Issue II

**OVERRUN ON III**

The only way you can get a read on “overrun on III” is to have accidentally run Inc I out and then later “run it out again” on the same thetan or make a similar blunder.

Example: One flattens Inc I by several passes on a body thetan. This body thetan for some reason, mostly because Inc II was then not run, does not fly off. Then, not noticing, one again finds the same thetan and once more seeks to run Incident I. One then gets, in answer to the question “overrun on III?” a lot of reads and other overrun phenomena.

The remedy is to find out who was overrun and get the charge off by that action.

One then runs Incident II on that thetan or in any event by getting off the charge of “overrun”, letting the thetan depart.

Just because one’s meter reads “overrun on III” is no reason to attest. Find out WHO was. It’s almost always a body thetan.
