**REVISED 7 JULY 1978**

**C/S Series 15R**

## **GETTING THE F/N TO EXAMINER**

(High, Low TAs and Chronic Somatics)

(Note: This Bulletin has been revised to include references to the New Era Dianetics Series tech.)

If after an F/N session end the pc's TA goes up, as at the Examiner's in an org. the pc is afflicted with unflat engram chains.

All high TAs depend on unflat or restimulated engram chains.

TAs go high on overrun because the overrun restimulates engram chains not yet run.

Engram (or secondary or lock) chains can be keyed-out. This does not mean they stay out. In a few minutes or hours or days or years they can key back in.

A pc will also de-stimulate in from 3 to 10 days usually. This means he "settles out." Thus a pc can be overrun into new engram chains (by life or an auditor), TA goes up, 3 to 10 days later the TA comes down.

When a pc is audited to F/N VGIs and then a few minutes later has a high TA the usual reasons are:

1. Has had his comm chopped or full Dianetic or Scientology end phenomena not reached or
2. Has been run on an unread item or subject or
3. Is overwhelmed or
4. Has a lot of engrams keying in or
5. Has been run in the past without full erasure of engrams or attaining end phenomena.
6. Lists badly done or other misauditing cause a pc to feel bad and key-in chains also.
7. A pc can be audited when too tired or too late at night.

The solution to any of these is easy—on (1) always see that the pc attains full EP, particularly on engram chains. On (2) make auditors check for read even in two-way comm subjects, list questions or Dianetic items before running them. On (3) see also (2) and get the pc a proper Progress (Repair) Program. On (4) repair or isolate pc so his PT isn't so ferocious looking (meaning Repair (Progress) Pgm him well or let him change his environment and then audit him) or (5) look into his folder to see who audited him on so many chains when, with no real erasure or EP. (6) You use repair lists (like L4BRA, L1C, etc.) and other usual action. On (7) you make the pc get some rest and if he can't, make him go for a walk away until he is tired and then walk back and get some sleep.

All these really add up to keyed-in or unflat engram chains. Whether the pc can handle them depends on repair and the usual.

Of all these the past auditing without attaining EP on engram chains (whether done in Dianetics or Scientology) is a usual reason for a much audited pc to have a high TA.

The answers to any high TA that won't come down and to any pc who continually arrives at Examiner after an F/N VGI session end with his TA UP are:

- A. Faulty auditing not letting pc go to full Dn EP when running engrams.
- B. A false Auditing Report (PR type report meaning promoting instead of auditing).
- C. Too many engram chains in past restim by life or auditing.
- D. False TA or inoperable meter.

It is usual to do a PICTURE AND MASSES REMEDY to find and handle restimulated engram chains which are causing the TA to be high. This is done after the pc has had a Drug Rundown as unhandled drugs can also cause a TA to be high (see HCOB 24 July 78 DIANETIC REMEDIES).

## CHRONIC SOMATIC

A pc who has a chronic somatic would get programmed like this:

1. Repair (Progress) Pgm as necessary until pc feeling better.
2. Original Assessment Sheet, with its full handling per New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE and New Era Dianetics Series 8, DIANETICS, BEGINNING A PC ON.
3. Continue with the New Era Dianetics Full Pc Program, taking each step to full completion.

IF the Dianetic auditing is standard and to Dianetic EP (erasure, F/N, cognition, postulate if not included in the cognition, VGIs) you will see this pattern at the Examiner . . .

First few sessions TA 4.0 or more at Exam. Doubtful GIs.

Next few TA 3.75 and blowing down to 3.25 at Exam. GIs.

Next few TA 3.75 BD to F/N at Exam. GIs to VGIs.

Next two or three TA 3.5 BD to F/N at Exams. VGIs.

Finally TA 2.5 F/N VGIs at the Examiner.

That's what you would expect to see if the auditing was standard, if the case was straightened out of past flubs in the repair step. Errors such as running unreadings items or firefights caused by out TRs or false auditing reports or Dn EP not reached at session end or pc needing ruds put in at session starts would prevent this pattern from happening at the Examiner's. So if the pattern doesn't happen you know the auditing is goofy or something is out which had better be found. One pc for instance had a huge W/H of having a disease and was audited over it for 2 years = auditing over a W/H and PTP = no case gain. Silly pc. But also a very dull C/S not to alert to some outness there and find it. Another pc had a high TA and the fault was just that she never got any auditing at all! So they kept operating on her! Somebody didn't know Dianetics and auditing was for USE.

## **HIGH TA AND ILLNESS**

Pcs with high TAs feel ill and get ill.

No use to elaborate on that. It's just a fact and is THE fact about pcs who get ill. So maybe you see why this HCOB is important!

## **LOW TA AT EXAM**

Pcs with low TAs are more or less in apathy.

If it F/N VGIs at session end and is low at Exam (like 1.9) (OR if it went low in session and didn't F/N), then the pc is:

- (a) overwhelmed and needs auditing and Life Repair
- (b) can have been run on a flat or unreadings item that invalidated his former win.

Example: Pc listed on an unreadings list few sessions later worrying about it and coming to Exam with low TA. Repair is the answer. Low TA pcs need a Life Repair also.

The NEW ERA DIANETICS SERIES tech, fully and correctly applied, will handle all aspects of the chronic somatic. See HCOB 22 June 78, New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE.
