in rigorous systems. They have no competition. If someone occludes some data and is found out, again, the penalty is death. A hard system which gives high production, and no corruption.

Experience from this place has been used on later constructions.

Good space for landing. Ships 30.

From here plans are made of what is needed from us terrestrials. All transactions are done by monitored Homo Sapiens. There is no danger involved for the greys; a person goofs, heart attack or something similar is imminent.

Much of our money goes into these projects.

Where does our tax money go? Taxes are every day higher, misery every day bigger. Not too logical. Is it?

We rarely see what is happening behind the scenarios.

BAHAMAS-ELEUTHERA

Information received 1/3/1999.

Place: Bahamas – Eleuthera – An underwater Base with a tunnel connecting to land in the Western Bay. Here water is shallow.

Purpose: Logistic and Information Centre.

Used for further construction projects and expansion. A rather small, but very efficient Base.

Their main interest was the American continent. Possibly the huge technical explosion stems from the interchange with the Greys. We all know that there has been a huge expansion of Bases on earth. We hear about more abductions, see more "strange" lights in many, many different places, (some can even see them on the moon with a private telescope!). Also, our planet is getting crazier every day, (*what do YOU think about KOSOVO?*) and control is getting tighter through all this new technologies.

The start of this expansion we find in this famous Triangle, and this Base has masterminded many different events in our recent history, possibly also the Hiroshima bombing, which historically has been rather hard to explain.

Basic training is done in other Bases. Here the real tough work was, and is being done. Only the master spies or infiltrators have access to this Base.

All looks so safe and quiet. The only machines are data computers, maps, and sketches of plans (all done on a screen). We can say that here the mind is at work, more than machines! In this place ideas are accepted and expected. They can even come out on land, for a stroll!

This Base has much of the American top secret data filed. Really, at this time, for the Greys there are no secrets about us. Through super spies and access to ANY computer, they get all the information they might need.

ïDid you know that university books are being controlled by their EXPERTS? They even have book scanners to ensure that certain data is not taught. This, though, is not handled in this specific Base.

Composed of: 20 ET's capable of making business with terrestrials, especially with the US government. They even have contact with some of the groups BEHIND the president, who knows very little of what really is going on. He must be able to appear "clean" in front of the nation and world.

75 ET's to prepare programs – Space for 50 visitors such as businessmen, or people who must be grooved in about certain programs. Guests can also arrive by ship, and can go to the meetings through the tunnel.

90 Hybrids, mostly for menial work.

The ships for VIPs are not their own.

ACKLINS

Information received 3/3/1999

Place: Bahamas – In water, situated between Acklins and Ragged Island Range.

Purpose: Camouflage Base.

It is a **Communication Centre** to stay in touch with the outer world such as other planets and "home" Andromeda.

The very potent receivers and senders are being continually improved. Programs are being received, information is sent, but the only thing that can be seen of this activity is work with wreckage, and investigation to study fish fauna! The important Base is constructed underneath the apparent Base.

If we were able to intercept this communications, we would know what would happen next in our turbulent history.

Also this area is rather small, and efficient. A peaceful environment is required for the thinking and planning of the Robot Society.

They wish as to be Robots under their programming directions.

In these Bases we find the intelligence that was missing in most of the Bases around the planet. Here plans are made, and followed scrupulously, while we are living in chaos, which is the result of this very exact planning.

Anyone can spot this by looking at the global situation. Local news tends to make you believe that it is only happening to YOUR country.

These old Bases still keep their importance. In this one there is not much ship movement, instead LOTS of communication waves. It would be real fun to have the adequate receptors to pick up their frequencies!

Secrecy is their best protection. (Part of the reason for these articles!)

This Base must have great importance, otherwise it would not be hiding so thoroughly. It is protected physically as well as mentally. This have been very tough to approach telepathically.

It is also dangerous for ships or planes to get too curious. If they felt threatened, they would destroy the threat with lethal beams, but **only** if they considered it dangerous, otherwise they prefer to work without showing their presence.

Composed of: All ET's, in both Bases. The upper one has trained guards for the lower one. Also some machines to reinforce the hidden one. Their work is to send and receive information, and for this, they have TOP specialists.

Communication to or from outer space for Earth Bases goes via Mars or Moon, but never directly.

ET's as specialists 35 – Other ET's 47 – No Hybrids – No Ships

LITTLE INAGUA

Information received 4/3/1999

Place: Bahamas – North East of Little Inagua, before the sea gets too deep, and is still in US territory.

Purpose; Execution Base.

There is much more movement in the Execution Bases. These must implement the programs. If things fail, they get punished. Here it is still allowed to query an order as they may encounter unexpected problems. In further links, execution is, as we well know, robotic. They have NO power of decision.

People sent on missions have to be trained.

It seems that here we have gathered some "intelligence" Bases. Possibly they started out with more building administration, but as the purpose is to take over the planet, there are some things that have priority for their ever further expansion.

In reality, not much space is needed for subversive actions, as it is all made as hidden as possible.

Composed of: 50 ET's, highly trained in subversive wars. The trick is to make us fight against each other, and not allow these fights to stop. (The Yugoslavian continuous problems are a living example).

The agitators stay hidden, and are being directed from such Bases as this one.

This Base can be approached by ordinary ships, and entered through a tunnel from Little Inagua.

Here Homo Sapiens works for them. They have been prepared and tested in other Bases, have done successful missions before starting to work in this place.

Space for 35 trainees. Once they start working here, this is their Base of reference. Flubs, are not being discussed with, they are simply eliminated. The only reason they might protect the ones working for them is that it is time consuming to produce the kind of person they need.

175 Hybrids, taken among the most capable ones.

Food supplies must come from land Bases situated in Central America, as well as in Venezuela.

No spaces for own ships, but there is always one ready for whatever might be needed. 3 ships at a time can operate here.

EPILOGUE FOR BERMUDA TRIANGLE

MOST OF US KNOW THAT THEY ARE HERE!

Please, understand that the reason they are hiding, and making everything so secret is **that they are AFRAID OF US**. (I am aware of repeating myself!)

This is also the reason they are producing bacterial diseases, using our media to, slowly make us agree to everything they are planning. If we all **knew** what is really going on, no one could suppress us. Knowing and united, we are unbeatable, but unfortunately we do not have these qualities for the time being.

This is the reason they can keep us fighting each other, sink us in different catastrophes and crisis all over the planet. We are ending up in gradual lethargy, so no one dares, nor has the courage to do anything about it.

We allow things to continue happening **THEIR WAY**.

Soon we will be able to say good bye to **OUR** civilization.

The reason for these articles is to help as much as I can, to keep it truly **OURS**.

MARS

INTRODUCTION

After receiving so many messages about the different Bases on Earth, one appeared "from above".

This simply means that to be able to coordinate all their activities on this planet, the best way Et's can do it, is from a distance.

For this Mars is ideal, as it is very near us. Suddenly it seemed clear that to promote the U.S as their One World Government, Europe had to be reduced in its power.

The tactics in use at this moment are to strengthen the U.S economy to attract the third world nations to them, and squeeze Europe through this on the one side, and the huge inundation on the other.

Europe being their only competition for the time being is getting its share of problems. Mars, as well as the Moon are ideal because of their vicinity and our inability too move with adequate Space Ships ourselves.

As I started with the title of **FACTS OR FICTION**, again it is up to each of you to decide and act according to your viewpoints.

Regards, a FRIEND!

BASES ON MARS

DESCRIPTION AND LOCATION OF 3 ALIEN's BASES

Information received 3/8/1997.

Place: North East of the planet - There is no water to separate continents - Built on a plateau.

Purpose and general information: TO COORDINATE THE TAKE OVER OF EARTH.

Laser projected pictures of whatever they wish to see. From here the areas they want to keep "clean" for their take over, are marked. This means the soils that should stay out of use.

Programs, naturally, are originated in Andromeda and refined here.

A team of experts in take over tactics.

Done many times before all over the different galaxies, whenever things get too much out of their control. In this Bases, Homo Sapiens are working hoping for a better condition for themselves and for some few others of the "chosen" ones.

As we have seen before, they can pin point the places where they want inundation to occur. They have NOTHING against us in particular, just a job that must be executed.

They are used to win, as the "enemy" is undetected. The 3 Bases are connected subterraneously.

The Moon is used as their satellite. (Most planets have "moons"). From Mars, some make trips to the Moon or to Earth to check on the different conditions on the spot.

Their job is INFILTRATION WAR. Here they have the programs for each Base on Earth, Mars and the Moon. Here it is played with the value of currencies all over Earth. The intention being that the masses of population should have less, having apparently "more". This we came to call inflation!

Economy is made to appear so complicated that everyone is kept in confusion about it. *Simplicity is not taught: spend less than what you earn, and you will always have!*

Terrorism is planted with exactness, taking into consideration different places, as well as its timing. As I said before, all is aimed at ONE WORLD ORDER. All this is a tiny part of a huge Organisation, and no one in it is free!

This is a big enslaving machine for everyone involved. If a break appears in the system here on Earth, the whole Organisation will start to shatter as it is built very much the same way all over the place, and there, naturally, is interconnection.

BASE "NUMBER 1"

Information received 4/8/1997.

Purpose: Food and Medicine Supply.

Storage for spare parts that might be needed. Ships arrive here and are placed in shelter as there are terrible winds which sometimes carry stones.

Composed of: ET's 28 - Hybrids 350 - Homo Sapiens about 90. These are here because they are considered of no use in any other place.

Storage space is huge as there is no necessity here to hide, but much is built under earth for protection against the elements.

For our scientists here on Earth, many stops are being made when they want to "visit" Mars, as there obviously are areas which should not be seen or studied!

In storage there are also spare parts that are much needed on earth, part of the reason for a lively traffic between these two planets. Possibly astronomers could spot this!?

Here we have really big INTERGALACTIC ships. As mentioned before, enough space without fear of detection. These ships come and go. Sometimes there can be 3 of them in the area.

Food supplies come from Earth. There is underground water in the area!

20 own Ships. (For them to come to Earth is like for someone from the U.S to fly to Paris!). There is also here some stock of live animals that reproduce themselves. "Green Gardens", all under roof. Very much as in Science Fiction.

A Hospital, naturally only equipped with their advanced technology. It includes a Psychiatric Ward where implants are perpetrated for missions as well as to subdue ANY revolt.

All is very peaceful in these Bases! Sex is not allowed in any of the three Bases. Only grown ups are "admitted". Age 20 as minimum.

Anyone that is of no use to them gets eliminated by implanting the being and used against us "down here".

Due to this system, all work as efficiently as they can. Fear drives them not ideals! Possibly this is the reason that I am allowed to come out with these data. They want us to KNOW about their situation!

BASE "NUMBER 2"

Purpose: To Coordinate the Programs They Have With the Actual Situations.

The Purpose is settled, but to be able to achieve it they have to be somewhat flexible. As we already know from the Bases on Earth, they gather information from all over the place. The main information comes here, where, with a clear view of the WHOLE planet's situation, programs are prepared or changed, as needed.

Each one is made for a specific Base.

Whatever activity is done from a Base on the Moon, the orders come from this "Base Number 2". (The Base on the Moon is situated on the back side of it. Just "around the corner", not to be seen from Earth)

Composed of: Ets 400 - Hybrids 3.000 - Homo Sapiens 500 - Homo Sapiens is needed to evaluate certain situations. Space for Computers. Space for picture projections. Space for analysis. Conference rooms. Space for telepathic communications. Space for relaxing. All very spacious!

The "amazing" thing is that they have very little discussions or disagreements. Basically all are prisoners in different degrees.

BASE "NUMBER 3"

Purpose: Sending Out the Orders that Should be Executed.

There is more movement in this Base. Most is done by their Internet system, through which they can talk and be seen as well as transmit written materials.

Some times people are brought up here to be instructed or trained, or implanted to ensure execution. Other times some leave from here to give instructions to people on Bases on Earth or the Moon. One could say that they can work with the "speed of light".

This being the fastest moving organisation in the area. The reason for this is that if change of plans have to be done, not to loose their power, it has to be done fast!

Composed of: The fastest brains in terms of ACTION. 350 Greys - 300 Hybrids - 75 Homo Sapiens - Under the command of this Base there is a crew for handling their ships. Only the best ones are stationed here. 60 Hybrid pilots, as they are more dispensable. No Homo Sapiens as pilots are allowed, as they are afraid that they might escape.

Post Scripture: Amazing, but all wish to be able to be free to decide on what they want to do, and the way how to do it. UNTIL NOW THIS HAS BEEN UNATAINABLE. Strange as it may sound, through this message they are seeking for help!.

MEXICO

DESCRIPTION AND LOCATION OF 45 ALIEN's BASES

COAHUILA

Information received on 5/9/96.

Place: Sierra Madre Oriental - Area of Nueva Rosita

Purpose: Genetic Experiments with people taken in the United States and in Mexico.

Their blood support bank. Fresh blood is what they need most. It is smeared on ET's bodies and absorbed through the skin.

Hybrids can eat food and can reproduce through sex, which clean ET's can't. They are reproduced in laboratories.

Base with many children, when grown they are trained as soldiers. They need an army loyal to them, but they make them "extra" loyal through mental implants, which make them obey even against their will.

Composed of: ET's 110 - Homo Sapiens as Scientists 15 Hybrids, their production on the base 155, many of them, when ready are taken to supply other Bases.

Children, men and women, captives 230. Some of them are sent back with "messages" - These numbers are in continual variation, also due to gruesome deaths.

They are testing how much radioactivity bodies can take, also reactions to vaccinations, how bodies degenerate with "medicines", but also which really can heal.

As there is no problem if somebody dies, they can make any kind of experiments they wish.

From a dead body, if the blood is not infected, it is used, as well as any organs they might need, for their "scientific" work.

Here there is easy access to transplantation, incubation, DNA mixtures, for "real science" to develop!

Ships for Human transport 10 -

Place: Sierra de la Fragua

Purpose: Animal experiments.

Processing and supplying food for the Bases that are in that surrounding. Creating new animal races with samples from other planet's.

Animal and human mixtures as experiments.

They have all kind of animals, even hens and birds.

Composed of: ET's 65 - Homo Sapiens as prisoners 20 - Hybrids 95 - Animals 6,750 - Ships 6.

There is also great suffering for the animals, but no one cares. They work to accomplish a purpose which is given as an order. There are no feelings nor ideas about anything else.

Place: Area Charcos de Risa

Purpose: Political Information Center for Mexico and Central America.

Training area for terrorism and guerrilla work, also for infiltrators and plants. Not many people are needed to do the work, but they MUST know their area.

There is an area for implanting mission orders, as well as for "erasing" them again, when accomplished.

Big computer area. They make their own programs, which must be approved by Boss in the United States.

They have people on posts near governors and leaders of State. These people have brilliant university careers. They have been abducted, and forced to work for them. This is done by using strong mental pressure, mostly totally unknown to the victims.

Many political speeches are prepared here, and those not done by them are checked to ensure that things are done after their policy.

This is really a suppression of our "legal" governments, but most of them have no idea about this manipulation.

Composed of: ET's 80 - Homo Sapiens as staff 85. All have high degrees in the Humanities and Political Science, some even have great experience in government management -

Hybrids as menial workers 150 -

Ships special for abducting and fast transport of people 11 -

Computers, each specialized in a country's political, actual state.

They unstable each country that seems stable and prospering.

For them to take open power control, they need chaos and misery, otherwise we would not accept them.

Space for 50 prisoners where they get psychiatric "help" from ET's as doctors.

Machines for influencing crowds, used for elections as well as to arouse people to fight for... which ever they want us to fight against!

CHIHUAHUA

Information received on 14/9/1996.

Place: Area Casas Grandes

Purpose: Main purpose is hidden. It is a storage place for boxes used for implanting the area of Mexico and Central America and the Caribbean area.

There are many trapped beings which are ready to be sent on specific missions, mostly as government interference or to take over certain important people.

There are some 1,350 boxes.

There can also be found tubes with concentrated carbon monoxide, nitrogen, used to depress populated areas, so that people wake up tired after sleep.

They have means of producing epidemics of flue, colds, bad nerves. There are 2,000 tubes there.

Hidden are also the master programs for this area.

Weather regulator crystals in transparent circles, through which sun rays can be directed. Store room for replacements, 2,112 weather circles.

Copies of what is found in other Base's computers. This security is needed as they feel lost without their programs. These things are not connected to any computer to avoid computer "diseases". It appears to be a ship repair Base and training place for ship crew. An "innocent" Base! Pure pretense.

Abducted people are brought here, implanted and sent back to spread miss information about them.

Wreckage of ships in the entrance.

If anyone comes near it, he will be pulled into its center and disappear!

A busy landing place as supplies are fetched, data brought in.

Landing place for bigger ships which come with their supplies.

No ships of their own.

Composed of: Machines which observe anything that comes near the area. Any wave will be registered.

The only protection they do not have is against earthquakes.

ET's 65 - Hybrids 30 - Homo Sapiens as prisoners 150 -

Information received on 15/9/1996.

Place: Not far from the prior Base, situated South East from it, area Ojo del Carrizo.

Purpose: Keep border area in turmoil.

Works tightly with Bases in the USA.

Help drug smuggling. Have all data on South America's drug cartels and interest in their expansion.

They wish population to be weak as they are afraid of strong people, specially if they are able to think and organize. Abducted people come out from here drugged for life. These also come from the US.

Links with drug Bases on the planet. Give protection to drug dealers and get all drugs for free.

They are making drug experiments, also in food and as pollution.

Many get killed with this "Scientific" work. After the body dies they trap the spirit which they later use for their purposes.

These beings are kept in electrically charged boxes where they are kept in an unconscious state.

Composed of: ET's 70 - Drug Computers - Homo Sapiens as "Scientists" 220 - Hybrids 150 - Space for prisoners 1,000 - Ships 22 -

Any one approaching the area gets drugged. Often they get their prisoners through drugs.

A very dangerous Base because the results of their "Scientific Research" is destruction for the population.

The sad thing is that we from this planet, are responsible for it because we supply them the needed materials. For us this is business, for them, take control over us, also over those that are "helping" them. Some in the governments are aware of this interchange, but can't talk because they are afraid of consequences.

If governments would not be afraid, the ET's would have NO chance, as there really are not that many of them!

Information received on 20/9/1996 .

Place: East of Jimenez, area Bolson de Mapimi.

Purpose: Experiments with riots into the USA, Mexico and Central America.

Tough training. When body dies they must report back to Base. To ensure this, implant techniques are used.

Composed of: ET's 80 - Hybrids 40 - Homo Sapiens, all as prisoners 82 -

Maps and computers where they receive the programs which they must follow strictly.

Their trainees infiltrate riot areas, and their job is to keep these riots alive.

Many of the people as staff are doctors and psychiatrists. It is their responsibility that the trainees succeed. Equipment such as clothing and adequate weapons.

They train on the surrounding grounds as their bodies must be fit.

Space for 200 trainees at a time.

No ships of their own.

NUEVO LEON

Place: North West from Monterrey - Sierra Madre Oriental Area Espinazo, San Jose de la Popa.

Purpose: Keep an eye on Monterrey.

Usual control of population to make them tired and sick throwing chemicals in the cities.

From here they work on other cities such as Laredo, San Luis Potosi, Hermosillo, Chihuahua, Torreon, Ciudad Juarez, Hidalgo del Parral, Saltillo, Tampico.

Military training in how to abduct people, to kill without being seen, in how to fly their ships and throw whatever is ordered, in fast take off and landings, in how to work as a group. Here it is checked if the devices they put into their heads function correctly.

This army can be run by remote control.

Composed of: ET's 400 - Hybrids 600 - Ships of many different sizes 45 - Homo Sapiens none.

Information received on 21/9/1996.

Place: Southern part of Nuevo Leon Area Santa Rosa - Palo Blanco.

Purpose: Communication Center.

Here orders from Montana Boss are issued and sent out to be executed. Also from here they control their execution. They have all programs available to be able to coordinate actions.

People in this Base are high rank officers.

All missions have to be learned thoroughly, if necessary, data are implanted, which means, put in, in an unconscious state.

This is also a place where information is gathered and sent to the Boss.

They work with exact facts. All their actions are well planned.

Here people are trained for espionage. When back from a mission, debriefing is sometimes done with lie detectors.

If prisoners are taken, interrogations are done under torture or drugs. Drugs are much used for this purpose. But these people never come out again. Their bodies are then used for other purposes, in other Bases. This is the reason people see so many ships flying all over the planet.

There is also a direct communication to and from Andromeda.

The Base is surrounded by mortal gas, so anyone approaching dies of it. The real reason for these deaths is never given.

Otherwise a very quiet Base as most of it is mental work.

Composed of: ET's as officers with rather powerful minds 50 - ET's with lesser ranks 50 - Sometimes there are up to 150 prisoners.

Fast moving ships 11 - Usual ships 7 - Special ships to reconnoiter areas, with high technical equipment which can shoot very exact, if necessary, and not be seen! The reason being that they fly so high.

They also have 17 ET's trained in Telepathy.

Information received on 22/9/1996.

Place: North West from Monterrey - Area Cerro Carrizal.

Purpose: To produce CHAOS.

Training place for soldiers.

They take a specific area or country at a time.

Very concentrated work.

Composed of: ET's 30 - Hybrids 100 -

Homo Sapiens comes and goes. They only take in the people they need at that time. There is space to work with 80 people at a time.

Ships of small size, but very fast 8 -

BAJA CALIFORNIA

Place: Baja California Norte - Sierra de Juarez, Area West from San Felipe - not far from Cerro de la Encantada.

Purpose: A Computer Base.

Handling Los Angeles, San Diego, Tijuana.

Data on their citizens.

Sorting out things in order to manipulate area. They also plan actions, but these, naturally, must be approved by Boss. Also a surveillance Base.

Can take prisoners for gathering information, most of them are sent back again.

Checking telephone lines through their computer systems. TV programs in this area are also checked.

These actions comprise also parts of Mexico such as Sonora, Baja California, Sinaloa, Ciudad Juarez, El Paso.

They have great interest in causing frontier problems.

Composed of: 40 ET's trained on population manipulation -

Hybrids 40 - Homo Sapiens training in their computer technology 20 -

Some atomic war heads, which can be used to make believe that "someone" is attacking USA.

Hawaii is also their zone of interest.

DURANGO

Information received on 28/9/96.

Place: Northern part of the State - Area San Bernardo -

Purpose: Money Base for Mexico and Central America.

Planning and the execution of it in different countries.

Also deposit of gold which they receive for their "services".

We receive from them "new technology", but what they give us is nothing new, nor important for them.

There is a VIP area for bankers, they meet here to discuss conditions, and here the main agreements are made. Allocation is given for guerrilla and terrorism work. Much money is invested in these things.

Training is the most difficult part because of so many different idiosyncrasies.

Here the Mexican ""crisis" has been planned.

Composed of: Very refined bank equipment. These computers have access to the main Banks and all their accounts.

They keep an eye on the big flow of money, and know who the wealthiest people are. Some of them even become their allies.

ET's 125 - Hybrids used for maintenance 20 - Homo Sapiens as Economic Scientists 120 - Space for 21 visitors. This is very elegantly furnished.

A small exclusive Base.

Place: South West of Durango City - Area El Salto

Purpose: Patrolling and executing missions which other Bases have planned. NO mission is ever executed without the Boss's approval!

Patrolling and checking Baja California, Sonora, Sinaloa, Nayarit.

They are afraid of aliens that could come and help. Their technology is only so advanced for us on this planet. We have been kept in total ignorance of interplanetary trading and the different ways of being able to communicate.

Composed of: 50 ET's specialized in piloting ships that can execute delicate missions.

155 Hybrids as mechanics for their ships.

100 Homo Sapiens trained to accomplish missions. They are used not to scare people with alien bodies. When they arrive here they are already trained. Here they are just given the last instructions and implants in order to follow orders EXACTLY.

Their work depend on the communication they have with the other Bases in Mexico, USA and Central America.

Place: South of Durango City - Area El Troncon

Purpose: GENETIC BASE.

Procreation of Hybrids for the area.

Scientific research with Homo Sapiens bodies. When the spirits leave the bodies that die under their experiments they get trapped and sent in boxes to another Base for programming.

There are no stops for their experiments, so they can use any kind of medicines in their tests.

Our bodies interest them very much, reason for so many experiments. Naturally they use all what they breed through sex and in test tubes as Hybrids. Only the best results of these experiments are being used in missions and as higher rank soldiers in their tightly managed organization.

Composed of: 25 ET's as Scientists. This experiments has the interest of their Central Base in Andromeda.

Their technology is highly advanced, but their bodies are rather degenerated, far too robotized, even for their own taste, reason for sending their Scientists.

ET's as soldiers 120. They obey orders with no discussion.

Hybrids, babies in process of growing as fetus 8,000.

Hybrids in different ages 200.

Homo Sapiens as Scientists 20.

Homo Sapiens as prisoners, used for their experiments, of both sexes and of different ages 1,200.

Very advanced genetic equipment, composed of a mixture from this planet and their home planet.

Ships for human transport and food 15.

Here they bring things they need from specific hospitals from all over the zone (Mexico and Central America). Many people without documents end here as slaves and "Guinea pigs". They are most interested in YOUNG people for their procreation purposes.

ZACATECAS

Information received on 29/9/96.

Place: North Western part of State - Area Atotonilco -

Purpose: A SPY CENTER.

Transformation. Make twins out of specific people for fraud purposes. They "double" a person to make a twin, have to use same race and same blood type. Need even teeth prints if possible.

Also "twin souls". For both purposes a big investigation is needed, which require a lot of work.

Here they train the ones that will gather the information.

To take films, their technology is far more advanced than what we see in the movies.

A tracer is set into a body, then their machines can follow his or her way of acting and living. Voice is also transmitted.

Composed of: 50 ET's with highly sophisticated equipment -

Abducted Homo Sapiens to see if they can be fooled, as tests. Scientists and doctors to perform the necessary operations, but ET's are the most able.

Homo Sapiens as staff 56 - Hybrids 120 -

Space for people coming and going 45 -

These can't be kept too long because if they should be considered dead, the trick can't be used.

Preparations are lengthy, executions are swift.

Ships 10 -

Place: Northern part of the State - Area Apizolaya -

Purpose: A Purely Scientific Base.

Agricultural experiments. Gas containers in which they put seeds. Our agriculture is for them far too slow.

Theirs is faster with bigger fruits. As they plan to take over this planet, they wish things to look something like what **they** like.

They do not care for the present destruction because they plan to reconstruct things after their taste and needs.

Their energy supply is different than ours. They generate in each Base the energy they need. Have very effective water.

Experiments in how to make bodies stronger or weaker through the food they eat.

This is also a way to control population!

Gases also protect the area from being approached.

Composed of: ET's 25 - Homo Sapiens 30 - Hybrids 30 -

Refined research equipment.

Equipment to humidify and to use solar light at their will in order to decide temperature. Different fertilizers, through these they decide if it will be good or bad for bodies.

GREAT PART OF THEIR EXPERIMENTS ARE IN FERTILIZERS.

Information received on 12/10/96.

Place: North East part of the State on the border to Coahuila near Avalos La Ventura (Coahuila)
-

Purpose: Intelligent Service for the area of Mexico and Central America.

Training for the job as well as coordinating data received.

They are interested to know what are we terrestrials afraid of. How much do we know about them. Their power consists in their secrecy.

They work with very exact maps to know where to direct their ships.

Composed of: ET's 45 - Homo Sapiens, all mentally "prepared" to work for them, as staff 35 - Hybrids are considered too stupid to work here.

Place for training people, all naturally Homo Sapiens 30 -

No ships of their own as this is a mental working Base.

Have highly developed communication systems, also in ships and places outside our planet -

Their work must be coordinated with the rest of their system.

This highly organized system is vulnerable if some Bases should break down, as it is a very balanced system.

Dangerous to approach area. Anyone coming near is taken as prisoner. Their main interest being DATA.

Homo Sapiens working for them would LOVE to get rid of the mechanism which keeps them under their control. They feel that no one is able to help them out. On the planet we need trained people for such a task.

SAN LUIS POTOSI

Place: Sierra de Catorce.

Purpose: High Technology Machine Repair.

Storage for surgical devices. The place where these are made ready for use.

As they come here in separate parts in order not to get damaged before use (such as needles put in heads, used to monitor people), highly trained technicians prepare them. There also are measuring gadget's for temperature, ozone, and all the vital signs of life on the planet, as they want to have this under their control.

They can "help" development of different disasters. Where there is something, they increase it!

They are not all powerful, but can mess things up.

Make and repair machines which can send rays, chemicals and thoughts, etc. Long distance listening devices, computers. There are specialized and very valuable parts as well as people, all from Andromeda.

These kind of Bases are the only ones able to repair their refined technology.

With these machines they can cure ANY diseases. Have prisoners to test things before delivery which causes lots of suffering.

People that disappear in the area are used for this. They can be of all ages, and are just kept there for experiments.

Composed of: ET's mentally very powerful 21-

Homo Sapiens only as prisoners as this is very confidential 55 -

Hybrids as slaves 95 -

Ships, very fast ones, for fast delivery 3 -

Machines to produce their electrical power. For this they use a special mineral which they split. Catorce mountains have some of these minerals, reason mines in the area are kept closed.

Place: Sierra Madre Oriental - Area between Ciudad Valles and Rayon.

Purpose: Check on the Coast of the Mexican Gulf. No one may enter without their permission.

Check ship traffic as well as oil production.

Coastal area Information Center.

Exploiting witchcraft zone, an excellent mean of people manipulation with fear and ignorance.

Tend to help witchcraft. Zone kept in misery.

Control, as usual, politics, which means, no **real** progress is achieved.

Lots of torture and suppression going on to get the information they want.

Composed of: ET's 200 - Hybrids 96 - Homo Sapiens learning witchcraft and some methods of healing (to give them extra power), place for 70 people at a time.

Part of the "training" is to put a monitor on them which makes them have "visions".

Ships for abduction and people transport 10 -

Ships for keeping an eye on the coast and the Mexican Gulf 8 -

GUANAJUATO

Information received on 13/10/96.

Place: Mountains of Dolores Hidalgo, not far from River Laja -

Purpose: Gathering knowledge about the Mexican population, patrolling the central cities of the country.

Their mission is that no one should come in from the outside. They will not permit that any other people from outside this planet should come to communicate with us.

As they want the planet for themselves, it is strictly guarded.

Military Base. People trained to handle this specific area.

They need knowledge about their leaders.

Very much on the watch for anyone appearing that could help people out of their misery and ignorance. If such a person should be detected the government will be informed. This suits the Mexican Government very well. From here they infiltrate areas to create protests and fights against the current situation, which they themselves are creating. Peace is NOT allowed, prosperity either.

From their ships they can see the flow of life, thus they can control it.

Very politically oriented. Basically they function as "watch dogs".

Check on television channels to ensure that nothing really true about them comes out. Through this media truth would too easily be spread.

They are so few in comparison to us that they do not feel safe, specially if truth is known about them.

All soldiers are trained to handle a sudden attack on the terrestrials.

Being so few they must strictly coordinate their movements. They are always prepared for such an order to come, and the weapons for that occasion are unknown to Homo Sapiens.

These weapons are made for a "blitz war" (fast take over).

They also know where to land in case of a take over order.

If this coordination fails, they will also fail in taking us over by extreme force and SURPRISE.

The huge danger is in our minds. It is the main reason that we act in fear and with no coordination and no preparation. We are acting in pure ignorance, but knowledge will make us free!

Composed of: ET's 140 - Hybrids trained as robot soldiers 200 -Homo Sapiens from whom they gather data and train to infiltrate, even peasants 150-

Fast ships for reconnoiter work and patrolling 9 -

Hidden weapons of different categories with appropriate ammunition. Computers - Population data to know whom to abduct.

Information received on 16/10/96.

Place: North West of the State - Area Ciudad Dr. H. Alvarez.

Purpose: Training Center for People to Infiltrate.

Lots of surroundings with populated areas to check if training is OK, that is , they do not get recognized or looked at as suspicious persons.

Genetic experiments, all kind of mixtures. They work with abducted people from Mexico, as well as from Central American countries. Easy to get people for experiments as there are so many with no documents.

The best ones are trained for guerrilla wars and insurrections.

As usual, population to stay in ignorance, criminality, fear, health and economic worries, this being the only way to subdue them.

They are afraid of these people's reactions if they find out about all this cheating and lying.

They are instigating behind the government!

Great electromagnetic field in the area.

Composed of: ET's 260 - Homo Sapiens as staff 210 - Hybrids, only those produced by their experiments 45 - Prisoners, capacity for, 250 - Ships 9 - Equipment to fetch food, blood from different animals.

Here too, anybody that dies under their experiments, is trapped as a being and used for their purposes, giving them orders and sending them to influence any person they consider needs their "guidance". For this they have machines that look as small canons, with which they direct the being to the target. This is done mostly at night, from their extremely fast ships, on which there is only place for the pilot and the shooter. This can with ease stand still on top of any place they wish. They make no noise, but tend to radiate some light as these powerful machines are driven with their own electricity supplies.

Machines to implant sleeping persons.

These "soldiers" are extremely well equipped. Even their cloth are not from here, they tend to make them "invisible", has to do with absorption of light.

Place: South West of the State - Mountain area - Santa Cruz de Juventino Rosas and Irapuato.

Purpose: Machines to make topographic work and for building as well as for maintenance of Bases.

Here we have heavy machinery also for preparing their landing space. A very small area is needed for this.

Composed of: ET's 47 - Homo Sapiens as technicians, but enslaved 30, Hybrids 25 -

Special ships for this work and transport, rather big ones 10 -

They supply the whole zone.

Place: North East from Mineral de Pozos, not far from the border to Queretaro Area Jalpan -

Purpose: A Power Production Base.

Extracting from the mountains the minerals necessary to produce their power supply. Ships run on the combustion of that energy.

This is stored in boxes, is also used for generating energy in the different Bases.

They use a mixture of different minerals, then make fission. Result: a high concentrate of usable energy.

The process is done in containers made of amalgams from other planet's which are highly resistant to a big potential of energy.

This energy when contacted with our vegetation burns it as it is rather toxic.

This happens when they land or take off, as more energy is needed for this movements. When not used with such strength it is not harmful, reason Bases can use it as their energy supply.

Their job is also to check satellites for undue interference. They are afraid of anyone getting into the World Wide Communication Net, and be able to suddenly appear with the TRUTH about the situation. The Communication System being as controlled as it is, can in reality easily be taken over with adequate technology.

Their basic fear is to be found out.

If a single person divulges the truth, he is immediately eliminated. They are terrified of groups with any spiritual and technical Power. Their "high" technology would be frail if known by any of us.

Composed of: ET's, mostly as technicians 19 - No Homo Sapiens, as they are not supposed to learn this. THE POWER IS IN THE HANDS OF THOSE THAT CONTROL ENERGY!
Hybrids 50 -

No ships of their own. This place is kept as a great secret.

Satellites are checked with small gadget's which are shot out, and electronically retrieved. Kind of spying small computers that can attach themselves to the satellites and transmit to Base. They look as totally innocent devices.

About 1,000 boxes ready for anyone that needs supplies.

These boxes are of different shapes and power, depending of what they are going to be used for.

The boxes are being changed, they bring empty ones, and take the full ones.

Place: South West of the State, not too far from the border to Michoacan West of Penjamo.

Purpose: Industrial Base.

Control over population and industry.

They want to know what is been produced. Fear of real improvement which does not come from what they give us!.

They get some products done by us, there is an exchange happening here, they give us some of their technology, we give them "permission" to take the people they need for their work. Some in the governments KNOW what is going on, but they have great dreams of the power they can get through such connections.

Some of "our people" are visiting this Base, where they show what they wish "our people" to see. Only that the ET's are really master cheaters!

Their job is to keep the people quiet. From here they send depressants, chemicals put in the air, and the usual stuff used to keep population in apathy, worry, despair, hopelessness!

Center for gathering civic data from government computers where we are all registered for different "reasons". But, the main reason is total control over planet's population through their knowledge about us.

Not everybody in the governments is aware of this.

They give us LOTS of computer technology, as they then can get LOTS of data!

Composed of: 60 ET's trained in Public Relations and programming. Homo Sapiens trained as intermediaries, these go out and do business, contact people, while they are strictly monitored by the ET's, and some are ET's using our kind of bodies 195.

Elegant quarters to receive important people - Elegant ships for fast transport 12 -

Computers for population, industries and business.

An extremely well organized area.

Also in communication with drug dealers as they clearly can see their traffic. They like them as they destroy youth and weaken resistance.

The day they take over, these will be the first ones to be exterminated. They have, naturally, also data about who the big drug dealers are!

QUERETARO

Information received on 2/11/96.

Place: Area Amealco.

Purpose: Keep Population Depressed and Tired.

Their zone of action is Queretaro, Morelia, Northern part of the State of Mexico.

Keep an eye on the area, control radio stations. Keep frightening population appearing in different areas. Receive orders to handle specific persons and gather data about political or revolutionary movements.

A relatively small Base, as an outpost of a more important one.

Infiltrate areas to keep peasants angry.

Composed of: ET's 20 - Hybrids 18 - Homo Sapiens as prisoners, which come and go, they are abducted for data, or fast, "special" handling. Space for 60 people at a time.

Sophisticated machines for throwing gases at population and for fast implanting of the subjects abducted.

Ships 8 -

Place: Northern part of the State - Between Jalpan and Tamazunchale, naturally situated in the mountains.

Purpose: Gathering People for their Experiments.

Food Supply Base.

Also experiments with food to find the fastest way to produce what the Bases need.

They also use lots of animals for their organs and blood. A kind of "butcher" Base.

Composed of: ET's 15 - Hybrids 30 - Homo Sapiens as prisoners 300 - Animals, also captured 800, of different types.

Ships for these transports 9 -

Supplies are being fetched when needed.

Information received on 3/11/96.

Place: Southern part of the Sierra Gorda.

Purpose: Extraction of Minerals.

They make a blend with the ones from Andromeda, to repair their ships.

Isotope system used.

Composed of: ET's 20 - Hybrids 53 -

It is kept as a secret because they do not want us here on earth to produce these metals.

Ships bring and take materials, but no ships of their own.

HIDALGO

Information received on 8/11/96.

Place: Northern part of the State - Area Coacuilco.

Purpose: A Mechanical Base.

Monitoring the air space of: Cuba, Yucatan and southern part of Mexico.

Also guarding the communication system.

There is an "iron" hand on this country as Mexico is considered the key to Central and South America.

Basically, NO data that could help this part of the planet should be able to pass through their control system. All the new systems of communication are connected to their computer systems. World news.

Their job is to guard areas where Bases cannot for lack of mountains.

Composed of: ET's 71 - Hybrids 90 - 25 ships with very special equipment to connect with satellites as if any communication is coming from outside.

There are other ET's that are eager to help, but this being a restricted zone they try not to interfere.

There is a protection around the Base, anyone coming into that zone freezes, as an "ozone frost". Their ships can pass through, but our planes would "freeze".

In communication with Bases on the whole planet.

Place: South West of the State - Area Progreso-

Purpose: Political Base.

Mexico City, sending waves to keep people in apathy.

Abduction for political and economic purposes. Must keep all this mass of people in a state of worry.

They are very much on the watch that **nothing** efficient is done in this area

They have the means to clean the pollution but they are making it worse.

Some politicians come here and get instructions. If they obey they get help to keep their "Power". If they disobey they die in different ways.

Anyone that gets in contact with them gets a monitor in his body, unknown to him or her.

In this Base there are VIP areas, and all is presented in a very agreeable way.

Strong mental machines to influence people, made for crowds or for individuals.

They have total knowledge about the political situation in the zone.

Politically, the most important Base in this part of the world. They have all the citizen data computerized, Also a special computer for Economic and Political movements. They can easily decide the future of the country through this manipulation of politicians and masses.

Their whole power comes from this 100% hidden approach.

People think that these are their thoughts! Reason for no rebellion.

The **real** enemy is unseen, "invisible", but somehow perceived.

Main reason for so much confusion all over the planet. The **real** enemy is this way, never attacked!

People's attention is continually put on wrong target's, which give no solution to their problems. On top of this they continually work with a hell of a lot of miss information.

A great part of the catastrophes happening for the time being are planned by them, that is, different Bases make different programs. Central Base approves and sends out orders for their execution. Our politicians must take only a partial blame for the chaos we live in.

Composed of: ET's 150 - Hybrids 80 - Homo Sapiens as staff to contact the needed people inside and outside of the Base 70 -

Ships, elegant ones 3 - Fast moving ships for abduction 6 -

Long range ships for USA and South America 15 -

Refined computer systems separated in areas of interest.

A great amount as stock for sending on people, such as implanted beings that execute their orders.

Different specialized gasses, sent mostly at night (people wake up tired and depressed).

Place: Western part of the State - Metztitlan District -

Purpose: Organizational Base.

Organizing what is going to happen in the area most populated of Mexico. A very small Base. "The Heart of Mexico and Central America".

Very hard to approach even mentally!

All looks very quiet. All information gathers here.

Things can be seen on monitors. A huge amount of information is processed here.

Also a Base for the highest ranking officers. Here we have the Boss of this area.

As it has command over all other Bases, they need no ships. What they need is a perfect communication system with the "Bosses" all over the planet and with Andromeda's Central Base.

Here is decided which part of the population is not needed. Whom they have to be weary of. Who can be of use. How to do the different movements so as not to attract attention on them.

Doing what they can to keep all maneuvers "invisible".

People on earth have a terribly hard time understanding where all their wars, crisis, misery, diseases come from.

As long as the source of the problems is kept out of view, it cannot be solved.

Composed of: ET's as executives 80 - There is a strong mental power in this Base.

Hybrids 335 - They work as clerks as well as menial work.

Their most sophisticated equipment is in this kind of Bases.

MICHOACAN

Place: North West of the State - Area Maravatio de Ocampo -

Purpose: Getting Contact With The Population.

Seeing how their people are being accepted. They look just as ordinary Mexicans.

The ones sent out are rather robotized and monitored, but once they look "normal", they are the best carriers of information on all levels of society. (there is some truth in some of the Science Fiction films). Training and implanting of subjects they think fit for use. The ET's are used to a monitored society.

Here different kinds of monitor systems are tested. Implanting is much safer for them than hypnotism.

To start people off they like to use villages.

The trainees behave mostly rather quietly, not to draw attention on them.

School children in their teens are often taken. For this purpose small children are not used.

There is a school "system" and very hard study, not under the student's volition. They are put on drugs, so some of their reactions can become crazy. Part of their intention to pervert society.

Composed of: ET's 45 - Hybrids, the ones that look most as Mexicans because Latin's were used in this experiments, 60 -Homo Sapiens as teachers in order for the prisoners not to be too afraid
20 -

Space for 100 prisoners.

Ships all for human transport 20 -

Information received on 15/11/96.

Place: Sierra de Coalcoman - Area Coalcoman de Matamoros -

Purpose: Guarding The Pacific Coast.

Weather manipulation with special rays. They can increase or decrease rain.

A very technical Base.

Patrolling the Pacific Coast on whole Central America. Also helping out in Mexico City.

Composed of: ET's 15 - Hybrids 25 - Homo Sapiens, learning how to fly these machines (they think it's fun) 9 -

Ships 10 - Weather machines made in Andromeda, there to control the weather is a natural thing!.

Long range "missiles" to shoot down anything they wish. For them it is a kind of "Nintendo Game" (game boy). Mostly they shoot after receiving orders to do so, but sometimes, rare, just out of fun.

They can easily monitor or stop functions in our planes with their superior technology.

They are rather bored, so they love to have some action. To play a hidden game, as they do, can, in the long run be tiresome. Many would like to come out and be known, but are not allowed.

They also shoot down anyone approaching this planet. They can easily fly out in the stratosphere. This is the huge advantage of their special metals, fuel and technology. We are using far too much force to do this. NASA is a joke to keep us interested and happy about our "progress".

The **real** technology is not given to us.

These guys are restricting our communication with other planet's, and keeping us in a state of stupidity!

Many are tired of the game, but can't see a way out. They feel trapped here and left alone.

There are ships from other planet's **outside**, also patrolling in order to stop the supply flow of materials and soldiers coming in.

When they come in they come in via the Base on the back side of the moon.

ESTADO DE MEXICO

Place: Area Atlacomulco -

Purpose: To Protect Drug Traffic.

Distribution area for drugs. Drug experiments.

They know all the big drug cartels and their leaders. Want these people to have influence in politics, reason they protect them, but only until they take over. After that, they will be eliminated, as they are NOT part of their society.

Composed of: Sophisticated drug ware houses, made for easy and fast delivery.

Some of them are shipped with their ships to South America, Central America and USA.

ET's 125 - Hybrids 220 - Homo Sapiens to keep in communication with drug dealers (Big ones), even heads of governments are often involved, 35 -

People on drugs as experiments, place for 185 people.

They send them back into the society as druggists with the purpose to produce different drug disasters around in different places, but mostly where they produce the greatest effect such as in big cities in USA, Mexico and Central America.

Information received on 17/11/96.

Place: South of the State - Area Tejupilco de Hidalgo -

Purpose: Coordination of what is happening in the areas of Toluca, Mexico City, Puebla, Pachuca.

Information from the whole area. They want a tight control as there are so many people here. Basically very busy to ensure things do **not** get in order and in peace!

They know many details of life, and can therefore interfere where they think is most convenient for their purposes.

There is the usual training and preparing for action, all "robotistically" done, that is, no one goes out on mission without a monitor.

Naturally, people from the area are used, not 100% with their consent, although the idea of working for the ET's fascinates many.

None has the total scope of their work and purposes.

"Help" is often used to make their actions look good.

Composed of: A whole set of movies for mimicry, which means, the people they train learn to act exactly as needed. Could be just to learn how a specific person talks or how he acts. This way they can send people that will be accepted as their "own".

ET's 150 - Homo Sapiens as Staff 80 - Hybrids 65 -

Space for people in training 150 -

Usual Homo Sapiens weapons.

Lots of different clothing.

Some very elegant rooms, for the infiltrators to learn how to move in high society political circles.

In their attire, listening devices are set in as well as devices to make microfilms.

The ET's know more than the politicians do, and can therefore sell information as exchange for things they need from the society, such as abduction of people, killing animals, help with drugs etc. A very rotten exchange!

Extremely efficient machines to listen on phones, even to hear through walls, more sophisticated than we see in the movies.

7 ships on which many of these devices are installed (they are busy doing missions).

6 ships for human transport, for VIP's

5 ordinary ships for abduction and transport.

The nice rooms are also used for VIP's quarters. Fabulous computer systems for communication, for plain data and for programming. Also their programs must have the OK from Boss in Montana.

GUERRERO

Place: Sierra Madre del Sur - Area Sierra Campo Morado - Area Chilpancingo and Filo del Caballo.

Purpose: Witch Craft.

Superstition has to prevail. What makes witchcraft so mysterious is only the lack of knowledge of their different techniques. These they can learn and improve in this Base, although they do not give all the data they have, by far. Through these witches the ET's look good and powerful!

Really, why would they hide if they were so powerful?

Also different cults are trained here, and given help. They do not wish a unified religion.

In this Base the ET's really appear as good!, helping cults, etc. They teach healing with the use of energy, such as "pulling in energy from cosmos".

These witches after they are given training command great areas of population and keep the peasants under their control. Basically ignorance is what they want, so these cults and rites fit their basic purpose.

A rather small Base with many interesting devices.

They also work with "dreams" so that the trainee can use them to communicate to people. Basically manipulation of the minds.

Composed of: ET's 25 - Hybrids 30 - Homo Sapiens as staff, all having witchcraft as their main interest 40 -

Space for trainees 80 -

8 small ships -

Implant devices -

Laser gadgets to produce apparitions -

Special rooms where people can see extraordinary things, made with projectors. People, when in this room have been drugged through food. They believe they have been on a very special trip in outer space! This belief makes them feel powerful! In this area they make appearances.

They train also for Central America as this spreads easily where there is such poverty.

Trainees stay in a state of daze which makes them look as if they were in constant communication with some supreme beings, which they are, with the suppressors of the planet!

They abduct generally under the effect of drugs, so many believe that they have been taken outside of this planet. A whole miss information technique.

Trainees would swear that these guys are good! They earn good money afterwards as they are better than usual. They also work in cities, a very efficient way to infiltrate. They get into direct contact with politicians in these countries and have power and influence over them.

Information received on 23/11/96.

Place: Western part of the State, near the border to Michoacan North of La Union - Area El Limon -

Purpose: Guerrilla Training Base.

Training also for Central America.

Tests are made in areas of Guerrero and Michoacan. They are sent out, then brought back for further improvement.

Trained to become leaders, be followed and obeyed.

Here people LIKE what they are doing. Great emphasis is given to their ability to contact groups already in existence, and give them some "great new ideas".

They are allowed to say that they will provide weapons. There is plenty of it in the Base.

Composed of: 38 ET's specially trained in guerrilla warfare, with the purpose to keep these wars going on for years.

With this, economy will falter and chaos is created.

Hybrids 47 - Homo Sapiens comes and goes or dies.

They always work with specific groups, for this they abduct the people they need, kill the ones that seem useless for them, and keep on working with those that will be fully under their mental control. The trainees think that all is their own will. They are not at all afraid to die. Should this occur the being returns to "Base".

This is very much a mental warfare, reason so few can dominate so many!

5 ships for abduction and transport, here hybrids are of great help, they are well trained to do this job. The brightest ones are used here.

Space to work with 60 people at a time.

Place: East of the State, near border to Oaxaca - Tlapa de Comonfort -

Purpose: Genetic Experiments.

Interested in Hybrid production, also want to improve their own bodies, which in reality are rather weak. They are interested in recovering sex abilities which they have lost because they

have worked as a kind of robots for so long. ET's are all under a superior command, a very dull life, but they know nothing else! In reality they are interested in some change. They can see how we live! But, control over their acts is so big that they have forgotten to think by themselves. This is an important reason for so many genetic experiments.

As these are done all over the planet, results are compared from different races.

Composed of: A big laboratory equipment -

Food is also tested as their bodies and ours have different organs, and therefore feed in a different way.

Their way to cure is also different to ours. Rays are used, but not always laser. Their scan system is of a much greater precision. Even though many are killed, they do have the possibility to heal.

ET's 72 - Hybrids of their own production, of different ages 230 -

16 Homo Sapiens studying as scientists.

150 Homo Sapiens for experiments of different ages, but there is no interest in older people as this is a procreation area.

Only 4 ships.

PUEBLA

Information received on 24/11/96.

Place: South of the capital of the State - Area Izucar de Matamoros, mountains South East from this town.

Purpose: Business and Population Control Area .

Taxco, Cuernavaca, State of Mexico, Puebla. Again, this is the heart of the country as well as an important place for all countries south of it.

Interest in economy and international business. They like to keep Mexico as the key to the South, this gives them indirect power. Amazing, but they do know about the big businesses, big foreign investments.

They have an interest in some form of specialized medical machines as well as parts for their ships, Bases and computers. Also, naturally, they need certain supplies for their daily life.

All such contacts are made by straw men with firms where the merchandise is delivered. Later these goods are taken, mostly in trailers out to specific isolated and guarded areas, and taken to the Bases, as needed. They are interested in creating their industries. Food production also has their attention for two different reasons: their own needs and how to weaken population through chemicals in food.

Weak bodies means much less resistance to their plans.

People in the government have something to say about multinational contracts. Each part of the planet has specific things they need.

This Base is not only aimed at Mexico, but has a broader interest.

Toluca state plays an important part because of so much industry.

They also become powerful as money gives power and influence in the highest circles of the society.

They also have a hand in the abductions of big and wealthy business people all around the world. Terrorists groups are under their control, so chaos is also made in the highest circles, specially if someone does not do what they wish done! Again, this threat is not known to those people. Terrorist on their own would NEVER have such power.

Composed of: 200 ET's, mostly all with economic training -

95 Hybrids as clerks and menial workers -

45 Homo Sapiens with knowledge about business at the highest levels, internationally, and who have great expectations of the power they will achieve!

A kind of international Base.

No "guests" are allowed, but from here VERY WELL trained people go out and mingle in important meetings all over the world.

6 ships for these transports -

14 ships for area control -

Computers specialized in multinational firms as well as in government businesses.

They know what kind of hidden arrangements are done on a governmental level, this naturally includes Drug money, which is the biggest money movement in business, as they have control over the Drug Cartels. This way they have automatically also control over the Big Businesses around the world.

Shares will go up and down under their planning.

Information received on 12/12/96.

Place: Sierra Zapotitlan - West of Tehuacan - Area San Juan Ixcaquixtla.

Purpose: Political Base.

Mental training such as telepathy. Very hard to approach this Base mentally as there is mental energy stopping it.

Training on **hard** concentration, learning to "see" through walls. Only people with innate abilities are accepted as students.

Learning to transmit without need of any material device. Purpose of this is to be able to work in confidential areas without raising any suspicion. There are 10 of this kind of Bases around the planet.

If one is not using force, one is more powerful than the one that is depending on it, therefore I can slowly penetrate the area.

From here the most confidential programs are monitored. These people **only** use telepathy, but the staff from the Base get data through computers. They have ways to ensure the validity of the transmissions. If these people fail they are executed as they know too much. Otherwise they are top Intelligence Service. They are also the most tightly monitored of all the people working for the Greys.

They **must** train Homo Sapiens to go into the desired areas. They came as FUN, but there is no way to leave it now. Feels as "captured minds". Used mostly for destructive purposes. They wish they could leave!

Sad, as all abilities are used in a negative way. A well trained being can run the body of any person, but the greatest interest is in top politicians.

They have films taken of all the people they want to monitor. Implants are also used on their staff.

Here we have extremely able beings that would have liked to use their knowledge to help. They came in thinking this was a secret society that is using this kind of power to help. In this kind of traps our society is losing valuable citizens. The Greys are in continuous search for prospects, and these are often found in different esoteric groups, many of which are under their control.

Often the capture is via drugs. Mostly young people are taken, but they never appear again under their real name as they get a whole new set of documents.

If they contact their families or unwanted persons, something explodes in their brain.

Sometime the abducted persons are reported as dead so they can work 100% for their masters.

Composed of: ET's 15 - Hybrids as menial workers 25 -

Homo Sapiens 48 -

Usual implant machines -

Video Projectors Training areas are different places. Some go to another Base and transmit from there to achieve certainty of results.

5 ships for special missions and to deliver their trainees as professionals.

Very few, even ET's can perceive and transmit what these trainees can!

Information received on 13/12/96.

Place: Sierra Madre Oriental - Northern part of the State Area between Xicotepec de Juarez and Filomeno Mata -

Purpose: Communication System.

Checking satellites, radio systems etc.

A Central Base for sorting out all kind of communications, ours as well as theirs. Naturally there is a strong line to USA. Coordination system for whole South American area. Many programs are made with this information.

It is a huge work to control a planet's communication. They also have a sophisticated decoding system, naturally all computerized. They help the business, economical and political Bases, information being their most precious weapon.

They collect correct information and emit mostly lies or masked truth.

Wrong information is a big reason for planetary confusion. They keep us not knowing the main things we should know to function properly as a civilization.

Books are being checked, school materials in particular, but this specific job is not part of this Base.

To send out lots of miss-information one has to have the correct information! Specialized in South American misinformation, aimed at making it impossible to find out what they are doing as there is so **much** confusion in each country. As they keep us all looking at pure confusion, no one can do anything about it!

As you see, communication is their most powerful weapon.

WE ALL KNOW THAT SOMETHING IS WRONG, BUT WE DO NOT KNOW WHERE TO FIND IT.

Composed of: ET's 400 - Hybrids 87 - Homo Sapiens 100, needed for interpretations and for finding the right way to send the mis-information (has to have something to do with the people that receive it). Screens and computers, very refined ones to trace what they want.

No ships of their own.

TLAXCALA

Place: Area Zitlaltepec on the border with Puebla -

Purpose: Genetic Experiments.

As usual, huge suffering, experiments with diseases, also to see how certain food affect bodies.

They can easily get people from the nearby cities. In Mexico people often disappear without anyone even looking for them.

Also experiments with sex. The Greys are very interested in recovering this ability, reason for many of their experiments.

People trained to abduct people on the street's, taken into a car to a deserted area and picked up by their ships.

The way these subjects are treated is inhuman! Interested in young women for procreation. Many die under tests. Treatment similar to other genetic Bases, and as in all of them when a body dies, the spirit is trapped and used for their purposes, but this is not done in this Base.

Many doctors in this place, also their own, as they train on these bodies.

Exposure on the sun to check the effect of radiation. Not even the Greys want too much of it! But at least, they know how to control it. They can cause radiation death without using an atom bomb. A way to get rid of unwanted population without drawing attention on themselves.

Composed of: ET's 55 - Hybrids 150 -

Homo Sapiens as staff 80 -

Captured Homo Sapiens, mostly young people 526 at this moment -

Place for 700 -

Ships 10 -

Fetus in progress 7,560.

OAXACA

Place: South of the State - North of Puerto Angel - Area San Augustin Loxicha -

Purpose: Experiments with Indigenous.

Studying the different races. Testing intelligence. Their interest is in the most intelligent ones. Trying to figure out which genetic combination gives the best result. Producing a "new" human race!

These tests are done in different places on the planet. Really a scientific research, similar to research with cows.

Cultural backgrounds are also studied. A Big Human Laboratory. Looks like a very peaceful Base, nevertheless the purpose behind it is destruction of what is **NOT** needed by them.

The equivalent of **TOTAL** Population Control. There is suffering here too, as people, if they come back home are never the same, not really themselves any more and during tests if some die

no one cares. Rather similar to an animal laboratory. NO government is looking for these missing citizens!

Also tampering with DNA.

Which food makes the most fit bodies..? They want healthy bodies for their subjects. Food in form of pills is also tested. They get quite some "super bodies". This is naturally also run on computer programs.

Mental tests are also made in how they can achieve the most OBEDEIENT people. Their society is NON VIOLENT because it is **TOTALLY SUBDUED MENTALLY**.

Through thorough programs, very few are running the whole society, much worse than Mao did on China.

Composed of: ET's 400 - Hybrids, they produce their own and even send them to other Bases - They have them as staff 300 -

Homo Sapiens as staff 190 -

Place for prisoners they work with 1,000 -

Lots of doctors as Homo Sapiens. Medicine is also tested.

25 ships - Lots of supplies are needed. these are picked up in deserted areas where they are brought by different means, which also include our planes.

We are supplying most of their needs, and some people are making big business this way!

There are quite a few of us here on earth that **KNOW** about the existence of the Greys, but keep it as a secret for own advantage, more than because of fear. We are really permitting them to be here! So we will get what we deserve.

Greed can destroy it all. the ones who work for them will be the first ones to be destroyed when they come to power.

As you can see, no one is winning with this interchange because it is all done in a hidden way.

Information received on 18/12/1996.

Place: East of the Capital of the State, area Tlahuitoltepec.

Purpose: Patrolling the Caribbean area and gathering information about Central American States and Guerrilla and government movements in order to know when and where to interfere.

Composed of: Sophisticated communication system. Communicating with Bases in USA, via satellites over the Caribbean.

Satellite communication is VERY convenient for them, having an easy access to all communications such as TV, Internet, computers, radio, Phones, etc. Our "advanced" communication technology is easily controlled by them.

The ones with a superior technology, naturally win!

As their ships can stand still or move along any object, they can do whatever they want with the satellites.

Logically, they can also do whatever they want with our planes!

The ONLY thing which makes them superior to us is their advanced technology, and is the reason for so few playing "cat and mouse" with so many as we **ARE** !

ET's 150 - Hybrids 230 - Homo Sapiens trained in Latin American politics 180 - They need these people to understand what really is happening behind the scene.

Ships 25 -

Information received on 20/12/96.

Place: North from the capital of the State - Sierra Juarez Area Chiquihuitlan

Purpose: Military Base.

Terrorism and guerrilla warfare. For example the Chiapas movement "Zapatistas" is getting their support.

Guerrilla and sabotage training, naturally also for Guatemala and the rest of Central America. Sandinistas and all these groups that continue for years receive weapons and leader support as well as basic economic needs. Hard training, also in leadership.

Bodies are from each country, but often the beings running these bodies are very experienced in clandestine and anti-government warfare.

This way we have unstable countries all over the planet. This organization has a similar pattern everywhere. Possibly also on other planet's.

This is so well planned that one can assume that micro cosmos (our planet) and macro cosmos, the rest of the universe, have a hidden control mechanism which is not done solely with material power, but includes as an important part manipulation of spirits.

They work on the basis that time is not important as the being himself is immortal. Only that in the immortality this is a bad and sad game for all of us, the greys included. It can't be too enjoyable to be living and dying in these Bases! And on top of everything so far from home, Andromeda.

Composed of: ET's 250 - Hybrids 300 - Here the bright hybrids are used.

Homo Sapiens comes and goes. They train in groups that will later work together.

When one group is sent off, a new group is coming. This goes smoothly as their planning is excellent.

Space for 40 people at a time.

As usual, these people will carry a monitor, mostly unknown to them.

They also need conventional weapons, appropriate clothing for any mission and effective communication devices.

Ships 15 -

Devices to shoot rays on the affected areas. These make people feel even more miserable. This misery is needed in order to enable them to "come" and bring to us LAW & ORDER!

This is basically their **MASTER PLAN**.

Place: South of the State - Sierra de Miahuatlan - Area South of Magdalena Tequisistlan (near the Pacific Coast).

Purpose: Medical Training For Other Bases.

They wish to also improve their implanting system so that it cannot be detected through hypnosis or other mental techniques.

Erasure of memory is also of great importance to them. Tests are made with electricity, fluids and rays. Naturally also with drugs and "medicines" to achieve specific purposes. Some healing is also done, to be used as an entrance into our society.

These specialized doctors travel around and teach in different Bases all over the planet if necessary.

The tragedy is that they use human beings for their work with no consideration to their sufferings.

They have some advanced machines for measuring vibrations in the brain. The brain is what they are most interested in. Many zombies are going around because of their work. These doctors look as robots. The purpose seems to be that they wish machines to take over rational thinking. They are going for a robot society.

Composed of: ET's 400, but not stable as they are coming and going to other Bases. The experiments are compiled to extrapolate new ways of functioning.

Communication with Andromeda Base from where their techniques come. Their mind control technology is huge.

WHAT THEY FEAR THE MOST IS A FREE BEING.

17 ships rather small and very fast.

Hybrids 380 -

Homo Sapiens only as prisoners. Space for 200 of them. Their interest is in people from 25 to 55 years, of both sexes.

When their orders are not obeyed, pain ensues and if the course of behavior is not corrected, the subject is killed. This is the main purpose of their monitors. These "patients" can see no way out and are not aware of their real condition.

CHIAPAS

Information received on 5/2/97.

Place: South East from San Cristobal de las Casas, Cerro los Bolones Area -

Purpose: Data Processing Base.

Communication about the whole area of Yucatan, Tabasco State. For their purposes this population is not needed at all, just as the Negroes from Africa. They want them poor and ignorant. It is OK with lots of speeches, as help is not given. Here they can train people for this area and for Central America.

The leader for Central America is here. Programs are developed for the area. Peace is not part of their programs.

They want the area to live under USA government, which for the time being is in accord with them.

Here is all the data they need about Central politics and government. Data they consider convenient they pass on to the US government.

People trained to gather information.

The New World Order should be done through the US government, reason for backing up American international business.

Through the people trained on this Bases, Mexico, Central and South American governments are influenced.

Composed of: ET's 600 - Hybrids 500 - Homo Sapiens, some experts in different countries, 200 -

Ships are on another Base.

This Base looks as a busy office building.

Huge amount of data is processed here, but only the most important things are passed on.

300 staff traveling and gathering information, but none of them are free to leave as they are all strictly monitored.

Place: North West of Tuxtla Gutierrez, not far from Canyon del Sumidero -

Purpose: Supply for the other Bases in Chiapas.

Composed of: ET's 35 - Hybrids 58 -

Homo Sapiens needed for contact with the environment 15 -

Ships 7.

Food is processed here. They also provide for the much needed blood.

THE ARCTIC ZONE

DESCRIPTION AND LOCATION OF 10 ALIEN'S BASES

GREENLAND

Information received on 5/8/96.

Place: Area Cape Farvel

Purpose: Receive shipments from the Moon.

Distribution of what is arriving.

Airlines control system.

Use population from area for experiments. Beings yearning for help! Very hard life, used as slaves.

Composed of: ET's 20 and their commander - Aborigines 50 -

A continuous flow of ships, none stationary.

Receive help from wherever they need.

NORTH POLE

Purpose: A Regulator of Communication with other Bases

No people here.

Composed of: A machine made of a different metal than ours.

Refined computer system, usually placed on planet's of their interest.

A control system used by the Greys from Andromeda.

SOVIET UNION

Information received on 4/8/96

Place: Tundra - Peninsula of Kola

Purpose: Main Implant of Body & Mind Center.

Implant programs.

Sending orders for Europe, but can reach any place.

They will interfere when somebody does higher mental work or studies.

Composed of: High Technology mental equipment.

Medical team to research effectiveness of implanted parts in human and animal bodies. Control their effectiveness on long distance range. Each implant is naturally connected to their computers to have a check on their victim.

ET's 50 - Homo Sapiens 50 - Hybrids as helpers 110 - Capacity for 100 "patients" - Animals 550
-

There is a continuous flow of people and animals. Also a screen around this Base, not to reach it mentally.

5 Ships on which operations can be made, and change of beings -

A crew trained in telepathy, composed of both races.

There is already a "robot army" walking around the planet composed of about 5,000 people.

Production of waves on a mental level. This energy when sent make people tired and frightened. These waves get recharged on this Base (composed of Radiation, Crystals and Electricity) in their generator. Sending out infected animals in areas where they wish to spread new diseases. They also do it with some of the humans they send back.

To keep the planet in a state of terror.

Sexual experiments.

In order to easy their constructions, they use electricity instead of walls. Scientists captured can't leave!

Information received on 6/8/96.

Place: Island of Novoja Zemla

Purpose: Repairing of Ships.

Homo Sapiens are also taught how to do this as well as hybrids.

Composed of: ET's 65 - Homo Sapiens 45 - Hybrids 80 - Ships stationed 16.

Space to repair 40 ships.

Spare parts collected from ships that had accidents as our metal can't be used. Receive shipments from other planet's on this Galaxy, but the main components come from Andromeda.

Place: Siberia - Area Chatanga where the rivers Kotuja and Cheta meet.

Purpose: To Keep Russia in Turmoil.

Send waves over population to be able to keep them on the bare state of survival. Learn by way of implants many languages to be able to mix with leaders.

Their responsibility is control over Russia.

Composed of: ET's 66 - Homo Sapiens, trained to infiltrate 200 - Hybrids 65 - Ships 27 -

Special machines to place on ships to shoot waves which suppress people into despair, hopelessness and apathy.

Installations on Base to train people against their will, to execute their orders and plans. These persons look "normal" when moving around, but are under their total control. 150 Homo Sapiens doctors working on this project.

Printed books get checked through their computers, all Russian languages under control.

Check on all Russian known leaders.

They create Russian chaos.

They see China as a problem as there are far too many people to keep under control! If they should start moving they are prepared to stop them. This would result in a huge massacre. They intend to send diseases over to China to get rid of at least half of its population.

They want us to believe that it is an "Apocalypse, but in reality they are provoking it all in a hidden way. This plan is masterminded in Andromeda.

Information received on 9/8/96.

Place: Russia, just under the Arctic Circle, not far from the Strait of Bering Area Bay Cresta - Town Egveknót

Purpose: Handle Japan, The Eastern Coast of Asia such as Corea, China, Philippines, Borneo, Vietnam, Malaysia, Indonesia, Sulawesi, New Guinea, etc. Works together with Base in South Australia.

They interfere with the weather, provoke catastrophes.

Checking on communications with other people from other planet's, these they do what they can to make them fail.

Keep US influence away from Asia.

Composed of: ET's 416 - Homo Sapiens, mainly Asiatic 800 - Hybrids 200 - Ships 47, of which 15 are big.

Training in politics, knowledge of customs from the different regions. People are brought back and forth.

Naturally, Asiatic infiltrators are used as government advisors. Basic program is to keep population at the lowest possible intelligence level and biggest possible misery. Investigations in how to decrease population.

This Base is as big as a small town. Here Hybrids are a mixture of aliens and Asiatic.

Busiest Base on the planet. Lots of time and effort is used in learning languages. Same implant techniques used as in other Bases.

A very complete and self sufficient Base. Collecting human "seeds" to make one Asiatic race. (Experiments).

There is very little attention on this place, but it is a hard working Base.

All Bases are connected by communication systems, their own Internet, and thus supply each other with what they need. When they work with Homo Sapiens they often make him believe that he has been on another planet.

Some of their ships are very big to be able to bring in their food supply as well as the necessary equipment's.

ALASKA

Information received on 18/2/97.

Place: Brooks Range, Central Part, Latitude approximately 148 degrees Area Philip Smith Mountains & Horace Mountain.

Purpose: To Eradicate the Resistance of People on this Planet.

Through atmospheric movements they connect with Antarctic Base.

Only the toughest people are supposed to survive. As they want this planet for themselves, they do not wish its total ruin.

Ozone holes they can manipulate with, but they do not have control over earthquakes.

Composed of: ET's 30 - Hybrids 55 - Homo Sapiens as captured as scientists 32 - They always need us to gather information as well as to bring supplies.

In this area big Space Ships can land totally undetected.

27 ships for cargo distribution. They handle the traffic both ways; bring into the planet what comes from outside, and deliver what should be taken away from here. They like to take some people too, never older than 35 years, women has their preference. Males only very special ones in their genetic viewpoint.

Weather regulator machines, unseen by us. Also there is the biggest energy generator, for their use, on the planet.

From here the rays that can interfere with our atmosphere emanate. Through their information net, they are oriented about all atmospheric conditions on the globe. Many new technology wonders they gave us for their own advantage.

Through our computers we process data for them.

The landing place is not even hidden, can be spotted with our machines, only that the area is very guarded, mostly its space. When something is detected it is shot down.

Exchange of personnel. Greys come and leave after their duty here is ended. They are VERY HAPPY TO LEAVE!

This Base is only a transit area.

They have some 500 frozen reserve bodies for the Greys. When a Grey body dies, he needs a replacement which is not easy to get here. Some Greys get cheated and do not really depart!

Information received on 22/2/97.

Place: Brooks Range - Area Schwatka Mountains - Connection with the town Ambler.

Purpose: Genetic Works.

As usual there is huge suffering.

Studying our race's organs. They want some of our organs bodies because they give more and better sensation in sex and eating.

Their bodies are of flesh but very robotic. In their society there is no great deal if one loses a body. They are brought up to be what the State needs, there is no power of choice, which makes a robot society.

Preparing a new race! Possibly some are walking around in Ambler as it is a very isolated area and there is peace for their experiments. Many missing children and babies end up here as this is what is most needed.

Composed of: ET's 400 - which makes it a very important Base in its genetic work.

Hybrids only of own production. If experiment fails, body gets killed.

165 Homo Sapiens as scientists.

Space for 1,000 people to use in their experiments.

Tests are made with different races.

Young women are much needed. Insemination is done on them.

Their medical instruments are far ahead from ours.

A school area to test intelligence.

Quite a few are walking around in Alaska. With that climate, bodies that survive are tough.

Quite an old Base.

No ships. There is another Base for supplies **under** the Arctic Circle.

CANADA

Place: British mountains on the border to Alaska - Area Mount Greenough.

Purpose: Industrial Base.

Supplying the planet's bases with machinery.

Making and receiving parts for their ships.

There is a huge big space for their ships to land. Many come from the moon as it is a relay point.

Some come directly from outer space.

Base has two parts; parts for ships, the other one for refined machines such as medical and spying devices. Therefore different technicians are used.

Broken parts are brought here where they are repaired or modernized.

Their handling of machines is different than ours, as if those machines are more part of themselves, which makes their understanding of the machine's problems much easier to spot. This Base would be a delight for any of our engineers. Amazing, but this is a very peaceful Base, they work here as they are used at home.

First time I see them as peaceful beings. Obviously it all depends on what kind of jobs they are commanded to do.

Composed of: ET's 450 - Hybrids trained as technicians 550 - No ships of their own as they receive those for repair and if needed use them. They must also make tests to see that they function properly.

Information received on 23/2/97.

Place: Richardson Mountains - Area Mount Hare.

Purpose: News Control System.

Interested in data told about them. Confusion is OK. They love miss information. They want us to use Satellites, Internet & Computers in order to have an easy access to the planet's information. It just has expanded faster than they thought and some is getting out of hand for them.

Also they send things at their convenience.

Now they are a bit confused, things do not run exactly as they have planned.

Seems as if some of us, Homo Sapiens, are waking up.

Masses they have no real problem with, but there are INDIVIDUALS making things known. In this Computer age data is been spread with a speed no one has expected. All their misinformation is not able to draw the right data. Their disadvantage is to work only with long term programs and are not used to make fast changes of their plans. Even they get overwhelmed with the amount of information they have to go through. They have their own satellites in order to have a world wide information available.

Composed of: ET's 200 - Hybrids trained as robots to check on their machines 110 -

Hybrids for menial work 65 -

55 Homo Sapiens, needed for language problems. Once they are there, they cannot leave again.

Most amazing machines, but mostly SMALL

Getting lots of things through rays.

Can even have devices outside as the area is deserted.

For them it is a natural thing to control everything as they consider themselves the rulers even though they are hidden leaders.

Used to control this way throughout the Physical Universe.

Ships they do not need.

This shows the organization system, each Base has exactly what it needs.

ICELAND

Just under the Arctic Cycle

Information received on 3/3/97.

Place: Jokulsaarglifur National Park.

Purpose: Patrolling Base.

Suppression of the whole area of Iceland. These very strong people are kept busy with old saga.

A place where the Aliens intend to make themselves stronger.

Also to keep an eye on Northern Europe.

Composed of: ET's 49 - Hybrids 78 - Homo Sapiens, happy to learn how to navigate these ships
55 -

18 Ships.

They do missions for the Arctic Zone.

Spying devices on planes, this being a rather deserted area. Their job is to check if anything unusual is occurring.

Want to be sure that no other Aliens come down here.

Tight control on the northern population as these are the toughest on the planet.

Reason why Scandinavians are kept under tight Taxes and Computer Control.

Because population is relatively scarce and lots of mountain areas, they do not wish to have any surprises there.

Great if drugs are implemented together with alcohol. Free people is what they fear the most. So, everyone should be in dread, then they feel safe!

Northern part of Europe is a great place to have command over this populated continent. Therefore these Bases are important for the development of our civilization, being Europe the biggest power after USA.

Plan , Europe must be suppressed or kept down, reason for so many unnecessary wars in the vicinity.

They wish the destruction of the strong European nucleus. Naturally the European Parliament is well infiltrated.

Terrorist attacks are a "must". People who are rather well educated have to be kept in uncertainty, unemployment, drugs and great worries about diseases.

Most of the plans are made and executed from the Arctic Bases. Here they find a relatively safe place to operate from.

Information received on 4/3/97.

Place: In the center of the Island.

Purpose: Their own emancipation.

Study of integration into the present civilization, that is, handling situations in order to be accepted.

We should fear, respect and **need** them to bring order into our society, reason for creating grater and greater disorder every day.

Composed of: ET's 100 - Hybrids 86 - Homo Sapiens 150, to train them into a relationship with us.

Devices to teach them how to communicate in our languages.

English is mostly used, as there should prevail a common mean of communication throughout the planet.

English will be a must for political leaders.

A Center for analyzing the situation on the planet, to be able to achieve a ONE WORLD ORDER.

They find **where** to start quarrels and wars, mostly among neighbors.

Their job is only to analyze. Other Bases train people to make riots, wars, etc.

Uneasiness is propagated all over the planet. The only peace allowed is the one they are preparing themselves to impose on us.

This will be a military-police "peace", where the rulers will be the Greys, officially!

Ships 10 -

Machines to process the news they receive constantly, NOT from our perverted radio and television, but from their own sources. (Our media is only of interest in so far of stopping any **valid** information about themselves and their purposes).

The entrance to this Base is not far from a volcanic crater.

They work day and night to manipulate us, which is their main purpose.

Fabulous data processors.

Europe is their main interest, but it will always be interrelated with the rest of the planet.

Russia should be kept poor and in turmoil, only way to keep them down.

Europe & Russia is a far too strong potential against USA which is "their nation".

People are infiltrated into Europe & Russia to make deals with USA.

USA has to shine (a smiling Clinton) to get the goodwill of the "poor" nations.

The whole press is geared with messages of hopelessness in handling so many catastrophes, famine, wars, terrible virus...all provoked by our "friends", the Greys with programs already tested from Andromeda.

This is general data, does not apply only to this Base.

To degrade people it is meticulously planned that they cannot find work, Whereas there is **so much to do in all directions to improve living conditions for millions of people**. People with no work, no income, feel impotent and give no real resistance to any change. They think that ANYTHING will be better than what they have. This can become a **deadly trap**.

NORWAY

Information received on 20/3/97.

Place: Finmark - Area Rastegai'sa.

Purpose: Atomic Energy research.

Working on an alternative for oil, something much cleaner when waste problems are handled.

Their atom fission is different. Naturally that they also need the energy for themselves.

The work done here is kept secret, so it is not known to us, but it is done with **no** pollution.

Composed of: 20 ET's, all technicians, trained in the handling of Energy. Working here alone.

10 Hybrids to do the menial work.

This area is dangerous for bodies. All work in special protective suits.

No ships, but a place where they can land.

There is a screen against telepathic approach made of heavy energy beams which get activated as soon as someone tries to "look" into the area.

Experiments are also made in how to paralyze people with these beams.

Remember please that they are few and we are **many**.

They know that we are afraid of ENERGY. With these beams bodies can "freeze" in whatever position they are in, but if kept for too long they die because the blood flow will eventually stop.

They need this device for a rapid take over period.

Prisoners are used to experiment with. They cannot let them go away because their secret would then be known.

These waves on a different wavelength can even "freeze" thought. This means that they can slow down people's reaction time.

When aimed at a specific person, it provokes heart attack.

People submitted to some of these rays tend to commit suicide.

Much of the NEGATIVE way of thinking we all experience in these modern times, stem from these waves in the atmosphere.

Scientists are working day and night on this project.

This being a "usual" weapon to subdue people on different planets.

People waking up tired, after a normal nights sleep, have been hit by these rays.

As they are shooting them all over the planet, not all places get them at the same time.

Naturally that the most populated areas are the ones that receive the majority of the dawn fall.

This energy is contrary to a body's own energy, so the cells, instead of having peace to do their repair work during sleep, are busy fighting a strange intruder.

A protective mental shield can be created by the people, and these rays will then hit back at the ones sending them.

Place: Troms, North of Ovre Dividal Nasjonal Park, on the mountain bordering with Sweden, between the rivers Lainbalven and Korkamaalven.

Purpose: Training Aliens in this planet's affairs.

Producing new bosses to relieve the old ones in places of necessity .These Aliens are highly intelligent and have been trained in Andromeda to be able to keep a planet under their control.

Most planetary Bases have a communication line with this rather "insignificant" Base so they know here what is going on all over their organization. They are able to spot if anyone is sending false information, or not sending what they should.

We by now know that this Base system is a very organized and CONTROLLED business. As all their manipulations are hidden, they are not accustomed of having anyone interfere with their plans and work neither physically or mentally.

To control a planet, one has to have control over its leaders, so the main attention is on LEADERS, I would say, of any sort. Here one can see a reason for not having decent and able leaders. This is not allowed by this Organization. One can deduce that we cannot see them because of all the fighting going on continually. These battles are mostly provoked by them.

Composed of: ET's 150 - Hybrids 400, here they also do information gathering work. All are highly trained in computers.

No Homo Sapiens has ever been here.

5 Ships, small but very fast.

The Greys come in on big Ships, but these land elsewhere.

Developed a high intelligence service.

They have data about every political leader. If needed black mail is used to make them obey their orders, which mostly do not come directly from them.

There is a whole web behind the planets political scene.

Their interest is also in EDUCATION. The program is lots of hard study with very little effectiveness Bright young people can become less brilliant through these programs. As a result earth is becoming a place of "sheep", rather easy to manipulate.

Information received on 30/3/97.

Place: Nordland, on the border to Sweden - Area Ballangen & Storsteinsfjellet.

Purpose: Europe's abduction Center.

Here they make people believe that they are on another planet. Many become spiritual leaders, very convinced about the existence of a better place somewhere else!

As anyone abducted has a monitor implanted in his body, these people can be directed as well as traced from different Bases which have this program on their lines.

The "teaching" on this Base is different from Mexican witchcraft instructions as it is aimed at European and Anglo-Saxon population.

People which they bring here are mostly young, with a good presence as well as background and education. This is aimed at a fairly educated part of the society.

An important part of their indoctrination is that the Aliens are GOOD.

The purpose being not to have earth citizens against themselves.

They cannot subdue us all if we are not mentally enslaved, but most of us are through the manipulation of the communication media, which includes the press and books.

Anything which will confuse people is allowed.

This is a kind of paradises base with a lot of aesthetic. A "safe" and quiet environment. Many things are very similar to our different religions. They are prepared to indoctrinate any kind of religious trend.

Composed of: 100 ET's who always use an appropriate disguise.

120 Hybrids, very busy preparing different scenes.

70 Homo Sapiens, all spiritual leaders, to give them information about their work, ways to worship, etc. Even though they are prisoners, they are very well treated and are allowed to stay in communication with their most important followers through sophisticated communication media.

The place is well provided with different attires.

People sent back are **very** convinced about their mission

The Aliens know about the power of the spirit and want to have the most able people under their control.

10 Ships

Films are produced which the "missionaries" can show to convince their followers. These are superbly made with high technology.

All those who came back believe truly in this paradise. Their "knowledge gets confirmed with new data provided by the monitors, and followers see them as VERY clever persons.

Once people are caught in this , they are used for the Alien's purposes. So, when one of these bodies die, the spirit is given instructions (implants) to break any spiritual group not fully under their control.

SWEDEN

Place: Norbottens Län - West from Kiruna - Area Kebnekaise and Rensjön.

Purpose: Political Base.

Controlling Northern Europe which includes Scandinavia, Germany, Poland, Lithuania, Estonia, Latvia and that part of Russia up to Moscow.

In the political game they want the US to be the leading nation, therefore they try to make things difficult for Europe to make them loose strength. Situations are created so that Europe often "has to" ask the Americans for help.

To keep Russia in turmoil is rather easy.

More sophisticated means are needed for the European countries.

Here the main purpose is to know what is happening politically and economically, interfere as much as they can, to be able to control their currencies and help the USA prosper.

Things are done a bit more carefully, but using the usual treason system. Politicians can also be bought here, but in a more subtle way. They have to be more careful NOT to get able and decent people as top leaders.

If an able person comes to the top, he - she will be attacked with slander in order to lose prestige. Then he- she will lose popularity and power.

The other possibility is that such a person gets sick or ends with a heart attack.

Not all heart attacks are caused by stress or high cholesterol.

We are made to worry about certain diseases, most of which are provoked by them. The purpose behind this is to convince people that the best thing to do is as little as possible. The idea being: **the less I move the less danger I get into.**

A hidden way to subdue persons that may think about interfering in their game.

Composed of: 45 ET's experts in political manipulation.

90 Hybrids, mostly as clerks to work with computers and compiling data.

78 Homo Sapiens with good knowledge about the different regions, and their languages.

Ships for transport, as well as for inspection, 5 of each. These Ship's activities can be interchanged.

Naturally there is the usual sophisticated spying system as well as the interchange of data between the different regions and Bases.

Information received 1/4/97

Place: Norbottens Län - Abisko Nat. Park - About 50 km. from the border to Norway.

Purpose: Helping The Other Bases With The Interchange Of Whatever Is Needed. For example, abductions go first here and then get transported to the proper Bases. This makes the tracing of the route more difficult.

Intelligence Service also goes out from here. An Execution Base where no programs are made.

Ships sending "rays" also start from here.

Whenever we observe something, as all cannot be completely hidden, we come to the wrong conclusions.

From this place one can see quite some movements.

All the North European Bases have protective screens against physical and mental approach.

Animals in the area used for their blood supply, and the meat is being used for Homo Sapiens.

In these mountains training is being done. Spies and infiltrators must also be physically fit. Hunting is part of their training, as well as shooting.

Great activity is going on here. They are there as a "crown" over Europe.

People in the European countries believe much less in their existence, which is a great protection for their work.

To have an European Parliament that makes decisions over Europe helps them in their manipulations. The ONLY thing they need is to have **their people** as leaders of this institution and get fast rid of any person who is aware enough to see behind the facade.

In this area all looks so peaceful, but this "peacefulness" is causing disasters all around as they are poisoning our society.

Some people know about all this, and they permit them to continue as it all seems so interesting, and sometimes helpful with certain new technologies.

But, they are playing cat and mouse with all of us! The importance of this data is that here is great part of the reason Europe has difficulties in many aspects.

PEACE AND STABILITY IS NOT PERMITTED.

Their task is to find a way of causing big problems. As soon as they are about being solved, find a totally different area and start some new ones. As they keep us repairing all these damages, we have no time nor energy to create new and better things to make our lives to PROSPER!

As all Bases work on the same goal, we are kept down without finding the reason for it.

Composed of: 175 ET'S - Here we have the most able Hybrids on the planet as they can execute about any orders . 300 of them. There are so many in this place as they do the abductions. They are able, fast and **very** obedient (implanted). Homo Sapiens is not needed here.

25 Ships with many different equipment.

Place: Norbottens Län - Area Kvilskjokk - About 100 Km. from the border to Norway.

Purpose: Political Base.

Planning and preparing speeches for leaders. Naturally, there is great interest in the German and Russian leaders as these two powers could become the leading force on the planet. To avoid this, Russia and the Eastern countries should be kept on a low survival level.

As this Base is only concerned with the top European politicians it is rather small in size.

Some times "strange" things can happen to this able people, such as the need for an operation. This is the most secret manipulation, as during the period of unconsciousness some things CAN be performed on them, of which they will not remember anything, and later some treaties and alliances will be made. These will be of help for the Grey's plans.

From this Base they also try to manipulate the Top Leader's Meetings.

The sad thing is that our lives depend on the decisions our politicians make, and their lives are tightly monitored by our enemies which are mostly hidden, or appear as great friends, counselors and "real" helpers.

It is HARD to remain sane under so much manipulation as they work 24 hours a day behind the scene.

Here are screens on which they can follow the lives of the ones they are interested in. Thoughts can also be projected.

For getting the information required, spies, as well as very sophisticated technologies are used. Not all what we see on films and TV is a lie!

But, their REAL POWER consists in staying hidden from our view.

Once **we do wake up**, the fight among us will end. We could, may be, restore our planet to something beautiful, instead of the misery we have on the greatest part of earth.

Right now in Africa all is getting destroyed. At the same time Europe should get involved, and if possible, bleed their economy too!

It is correct to help, but it is URGENT to find out what and WHO is provoking all these fights between neighbors.

When we do a thorough investigation into each situation, we will be able to avoid all this unnecessary blood shed.

Things are somehow hidden, but far less than we believe. The reason we cannot see what is going on is because our attention is continually directed to the things these Aliens wish us to see, worry about and fight. With the total press manipulation we do not know where to look to be able to act in a way that our civilization could start to prosper, and people could live decent lives again.

Even our **youth** have lost their fun in life, as well as their positive goals, so death and destruction has become their aim.

Composed of: ET's 40 - Hybrids 35 - No Homo Sapiens - No Ships of their own.

If any Homo Sapiens would come here, it would be in a drugged state, and will not be able to remember anything about it.

They are experts in mental surgery. A politician may end up in a hospital for an "innocent" operation and be under undue influence during that period.

Another easy way to do this is while a person is asleep.

Basically what we see here is INTERFERENCE WITH THE MIND.

As people have NO data about all this, they have no chance of doing something about it.

WHAT ONE KNOWS, ONE CAN HANDLE!

FINLAND

Information received on 2/4/97.

Place: Utsjoki, practically on the Border to Norway - Finmark -

Purpose: Scientific Base.

Genetic experiments. Searching for a prototype that can be sent into the European society. Most important is to make them think as Greys, and take their side in any conflict or discussion. They try to bring up "natural" spies.

It is done through insemination, using abducted young women. Here scientific investigations are made to find the right men to be used. (Reminds me of Hitler's work).

Later a mass production will be made of the types they like the most.

Here the children grow up and are educated as well as indoctrinated to achieve the expected prototype.

THIS RESEARCH IS RATHER OLD, SO SUCH PEOPLE ARE ALREADY PART OF OUR SOCIETY!

Naturally, the day they overtly take over our planet, these people will have the top positions, and anyone disagreeing will simply disappear.

The program in use is old, it has been going on for more than 50 years. They have an enormous amount of things already aligned.

The take over procedure is rigorously planned in order not to have any failure.

Somehow time is no problem for them, they go for TOTAL CONTROL as their goal. They also feel rather confident to achieve it when they see the rapid decay of our civilization. Please remember that when things go into misery, chaos and hopelessness, SOMEBODY IS PUSHING THE TREND IN THAT DIRECTION!

It is definitely not a natural thing to have no goals, no hope and no fun. The sad part of all this is that we came to believe that "this is the way of life". NO, this is the road of cynically planned SUPPRESSION.

Composed of: 40 ET's, all doctors, experts in any kind of bodies. Bodies are far less important for them than for us.

300 Hybrids as staff.

150 Homo Sapiens as "patients" to deliver the children.

Studies are done with videos and machines. This way no strange ideas are given to the students.

500 prototype people in training, here all ages are included, also the newly born.

20 rather heavy Ships for all their needs.

THE MOON

INTRODUCTION

After receiving so many messages about the different Bases on Earth, one appeared "from above".

This simply means that to be able to coordinate all their activities on this planet, the best way Et's can do it, is from a distance.

For this Mars is ideal, as it is very near us. Suddenly it seemed clear that to promote the U.S as their One World Government, Europe had to be reduced in its power.

The tactics in use at this moment are to strengthen the U.S economy to attract the third world nations to them, and squeeze Europe through this on the one side, and the huge inundation on the other.

Europe being their only competition for the time being is getting its share of problems. Mars, as well as the Moon are ideal because of their vicinity and our inability too move with adequate Space Ships ourselves.

As I started with the title of **FACTS OR FICTION**, again it is up to each of you to decide and act according to your viewpoints.

Regards, a FRIEND!

BASES ON THE MOON

DESCRIPTION AND LOCATION OF 5 ALIEN's BASES

BASE "NUMBER 1"

Information received 13/8/1997.

Place: Just around the LEFT side seen from Earth, there is still some light there.

Here again Bases are linked together. No need of any underground passage, as they can move freely, without any need of hiding.

Not necessarily # 1 in importance, but this is the way I found them.

Purpose: To Receive Space Ships of Different Kinds. This means that from here they also take off. Here Ships get prepared for longer trips, same as in our international airports.

They can land easily, so big Ships prefer to come here to load or unload, then from this place down to Earth. A rather big area is in use with storage space included.

No need to go under for protection because there is not much danger from the elements. Some of "our" people know about this place, but are naturally, not allowed to speak about it freely. Just "round the corner" there is a good view of our Planet and all what is surrounding it. From a distance, manipulation is easier.

They have some powerful equipment which can be installed on their Ships. They build things in such a way that most of their Ships can be installed with different machines.

Their technology in machines is fascinating.

Surrounding this Base there is vegetation, half covered. Drop irrigation is used. Water can be found around 500 meters under the surface.

Everything looks peaceful here as they are not afraid of being seen. Adjoining is a space for training on the different missions they are supposed to execute.

Many of the Mars made programs get trained on here as distance to *target* is shortened. People sent to Andromeda also get prepared here in different ways. Many bodies are being made ready for the freezing period used under longer transport.

There is another space for living quarters. These are much more comfortable than underground Bases. The Greys are not too happy when they must do their "military service" on our Planet. All are being sent on a military mission for a certain period of time.

Composed of: Staff stationed here: 199 ET's - 500 Hybrids - 17 ships needed for their own administration.

BASE "NUMBER 2"

Information received 14/8/1997.

Place: Same area.

Purpose: ARMY EXCHANGE.

The ones that leave debrief for the new ones to get grooved in. Erasure of memory takes place after debrief. These missions are secret even for the Greys going back to Andromeda.

The new ones get grooved in with the help of implants, that is, data is installed under unconsciousness.

This state is achieved through the use of special drugs, as standard operation on missions. This is the reason why they work so robotically.

Here some of Homo Sapiens is also being manipulated in such a way that they do not even know about this visit to the Moon. Possibly there will be a person reading this information who will start to remember something.

Please be aware that this might be followed by pains or disagreeable feelings such as dizziness, wish to vomit, shout, etc. But, when through the experience, they will feel less crazy!

Obviously to be brought up here, the abducted must have quite an importance for their take over game. Here lots of movements can be seen, but there also are spies listening to "confidential" talks.

These are well trained in getting the information which did no appear during the debrief. The ones considered traitors get shot, and as knocked out beings, used to suppress others.

We could call it "higher level Witchcraft".

Naturally all is being recorded and double checked. They are afraid of leaks.

A VERY busy place. Looks confusing, being in reality tightly controlled.

Composed of: Staff for the management of this Base. 300 ET's as doctors, specialists in debrief, trainers, spies, all highly indoctrinated themselves. 400 Hybrids for menial work. About 40 Homo Sapiens for interpretation of abducts. Also used to make them believe they are "at home", such as being in a hospital, in an office, etc. Ships are in the other Base.

Here fast Ships are needed for the abduction business. The reason for taking some to this place is that none of Earth Bases know about these special projects.

This is also one of the reasons no one can easily put the whole set up together. Special medicines for keeping bodies in the state needed for different purposes.

Their manipulation of bodies is far more advanced and sophisticated than ours. Homo Sapiens working here are full effect of these techniques!

Everyone seems free to go and do whatever he wants, while , in reality, they are all prisoners in different degrees. Real *freedom* is non existing, it is all a false appearance!

BASE "NUMBER 3"

Place: Same Area.

Purpose: Recreation Area.

There are many people here, and the surroundings do look rather sad, so spaces have been created for different activities such as sports, movies, paths for walking, which at the same time link the different Bases.

Composed of: "Breathing " equipment for oxygen - Machines for entertainment - Comfortable sitting spaces - Areas for sleeping - Swimming Pool - Small Stadium for contests - Machines for keeping it all in shape -

Personnel in charge: ET's 30, as managers - 150 Hybrids for keeping the area.

BASE "NUMBER 4"

Place: Same, but further away. Considered RESTRICTED AREA.

Purpose: Special Coordination Centre.

Handling of "delicate" situations and important individuals.

The area is rather small.

They only work on very special missions or people.

High Security. Not all operations are aimed at Earth. As things have to be coordinated, this is an important link.

Main Base on the Moon, and the smallest one.

What is amazing is to see how careful they are not to be seen, when they live in such an isolated area. This makes me think that there are beings from other planets who are aware of their movements.

If a Homo Sapiens would ever come into this place, he would never leave it alive.

From here communication lines go out to Earth, Mars, Space Ships in different locations, Bases on other Planets as well as to Andromeda.

A high reach in a small space!

Work is being done continuously.

Anyone that makes a mistake here probably will be the cause of his death.

Composed of: Special Metal through which cosmic rays cannot penetrate. Reminds me of a Space Ship, but this is on the ground.

100 ET's, all trained in Andromeda.

130 Hybrids, highly specialised and bright.

All their computers are very small. If there is something they want to look at it gets enlarged. Transmitters are also in mini size, but their power is hard to grasp when compared to our "satellites" which seem grotesque in comparison.

To produce electricity, there is no need for our huge and expensive reactors.

"BASE NUMBER 5"

Place: Same Area.

Purpose: Energy Supply.

Work shop for repair of mechanical equipment.

Only ET's work here, Homo Sapiens should *not* learn these skills.

Composed of: 70 ET's as engineers - 110 Hybrids, also very skilled.

Most tools are electromagnetic. Laser beams are also in use.

A real pity that they are not here on a friendly mission. We could learn a **lot** about energy from them!

This not being a restricted area, the path made to come here is used for walking. There is no danger of radiation.

Homo Sapiens may look at things, but is not taught in how to use all these tools, or on how to produce energy in a thousand times simpler way than on Earth.

THE REAL SOURCE OF WORLD TERRORISM

3/10/01

Do you really think that the Taliban area in Afghanistan is the Basis of the whole terrorist network?

It is OK to get a better government in Afghanistan, but what has this to do with eradicating TERRORISM?

Does it not seem too **obvious** that all goes in one direction; Bin Laden and the Taliban?

Why not look a bit around, for example to Saudi Arabia, a huge country? There they have training camps in Al Bi'r and Hagl, center for the Middle East as it is placed near the border with Jordan.

Lets look **WHO IS BEHIND IT ALL.**

When searching we find again our “**16**” and their Alien Bases.

Here you can see the MAIN Bases concerning **WORLD TERRORISM**, located in **Saudi Arabia.**

SAUDI ARABIA

DESCRIPTION AND LOCATION OF 2 ALIEN's BASES

Place: ‘Province’ Midyan – Mountain Jabal al Lawz – 29 degrees Latitude – 35 degrees Longitude.

Purpose: HEADQUARTERS FOR WORLD TERRORISM
Intelligence Center

Data gathered often by the “**16**”.(see our document about them)

Works also with guerrilla groups.

Computer and organizing work.

Sees that guerrilla and terrorist get trained and supplies their needs. There are hundreds of hidden bank accounts as we can see in the “**16**”s organization. All done by terrestrials.

Composed of:

4 very fast Space Ships

A sophisticated computer net.

7 ET Computer experts.

15 terrestrials computer experts

5 ET plan organizers

10 of our own, knowledgeable in many languages. Also, computers are instantaneous translators.

They know where all main training camps are located as well as their leaders.

This Base is the execution of the BRAIN for World Terrorism.

Links to other Bases.

Connection to Mars via Moon.

Place: North of Medina – ‘Province’ Al Hijaz – Area AL ‘Ula – 26.8 degrees Latitude – 38 degrees Longitude –

Purpose: THE BRAIN FOR WORLD TERRORISM.

A small luxurious Base.

They find out WHO is fit for what area.

Composed of: 20 ETs, high strategy officials and 20 of our own Political Experts. They are in reality hostages under false pretense as they expect high positions in the New World Order.

There is a VIP area where high ranking terrorist supporters meet.

Basic Plans are forged here and they screen the CORRECT people. There are terrorist leaders all over the planet and these are their key operators.

Their purpose is World Chaos, frightened citizens, and disasters. Attention on Terrorism while other objectives can be achieved with no public attention.

Be aware of *NEW LAWS* in regard of decent citizen’s *FREEDOM*.

They have no Space Ships of their own.

There are about 15 Hybrids for menial work.

DIRECT MARS CONNECTION!

As far as I can see, there are 3 more Bases in Saudi Arabia, but possibly they have nothing to do with World Terrorism. Anyhow, I will shortly give it a look.

UNITED STATES OF AMERICA

DESCRIPTION AND LOCATION OF 35 ALIEN'S BASES

NEVADA

Place: Kendrick Pk., Area Flagstaff - Red Lake.

Purpose: Base for radiating devices, much of it comes from Andromeda, as there are very sophisticated ways of manipulating people and population. With these things they manipulate big cities as they radiate their stuff from their ships.

This base has a camouflage of being a Repair Base.

Over ground this base works as an observatory for weather changes.

They make tests with their lethal weapons here, as if this would be the real base where they keep them. A camouflage base for Homo Sapiens to know about.

It is shown to different world governments.

Exchanges are then made. To get their new technology, the ET's get money to build their bases, and get a quota of how many people can disappear without any government interference.

This is the way how many new lethal weapons have appeared on this planet! Also other "extraordinary things", only, they give us something to keep the government people happy, and take great care not to give anything that could be used against them!

Meanwhile we keep happily killing each other with this new "inventions".

To do this they need the OK from Boss in Andromeda Galaxy. Basically all major orders come from that place.

Test area for flights at certain distances.

As their plans are not allowed by any agreements, when they attack, they must act fast.

The ET's are not at ease here, and are afraid to stay trapped in their positions.

Homo Sapiens's main disadvantage is his lack of knowledge about the whole situation!

They do not need our big cities!

They need disasters happening around the planet to keep attention off their work.

Composed of: ET's 70 - Homo Sapiens as scientists 28 - Hybrids 20 -

Also their Justice Center.

This is a very strict Organization, but all robotized, which also is their weakness! If something gets out of order they get easily confused. A strictly military Organization. This base is their "nucleus". Any order coming from here has precedence on any other base's command.

If this place got destroyed there would be great confusion among all bases!

Composed of: ET's 120 - Ships 5 -

They do not want to draw attention on this area. It is a relatively small base.

NEBRASKA

Place: Livingstone area, direction Big Timber - South West from Big Timber.

Purpose: PLACE WHERE THE BOSS OF THE PLANET LIVES.

Base disguised as a Ship Repair Base.

His place is 89 meters under earth and protected against any bombing.

Many communication devices are installed in the ships for "repair". The most important communication is for outside this planet. They are the only ones to know about incoming Space Ships, as well as in which direction this planet should go.

Those analyzing from outside have a clearer view about the whole planet.

N0 orders go to bases from here except to their Center Base in Wisconsin, area Center City - Turtle Lake.

So, this is the heart of the Grey's Organization on this planet, and its main artery is in Wisconsin.

What we should do is KNOW about this organizational system. With this knowledge MUCH of their power would vanish.

Composed of: ET's 75 - Hybrids as servants 28 -

There are misleading tunnels around this Base, as it is the most secret part of their Organization.

Entrance from another direction than the Repair Base.

URUGUAY

DESCRIPTION AND LOCATION OF 1 ALIEN's BASE

Information received 17/7/97

Place: Border with Brazil - Not far from Rivera - Santana do Livramento - Area Minas de Corrales.

Purpose: Agricultural Base.

To find out how these territories can be used by them.

Want to have own farmers and vast areas for themselves.

Wish to have their own people, trained by them.

These kind of Bases are in different parts of the planet and they work together in organized way.

Test are made for diseases that can come through food. To manipulate population with the food they eat. Also can be used the other way, to make bodies stronger.

NOT ALL IS MENTAL CONTROL! But the purpose is to make this place their civilization.

Abducted people work for them and food is also being tested on the prisoners. All their experiments are done with living things.

People from this Base are trained and implanted so that they can go back into their areas and perform whatever is needed. these people look totally "normal".

So, if someone has been missing for even a short time, one has to be prepared for the possibility that he could be monitored. This could be the reason why abductions are happening in a rather "peaceful" way. All is happening between "compatriots"!

It will be happening as well in Brazil as in Argentina and Uruguay. All this is a great agricultural area. Kept unused for their use!

Experiments are made out in the fields to see how things develop in these soils. For these, PEOPLE are needed. They are given a technical education. It also looks so peaceful, but it is made with the purpose of maintaining control over us all.

Composed of: ET's 45 - Hybrids, experts for this job 100 - Homo Sapiens as scientists 10 - Abducted people of different ages, mostly young. They come and go, but there is space for 180 of them.

6 ships, rather big ones.

Sophisticated atomic equipment for working with seeds.

800 different animals which are mainly used for testing the food.

Cages, even for people, as prisoners are tightly controlled, mostly by the hybrids.

They live in a state of unconsciousness through special drugs originated from Andromeda.
