Deposits of drugs and biochemical substances in the body can prevent or *inhibit case gain. They can also impede learning. The Purification Rundown is* now a very early step on the Grade Chart so that a person can get the most possible gains from his later auditing.

Where a person has had case actions, repair, cramming or hatting before *doing the Purification Rundown, he may not have benefited from these actions to the extent he could have, due to the effects of unhandled drugs. A person who has had extensive repair, little gain on auditing actions or trouble in cramming or hatting before doing the Purification Rundown may need a sort-out on those previous actions once the Purification Rundown is complete so that any errors can be handled. (The majority of such preclears would be drug cases who received auditing or cramming actions before the release of the Purification Rundown in*

early 1980.)

In such a case it may be necessary to:

1. CORRECT ANY FAILED AUDITING REPAIR HE WAS GIVEN BEFORE THE PURIFICATION RUNDOWN.
2. REPAIR AND COMPLETE ANY FAILED AUDITING PROCESS HE WAS GIVEN BEFORE THE PURIFICATION RUNDOWN.
3. REPAIR ANY FAILED CRAMMING, CORRECTION OR ESTO ACTIONS HE WAS GIVEN BEFORE OR DURING THE PURIFICATION RUNDOWN.

These steps are not necessarily done in the sequence laid out above, and

*they are not actions that would be done on every pc. Not every pc will need*

them. However, they are steps that should be considered by the C/S in programming a pc who has had auditing or cramming prior to doing the Purification Rundown.

Any needed repair should be programed standardly per the C/S Series HCOBs, in particular the following:
