

## Introduction

This web site comes about as the result of an Evaluation entitled -  
End of the Era of False Scientology, Commencing the Era of True Scientology

The full Evaluation is presented at <http://www.scientologyintegrity.org/>.

The Evaluation found that government intelligence agencies considered Scientology OTs to be a Security Threat and therefore had a motive to prevent anyone going OT. The method of prevent to have their agents in control of the Church. These agents then intentionally misapply the subject sabotage case gain towards their end that no one attains the state of OT.

Thus, in the early 1980's a group of enemy agents took over the Church and they have intentionally misapplied the subject, to sabotage case gain, to prevent anyone going OT.

- - - - -

LRH predicted the takeover long before it actually occurred. There are several places here and there that this prior knowledge is made evident. One example is an article called A Story on page 285 of T Volume 1. In that article he likens the tech to a golden ball. He states:

Excerpts from LRH article A Story -

"He tried to form companies to make the golden ball available to many. But the people in the company said "It's mine!" "It's power!" "It's gold!" and "The man will kill us all!" and so they fought amongst themselves and threw dust over the golden ball and tried to dent it.

And at last the man sat down in a desert place and sent his word about that anybody could use it if they wanted it. And they sent officers and thieves and lawyers at him to say that nobody could use it.

And they took the man's captain (wife) and said they would imprison him for saying the golden ball was owned by everybody. And they made the government put guards around the man in case anybody tried to use the money to help ship the golden ball to everyone."

The above is exactly what happened. The point is this - if Ron knew the takeover was going to happen, did he not act to prevent it? Well, he did. He threw the takeover conspirators a wild curve that they were not expecting, as follows:

1. He allowed his copyrights to fall into the public domain.
2. He did not give them the Upper Bridge.

HCOB 24 January 1977 Tech Correction Roundup -

"For a number of years people have wondered when OT VIII would be released.

Well, to tell you the honest truth, OT VIII has been in existence all those several years, and to it have been added a very large number of OT grades. None of them have ever been issued. Notes for all of them are in existence.

If you get all tech straightened out and the orgs and flaps and emergencies off my lines... you will

those 3 months worth of time, so I will be able to afford the time to write up all these Advanced researched."

Well, Ron never does write these OT levels up for the Church - because after he dies - Pat Broek these research notes to put together an OT 8,9,10,11, etc. Broeker never completed this project. Miscavige ousted Broeker as part of a political purge. Ray Mithoff then tried using these research together an OT VIII that could be delivered, but all 3 versions he issued were a flop.

- - - - -

LRH awarded the rank of Captain to just two people. They were Mary Sue Hubbard and Bill Robertson. Robertson was the Captain of the Flag ship for several years.

In 1981, shortly after Ron had disappeared off of the comm lines, Captain Bill began conducting investigation aimed at proving the Church had been infiltrated and taken over by government agents. At that, the takeover management expelled him in 1982.

At that time Captain Bill went to Europe and organized a network of delivery centers called Rons Org. This he remained loyal to LRH and his intention was to deliver standard Scientology outside of the Church as a solution to the taken over Church.

Thus Rons Org posed a new threat that the subject of Scientology would be correctly applied to the Church. This lasted for a time, but the enemy solution to Rons Org was the same one they used on the Church - to infiltrate it with their agents, take it over, and then intentionally misapply the subject to sabotage it so that no one attains the state of OT.

Captain Bill was in telepathic communication with LRH to some degree. He released OT levels from OT 8 to OT 40. Excalibur is the name of the OT 8 he released. How much of this tech is from LRH is not clear. It is a certainty that not all of what is currently available to us as CBR's works, is from or by LRH.

Comparison of Rons Org materials to LRH references shows that not all statements and ideas present in Rons Org materials align with LRH references. One thing we do at this web site is we point out where statements and ideas align with LRH references and where they do not align.

One reason for this web site is to make available the Rons Org materials for your perusal. The reader should not consider that the Rons Org materials presented at this web site are complete, entirely accurate, or that it is our intention to continue to collect and verify as accurate, all of the works of Captain Bill Robertson and present them at this web site.

The fact of our presenting the works of Captain Bill at this web site does not mean we advocate that the Rons Org OT levels are the Upper Bridge. On the contrary, LRH did not give the Upper Bridge to the Church or Captain Bill or anyone else. The Upper Bridge is LRH personally C/Sing and auditing of Excalibur completion.

The primary reason for this web site is to release an On-Source Course for handling the composite case. Neither the Church nor Rons Org has ever issued a Course that aligns completely with LRH tech on the subject of entities and how to audit the composite case.

LRH made some non-confidential tape lectures in 1952 that are on the subject of entities and handling of entities. In other words, he completely revealed the basic nature, structure, and function of the composite case and also gave the tech for handling it in those lectures.

Now here is the amazing fact about those lectures and the vital data contained in them. From my own hand experience, from being on OT 7 in the Church for nine years, from being on Rons Org lines and from being on the lines of other's who claim to deliver standard Scientology outside of the Church, many of these have included these LRH tape lectures in their courses or training on the composite case.

What a strange, across-the-boards omission! Particularly in light of the fact that there are, at mi

major concepts expressed in these 1952 LRH tapes that are paramount in importance to handling the composite case:

1. That the main Being is holding the Beings in the composite case. He's trapping them.
2. That the composite case is organized into groups and sub-groups.

In fact, over time, the main Being and his junior entities have added to the composite case by adding and collecting up other entities in groups and then holding them trapped there. And, some of these entities bring along their own sub-orders, so that you end up with a very large number of Beings within the composite.

The above two datums are so valuable and vital to case completion, that their omission points to intentional sabotaging of case gain. In fact, omission of the above two datums is the WHY for the Church being on OT 7 for twenty-five years now and there still are not any valid completions.

Also pointing to intentional sabotaging of case gain outside of the Church is this fact - when we made LRH references on various newsgroups and internet discussion groups - in some cases the posts were removed. Also, when we began pointing out that this tech was in non-use, in one case we were banned from posting, and in another case a suggestion for banning was presented! That shows a conspiracy to prevent anyone from handling their composite case.

David Mayo is the undisputed author of NOTs. LRH did not author NOTs. We now have more evidence that LRH did not give the Church any further OT levels past the original OT 7. Because LRH knew about the composite case way before 1952, he knew about the composite case way back in 1938 when he wrote his book called Excalibur.

LRH knew that the main Being is holding onto the Beings in the composite case and he also knew that the Beings in the composite are organized into groups and sub-groups. This shows NOTs did not cover this because LRH would have included this data in the course and solo auditors in the Church would have been auditing the composite case. The only alternative is that LRH did include it and they intentionally omitted it.

In this course you will read where Ron says that you first get the main Being handled on his ability to hold onto Beings in the composite case, then you can work on making him a Theta Clear. By this key datum, they are allowing the main Being to continue to not-is his responsibility with regards to the composite, and that contributes to the motion of preventing anyone going OT - because the main Being's responsibility and OT go hand-in-hand.

So, sabotaging the Bridge was actually quite simple for the enemy agents who took over the Church. They simply had to allow the people on the OT levels to continue doing what they were already doing. It was their own responsibility with regards to holding onto the composite case. As part of making sure not-isness continued, materials covering this area of responsibility were omitted from their training.

- - - - -

The tech has come full circle since Ron wrote Excalibur. Ron resolved the problem of the composite case that he presented in Excalibur. Thus the solution is named - Excalibur.

The HASI is currently the only On-Source Auditor Association on Earth. We have worked at great length to make an On-Source course for handling the composite case.

The HASI staff hereby presents -

## **The On-Source EXCALIBUR Course**
