

RUNNING INCIDENT 2

Anything a pre OT gets into on Inc 2 is destimulated by (a) Running „Capture to Pilot“ or „Explosion to Pilot“ (b) then running the Inc 1s of the beings who had Inc 2 in restimulation.

Also, a Class VIII in Review can find and run the **overt sequence** of engrams that makes the motivat (Inc 2 & Inc 1 are motivators) key-in so hard.

Either of these actions ((a) & (b) or finding the overt sequence of implant someone) will stop any serious „spin“ a preOT gets into in doing Incidents 1 and 2 in OT III.
