NED for OTs Series 35

CONFIDENTIAL

NOTES ON PTS

There are BTs who were PTS to successive persons; they went from one person to another, e.g. BT went from Pre-OT's grandfather, to Pre-PT's mother, to Pre-OT. So the Pre-OT now has BTs who were PTS to mother and grandfather. And the Pre-OT was in contact with these BTs when they were on mother, and earlier in the Pre-OT's life when the BTs were on grandfather. This transfer of BTs to successive family members causes a genetic misidentification – it convinces BTs that they are genetic.

There are also BTs who went PTS to a person that they were PTS to in an earlier life or lives. They run into the same person in this lifetime and go into restim.

When a person gets sick there is usually a PTS terminal to be found at the bottom of it. But the PTSness may be that of a BT or cluster which then hits the pc.

Now if you went on listing this BT or cluster you would find one for sure. But it is not the PTS terminal for all of the BTs in the cluster so when you finish you will have indicated the wrong PTS terminal and will have hung the remainder of the cluster with a wrong item which they will then dramatize. So don't list a BT or cluster by L & N. What you do is ask them who or what they are PTS to at which time you will probably get a blow of some of them. Then you indicate to those that didn't blow that it is a wrong item for the rest of them. You will either get the cluster blown with these two steps or the rest of them will blow by other NED for OTs processes.

When running NED for OTs you will sometimes encounter the phenomenon of Pre-OT's attention fixed on or drawn to a remote point, and the Pre-OT can blow off the BT or cluster in that remote location that is drawing his attention. If the remote point is a person the Pre-OT is PTS to, you could expect an amazing change of the remote person where he or she now tries to restore communication with the Pre-OT or ends the conflict or problem. This is the phenomenon of the SP now making things right with the PTS person being handled, and is the same EP as is encountered on the New Vitality Rundown and on PTS-Problems handling when it is done fully to EP. It's not that you are trying to handle PTSness with NED for OTs, but in such an instance as described above you can expect the same EP to occur.
