**CONFIDENTIAL**

**WRONG ITEMS**

(Reference HCOB 19 Nov 79)

The reason why a wrong item (L & N error) produces such a violent reaction is because it can key-in practically every BT in the body.

They're all sitting on a wrong item already – what they are being – and if you find a wrong item on an L & N list, it can give them all another wrong item on top of the wrong item each is being.

The L & N error is a wrong item for a very large number of BTs, hence the very heavy and violent reaction.
