Energy MOCO,

Purpose: "To show the way
through and out of
the game."

Note: On ~~the~~ encounters with D's, kept
repeating D1 for many commands and
no "handlings" or movement on process.
Found hoop logic Datum & Policy setup
by Xenu to keep Energy MOCOs from
finding their Creators and make them
believe he (X) was their "God" as the
606s winner. He then gave the order
to the Energy MOCOs using their "purpose"
(real one) above to contact their (creators)
"big Ons most connected to" and convince
the Player to "find or seek for his
creator". This is part of the insanity
of the new age movement and occult
mystery cults, who, being convinced
to deal with "forces" and thus energy
would get this idea or vector re-inforced!
After running out the blanketing "hoops"
the Energy MOCOs on their process got

to answer "8thD" on the next command and found the false datum put in by Kem on them and got moving on the process again. They also, by the above, had lost or were confused on Rtofa On #1 - "sanity," as they kept pushing the illogic that they were all "created by God." A very clever trick to scramble their basic postulates & purposes!

BF
1 Nov 89.

On doing B/CB, I found the period of the Energy MOCO Purpose Reversion covered above. It was between TTA & LTA from 200 to 400 Centillion years ago. Started 400 Centillion, exactly between LTA and TTA, and carried on spreading and reinforcing until 200 Centillion ago. This was when the Players were around the other side of the Ring. λ & MEST Ons (MOCOS) were all present of course, having been left in CVM On (Contributed to the KRE & O breaks of λ & E mocos) J
