REMNANT RIDGES

A BT can blow and leave behind a ridge of energy. There are BTs in the energy ridge left behind by another BT.

There's a basic mechanism, some BTs make ridges and masses and other BTs come and cling to that and get stuck and they think they're part of it and they maintain it – after the original BT has blown. You have to look through the ridge and find who's in it – after you've blown the BT who made the ridge. You not only look for the BTs that made the ridge, but also the BTs stuck in it, and keeping it there, and the ridge doesn't fully blow until both mechanisms are handled.

A BT could mock up a pole trap and another BT come along and stick to it. You blow the 1st BT and still have the pole trap, which is being kept there by the BT who stuck in it. So you ask, "What are you?", Ack, "Who are you?" and blow BT who was stuck to it. The whole body is a trap because it's BTs getting stuck to BTs.

You blow the thetan mocking it up first and it tends to evaporate, but you then have to handle the others.

They will actually create anything in sight – low havingness – obsessive havingness or holding on to the familiar.
