ARE THERE "TIME" MOCOS?

Having cautioned E/Es and having caught myself also doing an "assumption" on Analyzing a case, I checked over the VAST+ area to find if I had made any there: I had. And it was a big one! I had "assumed" that since "time was an arbitrary" and "an agreement on the regulation of cycles of action," that there were no mocos being time as they were in space, energy, and matter. I checked this out and found TIME MOCOS! However, I also found by running V/I on them that it was a WRONG ITEM for them. They had not been originally created to be TIME MOCOS. They

had originally been part of a ϕ (creation) or freed from a persons case in LTA auditing. Also some had become "TIME" in LTA pre-I experiments. So Xenu and the IMPLANTERS, and LTA TAKEN-OVER CHURCH, and Pre I LTA & TTA had produced these "TIME MOCOS" and they were all OTHER-DETERMINED.

Processing

I then realized they had the same "case" as a POSTULATE On (made to be something he was not normally inclined to be) but as MOCOS. Thus I tried the same processing sequence to see if they would free up and blow off. They did. Here is the rundown:

- 1.) Check in your space as an OT for "modes being TIME"?
- 2.) Get in comm with them.
- 3.) Find out their "purpose" (if not just "to be time.")
- 4.) Run V/I SW on it.

"What is the value of $\left(\frac{\text{PURPOSE of}}{\text{"BEING TIME"}} \right)$?"

"What is the importance of $\left(\frac{\text{"}}{\text{"}} \right)$?"

- 5.) If "grinds" or same answers come over and over, or goes down tone indicate "THAT IS A WRONG ITEM for you!" (T40). (Note: Even if it (V/I) goes to F/W, continue on with processes below, but don't indicate wrong item, as that will be a "cog" as they do the next processes.)
- 6.) Pr Pr 1 on "BEING TIME"

① "What overt have you committed being time?"

② "What problem were you trying to solve?"

③ "What have you withheld being time?"

④ "What problem were you trying to solve?"

7.) Do any B/CB as needed, then on to V/I RW on "being time".

① "What is the value of reaching for being time?"

② "What is the ~~value~~ of withdrawing from being time?"

③ "What is the importance of reaching for being time?"

④ "What is the importance of withdrawing from being time?"

⑧. Any B/CB as needed, then for those who were made by "auditing":

① "What conditions have you encountered in auditing toward "being time"?"

- ② Tell me how you handled it."
 - ③ Then final B/C B, done fully.
-

"In doing these processes on TIME mode," any time they are encountered, you will find out yet another trick of the implanters - to take an area of pure "game agreement" and "make it solid."

Have fun -
