NOT-IS STRAIGHT WIRE

Those persons on whom a process works once and those who have either dub-in or occlusion, process easily, if dramatically, on Not-Is Straight Wire. (See Axioms 11D, 18 and 22.)

Pcs divide into three general classes:

1. Those who have 3D pictures and good time sense.
2. Those who are occluded with black, colored or invisible fields and poor time sense.
3. Those who dub-in and have no time sense.

The scale of deterioration of a case is as above. First there are 3D copies of the real universe, then there is the action of not-ising these pictures (while they're still there) and finally, while not-ising, substituting false pictures.

This process is aimed at case types 2 and 3 above. (ARC Break Straight Wire also handles type 2 but not so well as type 3.)

Types 2 and 3 press into invisibility pictures by making them "unimportant". This is the clue word to unreality, stupidity, occlusion and dub-in. (See the Logics.)

The cycle which occurs is that the person gets overwhelmed with other people's declared importance. They counter by not-ising the importance of others. The reverse cycle of others reducing the pc's own importances is not run in Not-Is Straight Wire as it reduces havingness.

The commands of Not-Is Straight Wire are only these and no other:

"Recall a time you implied something was unimportant." Pc does. "When?" Pc says or auditor assists him by pegging it on an E-Meter.

This is run for about an hour. Then a second command only is run.

"Recall a time when somebody *else* thought something was important" Pc does.

"When?" Pc says or auditor assists him by locating on E-Meter.

Acknowledgement is used. TR 4 is reduced to a nod.

An hour of one is followed by an hour of the other.

There's dynamite in this process. It is good, clean and unlimited. But *don't* chicken on it and pull out and don't quit because the pc gets uncomfortable.

Here may be the QED for all occlusion and dub-in cases.
