THE SNOW WHITE PROGRAMME

For the past year there has been a massive programme in operation in the Guardian Office and on Flag. This programme was written by the Commodore who called it "Snow White".

He called it "Snow White" because it contains most of the elements of the famous fairy story. There is the evil Stepmother and Witch, poison "apples" and intrigue, the dashing Prince and buffons like the Seven Dwarfs. There is even "treasure" and "gems" and a great deal of digging involved.

The purpose of the programme is to trace back the attacks of the past 24 years to find and handle their SOURCE. Doing this will actually mean the running out of the 4th Dynamic Program spoken of by the Commodore in his 1967 Journal and in his "Welcome to the Sea Org" tapes.

To date the full programme contains a total of 38 major projects and innumerable sub-projects and sub-sub-projects. It involves most of the areas of the planet that have been touched by Scientology in one form or another.

In a recent evaluation of the programme's progress it was found that there could be a fuller understanding and more agreement about the programme. Many GO Staff and Flag Execs have not been made familiar with its purposes and importance. In actual fact the Snow White Programme has the HIGHEST PRIORITY OF ALL GO ACTIVITY. The reason for this is as follows:

In its day to day activities the Guardian Office handles hundreds of situations that might impede the forward progress of Scientology. It is a kind of outpost/correct type of activity. However, the Snow White Programme is going right to the source of most of the problems the GO is handling so its successful conclusion will measurably lighten the GO's load and make it possible for the GO to fully obtain its VFP of the "Acceptances of Scientology" that much more quickly and easily.

For Flag Execs, the Snow White Programme will eliminate one of the major barriers to world wide expansion and ease their job considerably.

From now on you will be kept up to date with weekly progress briefings on the Snow White Programme.

In addition, a special rubber stamp is being made up and copies given to the programmes personnel and execs involved with the programme. When you see this stamp on a project, target or order you will know it is part of Snow White and you can give it the highest possible priority. All communication bearing this stamp will be exactly routed and sped through the comm lines. In this way we can all speed up the completion of the programme and pave the way for a condition on the planet where the fastest possible expansion is really easy to bring about.

Let's all get together on Snow White and push it through hard, hard, hard! It will open the doors wide for the full CLEARING OF THE PLANET.
