

4. Ecological Levels -

(1)

AAA - Universality -

AA - Awareness of Awareness of
Isolactic Awareness

A - Aware of Being Aware
and of being Racially Aware

B - Aware of Being Aware
and of Being Aware as a group

C - Aware of Being Aware
and of Being Aware of a
future -

D - Aware of Being Aware
but the only true!

E - Aware only -

Aware of Being Aware as
a group or pack of animals

Aggregate Sentience of life forms - as
a group of units!

②
An Ecology can function in
a system of only animal or
"E" sentence — as the group
awareness of awareness moves to
maintain an ecology even though
individual life forms are not
A. of being B. This ecology
is symbiotic and includes all
of the environment — at a
non-sentient level and is
quite stable!

To raise such an animal sentence
to "D" level (A. of being B. only)
is to foster and create an
only one situation and destroy
the ecology and symbiosis of the
system — This happened on
earth 14,000 years ago and the
E.S. of "homo Sap" started upward
into the only one bracket!

(2)
In the earth ecological section
"Homo-Sap" is composed of
Two basic types: degraded hominids
(from level III on down to I) and
upgraded G.E.'s now at step I!

The only real difficulty with
these G.E.'s is that they are
unusually TIED to Body limits of
E. level and life-death cycles of
animal existence. To be Aware
of being Aware one must be able
to be at or assume an objective
viewpoint from a body (an external
viewpoint also). They adhere to pre-
fixation on a group-species awareness
of being aware as a group of units &
unaware of being aware as themselves!

(9)

This means, that the extinguishing
of an E-creates SE havoc! Try
extinguishing an animal (properly
not a cat) and observe the knockups
this suddenly causes to being caused
ex-animal has - they run on the
pattern of only one psychologist!

If you extinguished a D, a C, or even
B take them as far up as possible!
It is a safe stopping or passing
point!

This ding-blasted planet has
not had an ecology for 18 thousand
years and it needs one now! What
is its need: An "esprit de corps"
including other life forms, the environment
and in short all E Communists!
