SOL

"Whats in a Name?"

After getting the Space MOCOs audited, they are now ready to help with the U2 Energy and Matter MOCOs to bring them more into cooperation with the Static Gravity Vector and away from the Φ Gravity Vector.

As per the last issue, the Space MOCOs were mostly neglected or ignored. But the Energy and Matter MOCOs have a different problem. They have been given TOO

much SIGNIFICANCE by being named, analyzed, called various things by various Ous throughout the games according to what forms they had been in! Thus they have had a near infinity of "wrong items" given to them.

The space moeos of the area around and in the body can now run on the energy & matter moeos, the process:

- 1) What are you ~~now~~ now?
 - 2) What were you before that?
- over and over until the MOEOs

finally cognite what they
were originally created for -
i.e. "an Energy MOCO to help
in a Source ^{or Static's} creation"
or "a Matter MOCO to help
in a Source ^{or Static's} creation"

This process takes a long
time and is given to the
Space MOCOs to run on the
Energy & Matter MOCOs while
the Body is asleep over the
next few days.
