OMNI

" 3 Ways toward
V3 Body Lifting "

1. Use of energy (create ^{energy} MOCOs) and use tractor beams to pick it up against the gravity agreement of the ϕ Orbs. This is not really OMNI - it's an "in the Game" use of MOCOs.
2. Permanent "light body" - Audit all λ & ϕ MOCOs in the body to be "OT" and always be out of GCMO agreements. Of course as one eats, one must audit further the new arrivals, or be a "fasting holy man".

3. Audit the "body org" and get them to be a team under C/O's direction with ability to place their own CVP's in the U3 (Cum O) Game or exteriorize from it as decided by the C/O. As they take part in the game (eating, drinking, etc) they audit any new recruits and give the Rights of a On to all.

(There is another way also, but its just a newly created body by the Player using only his own MOCO's so he has full control of it - a mocked-up body!)
