

Succin AFTER REVIEW

(Well really, here's one you don't publish!) Come & Glad I wrote all that STUFF to you all these years? You betcha! I do not regret one word, Having the correct terminal, KNOWING he is correct - And just when I need it most - WHAM! A program for ME. And Auditor for me + a CS with me. And knowing all the way thru the maze that I would come out the other side. Being outside the maze is one thing, & not to be invalidated, but the perspective from INSIDE is the "test", as it were. I mean, what the hell fun is it (when engaged in any terribly serious activity) not to have a turn at hat? (Here I go mixing metaphors again, but you should be used to that by now!) So - thanks Bro for being there with just the right actions in just the right order - & for ALSO knowing that I'd make it.

And Thank you Dero for hanging in there with me - when I wanted to bail out, or slow down, or run too fast. I figure Anyone who can handle THIS case has got to be wonderwomen. It will be an honor to join your ranks (ie SCCS + et al.)

So, nothing brilliant here - or poetic (I was tempted, but lucky for you guys my imbric antamiter is a bit rusty today)

Love you

Dyer
