NED for OTs Series 36

CONFIDENTIAL

ROCKSLAMS

An R/S means there's an Ev Purp per HCOB 10 Aug 76 ROCKSLAMS, WHAT THEY MEAN. On a Clear or above, any R/S comes from an R/Sing BT or cluster, who has and is dramatizing an Ev Purp. The handling is to locate the BT or cluster and blow it off. An R/S will probably go right down to the basic of a cumulative cluster. You would locate the offending cluster and Date/Locate down to the basic and blow the clusters and BTs off. Clusters can be pretty vicious and you get an R/Ser at the bottom of the cluster. I've even encountered a cluster that made a profession out of killing patients in hospitals – the doctors would wonder why a patient was fine and then all of a sudden take a turn for the worse and die.

Full „NED for OTs” is essential for the terminated handling of R/Ses on a Clear or above.

Very few BTs and clusters are vicious or vengeful, most are benign, but an R/S will go down to the basic incident of a cluster dramatizing or being an Ev Purp. These will usually be wildly out of valence and have horrendous overts and crimes down the track.

To handle R/Ses, you take the statement originally reported to be R/Sing and find the position in the body of the BT or cluster connected with that R/S statement. You'll turn it back on again if you locate the position where that thing was – the R/S will come on. It's a combination of position (in the body) and the statement. Having found the BT or cluster or cumulative cluster who R/Sed, you handle it right on down to fully blown. And handle any copies. Do this for each R/S statement.

A major case change will occur on blowing off R/Sing BTs and clusters who have been ruining the Pre-OT's life and the lives of those around him.
