

PRO AREA CONTROL

12th November 1969

My congratulations on your splendid NAME "election" caper. It was brilliantly conceived and executed.

You have established

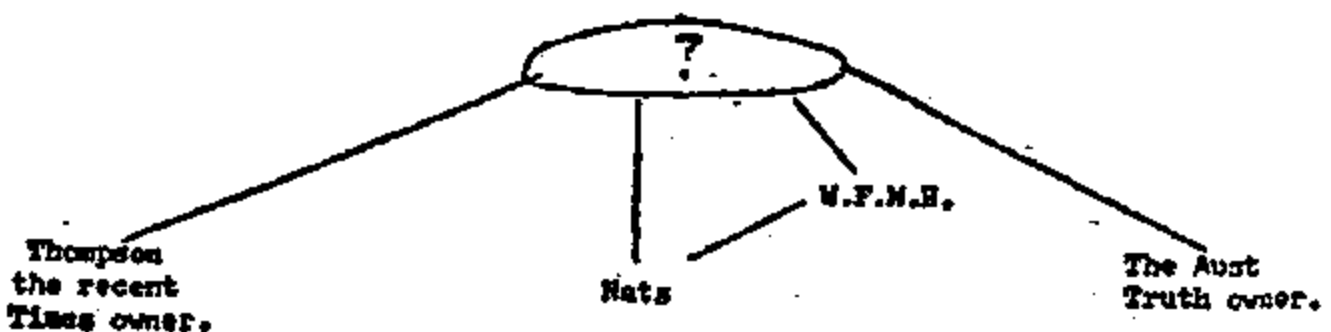

- a) the Nats are a private society, not national govt.
- b) that they are vulnerable to attack.

Their public image has suffered badly and you have focussed unwanted attention on them.

Their own membership is not loyal and is susceptible to being awayed, I am sure. The basic arrogance of these people is very evident and they are not likely to parley.

The whole question they should be asking is why they started the fight in the first place. The rule about parleying is that people who won't have, some other target in mind they dare not disclose. This was true of the Russian refusal to parley with Japs to surrender in '45, is true of N. Vietnam. Such a refusal to parley commits them to further conflict. I do not think, however, that the Nats arrogance and their hidden targets re British culture will permit them to parley ever. They show signs of having other masters but these can be identified.

I see an unknown now from our viewpoint.

The South African Nats have lost their govt. appropriation and credit. The U.K. Nats are very embarrassed. I see by the Herald Tribune somebody hit at the WFMH congress although they have internal conflicts that may have done it to them.

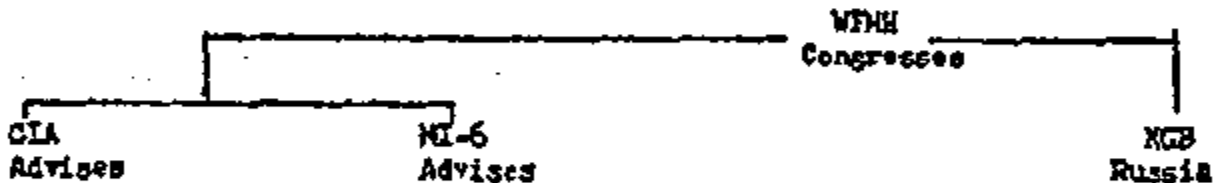

The "Jack Lundin" strike at us here (claimed to be from the "Manchester Guardian" whereas it's been only the "Guardian" for years) was coincidental with it's fuss going on in the UK - neither came first. We exerted PRO Area Control here and security Police and Border guards are searching for this

- 2 -

"reporter". We at the moment have the war locally under control despite attempted bad local press etc. All is cool, this area thinks we are great and have documents in their files which clearly show false vicious reports are circulated about us.

I finally solved how the head shrinkers are able to use intelligence tactics and people and lines. MSH found they (members of WFMH) serve on Advisory Boards to CIA, MI-6 etc. This gives them an inside action.

Also this means

and that the US and British govts. in supporting these congresses pay for meetings between CIA - MI-6 Advisors and KGB-CRU agents every year! I noted these odd Congresses years ago when 875 US psychiatrists went to Vienna which no longer has any Freud but sure is Russian!

Then evidence emerges that Russia no longer lets anyone out of Russia who isn't KGB-CRU as per the Penkovsky Papers. All trade delegates, scientists etc. who are let out, barring a circus or a ballet team attended by KGB, are KGB and CRU.

So no wonder CIA and MI-6 lose the war and that explains why we get in Greece US intelligence giving false reports on us to the Greek Govt., also Spain and lately here. We are and so roll these back up by showing the reports false as soon as we run them down. But I was getting bewildered.

Lundin was obviously MI-6, the Greek and possibly Australian showed CIA. So that's how its done, evidently. Agents of CIA, MI-6 etc, get phoney data shoved in by psychiatrists acting as advisors inside Western Intelligence who belong to the WFMH founded by reds whose Congresses are attended by the KGB!

So somewhere, Thompson and the Australian bike tie in with the WFMH and that ties in with possibly the World or some Bank that ties in with Communism. There are links to be found around there somewhere.

If the missing links can be identified we will have made more yardage.

This I now know - that Western Security forces are paralysed and muzzled -

---

- 3 -

MI-5, FBI etc, and the Canadians would never have given US a list if their bosses would have acted.

So as I see it we are in the wierd position of being the only free agents and we are inheriting, in simple self defence, the whole mess that Western security should have cleaned up ages ago when the cold war started, (1948). That it could have been handled at any time shows up in the fact that little tiny us are able to make headway in it.

Our policy is to find and show enemy reports on us to be FALSE by obtaining and filing documents that show the truth. This is double documentation. We then put this into the files and dossiers of responsible agencies. This invalidates their file and their sources. This is the "dead agent" policy. Intelligence and police HATE people who file false reports with them.

Our first use of this was highly successful with the agent now being hunted, the file proofed against further reports.

We have also developed "PRO Area Control" in which we make our position so strong by PRO actions that it is proofed against any attacks. In this way we "capture" terrain. PRO Area Control consists of outflow PRO actions and actively making contacts and making them so well and so valid that they are on our side and will actively disbelieve enemy actions and defend us.

I was greatly cheered and delighted with your Nats election battle. This is great. It is asserting the real beginnings of your own PRO Area Control. You are definitely now the guys in the good hats.
