HCO BULLETIN OF 14 SEPTEMBER 1971

OT III Packs

Class VIII's

Adv. Case C/S

**S E C R E T**

SOLO C/S SERIES No. 7

As per HCOB 26 August 1969 "OTIII Case Supervision", ruds go out on BTS. In this respect the following scale based on HCOB 23 August 1971 C/S Series No. 1 "Auditors Rights" is of use to the Solo Auditor:

When the ruds go out on BTs during the session the Solo auditor recognizes the following:

BT critical = W/H from auditor.

BT antagonistic = BPC in session.

No TA = Problem.

BT sad = ARC Break

Soaring TA = Overrun or protest; (also more than one

BT being run in error or it's a Cluster.)

Auditor tired = No sleep or incomplete Inc 1's.

Auditor dope off = By-passed FN or not enough sleep

Auditor no interest = Out ruds on BTs.

A solo auditor who isn't sure what it is but runs into trouble with a BT is smart to end off the session quickly, write down the full observation and get it to the C/S.

The Solo auditor who knows what he is looking at as per the above scale (and the C/S the C/S would give), handles it promptly,

BT critical = pull the W/H.

BT antagonistic = BPC = assess proper list (such as L1C) and handle.

No TA = (or case gain) = Problem = locate the problem and handle.

BT sad = ARC Break = locate and handle, itsa earlier itsa.

Soaring TA = O/R or Protest (Also more than one BT being run in error or it's a Cluster) = find which and handle. (Running more than the one intended comes from too WIDE an intention.)

Auditor tired = no sleep or incomplete Inc 1's = check which it is and handle .

Auditor dope off = lack of sleep or BP FN = check on sleep or rehab FN.

Auditor no interest = out ruds on BTs = put in ruds.
