Remimeo

**LSD**  
**YEARS AFTER THEY HAVE**  
**“COME OFF OF” LSD**

Characteristics of persons who have been on it from examination of 2 cases:

- 1) They are disassociated—meaning they are separate from anything they are doing.
- 2) Whatever occurs has nothing to do with him.
- 3) Not responsible for their own action or anything else and it doesn't occur to them that they ever should be.
- 4) Their emotions are shut off to a greater or lesser extent.
- 5) Consequences mean little or nothing to them.
- 6) They are stupid.
- 7) Normal actions that another can do easily get mucked up by them.
- 8) They are unpleasant to associate with.
- 9) They are de-humanized and can be vicious or irrationally cruel.

Apparently they have become a sort of a vegetable or a zombie to a greater or lesser degree.

The LSD apparently stays in the system and is liable to go into action again giving them unpredictable “trips.” Which could be quite fatal while driving and even walking around.

A Drug Rundown which has to include LSD cannot be considered complete until the person has undergone a long period of sweating and heavy liquids and exercise.

The way LSD got popular was because of Henry Luce, the head of Time Magazine, who publicized it and glorified it from mid-1950 on. He and his wife were under psychiatric care and were on LSD.

Nearly as I can trace it, it was the Nazi intelligence drug developed in Switzerland and was probably intended for use in municipal water systems to paralyze the population just prior to an invasion as the invading enemy would then find them all irrational.

It only takes a millionth of an ounce to produce a “full trip.”

When you are dealing with an LSD case or anyone who has ever taken LSD you cannot and must not consider their Drug Rundown complete until they have been sweated and given liquids and exercised for months as well as heavily audited. They *can* recover with auditing and this handling, but it won't be very fast.
