

OT 14

## C/O Cycle RD

(After Prior Assessment and Clone Cycle RD)

29 May 86

As a necessary step after the Clone Cycle RD, and before OT14. This RD will get the Pre-Static or OT in full command of his body.

CO is "Commanding Officer". (Reference: R1 Tape on S.N. Case)

### Theory

After the Prior Assessment and Clone Cycle RD, the OT still has a body. He will be using it to carry out Game of Games doingsnesses and further auditing. It is now composed of U2 particles plus any perceptic MOCOs he may have put in it. The U2 particles are other's (U2) dumped (responsive and un-responsive) creations and MOCOs. This RD puts him in command of all who wish to remain and carry out the game purposes with him, and frees the rest or allows them to retire to Static Point and wait - as a sort of "reserves".

### Procedure

1. TR0 (All GUMs).
2. Run off any (plus or minus) Perceptic MOCOs from the Body belonging to the OT. (That's the person who is doing the auditing).
  - A. Spot them.
  - B. MOC or Free or Wait at Static-Point or take a "hat" in the game.
  - C. Ack them.
3. Run PrPr 4,5,6 on the remaining U2 MOCOs.  
(This includes responsive and unresponsive ones as PrPrs handle both types.)
4. They will awake, go thru the recognitions of being created, dumped, aligned with "loser laws" or under BofD ( $\phi$ -thetans) orders and finally under the OT's command. (Impressions of their not-ised lines to billions of "creator thns" will show up and as-is, then the BofD social

democracy lines will show up and blow, then finally into PT with an awareness of the OT who is auditing them as the "boss" or CO.)

5. Give them the R-factor on the Game Purpose, GUMs, and rights of a thetan.
6. Give them the choice to "Help in the Purpose under Command of the OT" or "Return to your MOC and go free" or "Return to Static point and wait for the end of the GUM".
7. The ones who decide to "help under command of the OT" (after the rest have gone), can now be ordered by the OT to do whatever he considers optimum. He applies the "Normal Operation" formula, eliminating non optimum conditions and enhancing optimum conditions of the body.
8. The  $\phi$ -Thetans he does not need at present should be ordered to Static Point as "reserves" to be on call if he needs them later to patch up his body or another's.
9. The OT should be able now to change his body on a gradient via these helping  $\phi$ -thetans to an optimum state for his game and purpose.
10. It is best to do this on a meter to see that all the  $\phi$ -thetans get the commands. When they do, there will be a Clean F/N. It's group auditing.

EP

The OT takes over command of his own body from the U2  $\theta$ ns who dumped its components and from its component  $\phi$ -thetans who were responsively or unresponsively following BofD  $\phi$ -thetans' orders. The "optimizing" steps can be done in later sessions (solo) as needed.

### The Tech-Qual Part

Does: { OT 12 Pre-sessions  
PrPrs  
Blow Steps  
Can't Blow Steps on the newcomers.

Note

It is wise to set up an "org board" of these  $\phi\theta$  n helpers (7 div) so that new food, air, etc. coming in to the body is also recruited, R-factored, and audited to their own choice as in (#6), thus keeping the body in an optimum state.
