Space is the Key

There are many more Space MOCOs than Matter or Energy MOCOs and they are the most ignored or neglected by On's Players or OTs. They constitute the Playing Field at any level of Operation. So, the first gradient toward Body "Lifting" is to Audit the Space MOCOs of U3 (U2 after OT 16).

The processes to run are:
(on the Space MOCOs in and around the body).

① VI on "being attracted toward (or "hooked to") ϕ Ons.

This handles the compulsion to follow the 1st Vector of the 4 Gravity Flows.)

A.) "What is the value of being attracted towards ϕ Ons.?"

B.) "What is the importance of being attracted towards ϕ Ons.?"

This will end up with no more answers and a feeling that the Space MOCs can choose or not on being attracted to ϕ Ons. And FFA on meter, after cogs on the questions run AB, AB, AB, etc.

② VI on "being attracted toward Static or Source Ons.

This runs out the neglect and ignorance of the Space MOOs by Static & Source Ons.

A. "What is the value of being attracted towards Static Ons or Sources?"

B. "What is the importance of being attracted towards Static Ons or Sources?"

This will end up with the Space MOOs much more in co-operation, co-ordination, and compromise with the Source/Static auditor. And PTA, Cogs on questions run A B, A B, A B, etc.
