

Persisting LTA Pictures?
- Look for LTA drugs!

A widely-used drug in LTA was called "1/2" (one-half) or "3C" (three-c). It was composed of a very precise mixture of cannabis, cocaine, and (*curare - manufactured into chewing gum of several flavors. It was legal in most countries or easily obtainable by prescription or ~~attested~~ via drug dealers nearly everywhere. The "medical" use was as a "tranquilizer to reduce stress while allowing full efficiency and stamina (persistence) while at work."

Technically, it gave an enforced pt-ness without responsibility for action but a clear perception of events going on - the perfect "why worry - be happy" combination.

Since it was used in "life and livingness" - it may not come up on "Audited while asleep, drugged, etc..." in a CEL RCB.

*(note: Far-eastern varieties of the drug used cobra-venom instead of curare.)

Also the mocos who dramatize it may have also gotten an intention of "happiness" or "pleasure moments" from the CIO at the time so the pictures recorded by the mocos don't run out as they are (1) Unfound or unknown (in TTA) "drug-trip" (2) Recorded as pleasure moments (fun, wins) at the time (in LTA). (3) Done in life as a usual thing, but not in auditing in LTA, where other drugs were used by the Xenu-controlled CoS.

Handling

Persisting LTA type pictures or events, but pleasantly viewed as through a haze of happy-idle-interest. Not much value or importance except for data about LTA. Often viewed while body asleep, sort of like a cone-trip seen thru a glass wall.

Can be added to CCL BKB after ADHU handling or done separately with a BKB.

Q. "Onis or mocos who used 'one-half' or '3C' chewing gum tranquilizer or drugs in LTA life & livingness?" — (If reads, go on to next step. Use SIN if needed,

Process 1:
(group) "What condition have you encountered while using $\frac{1}{2}$ or 3C in LTA?"
"How did you handle it?"
(to EP)

Process 2:
(group) "What is the value of holding the LTA pictures (or events)?"
"What is the importance of holding the LTA pictures (or events)?"
(to EP)

BICB: Start with CB Step B: LTA Incidents then C: Purpose, Game, Orientation. Then Blow Steps, Cant Blow, Blow to end off.

(Can be done whenever encountered. A normal DRD (Sen) procedure can also be used - Class 8 style with Rehab by counting and recalls - but may be longer as this drug was used by many LTA players all their waking hours for years!)
