REVISED 16 AUGUST 1983

(Revised to align with the LRH Handwritten
INSTRUCTIONS REVISED
12 August 1969 and
HCOB 14 August 1983 C.C. Implant!)

CONFIDENTIAL

OT III

(Ref: LRH HANDWRITTEN INSTRUCTIONS REVISED 12 Aug 69
LRH HANDWRITTEN 2nd NOTE – INCIDENT II, 28 Oct 68
HCOB 25 Oct 69RA CLUSTER FORMATION CUMULATIVE
HCOB 14 Aug 83 C.C. IMPLANT)

As a matter of data, the only trouble really in a OT III run is running an Inc II on *one* thetan and an incident I on another, thinking it was the first one. A preOT *can* free wheel into R6 if you run only an Inc II. You can stop the free wheel at once by running Inc I off the same thetan you ran the Inc II on that started a free wheel.

Free wheel means that the pc goes on automatic continuous run. Inc II is R6 75 million years ago. Inc I is about 4 quadrillion years ago. Both, all thetans on this planet and 21 nearby stars have in common. All thetans in the Universe have Inc I. Only those in this Old Confederation have Inc II (R6).

All CC and OT II materials are in R6, 75 million years ago. These are followed by 36 days worth of motion pictures – god, devil, space opera, trains, cars, helicopters, crashes, stage etc. This R6 *is* 75 million years ago and this planet and confederation.

If the volcano bit is run as per OT III directions but the Inc I is not run on same thetan, R6 begins to run off on automatic, the being can't sleep for days, the body dies. That's the way it was designed.
