

25 Jan 26 Jan 1200-1230 PM Sat/Nite.
— Latest Implanter Scenario.

1. Nerve gas powder, spray & toward window, small amount,
2. Microwave activation R or L
3. Right is used so body won't die
4. Vagus nerve affected 1st as that is where dust collects to be eliminated,
5. Microwave transmitter is an adaption of old Implanter (Andromeda) Tech of FAC1 Machine,
6. CIA is using it (link to Cops also)
7. On OTs on VAST+
8. Dr Prinz 1st subject when in USA
9. About 2 wk intervals, on attacks
10. Have to be close, in ear near house window or portable on foot.
11. Verified on Meter F/N FTA Sens 3
2.8. (from 3.8 to 1st at start)
12. Is affecting the 2 ϕ interface nerves, not body org, which tries to control it,

13. Starts - a vibration in right side groin where nerves - gradually increasing to throat in ~~leg~~ right side abdomen and chest. Paralytic, vibration, throbbing effect, on-off, on-off about 2 cycles per second. Duration 10-15 m.
14. Suddenly turns off when microwave transmitter shut off.
15. Residual slight numbness in leg and right side.
16. Assist - balance flows again R to L up and down like a TP touch assist.
17. Keep body warm, hot bath.
18. Do B/CB, esp in 2/f interface.
19. Ind. it's a wrong item for Body Org.
20. Predict next attack and handle.

DR

Note: Spotted car driving off - (silver small car) from under bedroom window like a Fiat or Peugeot. Exactly after transmitter turned off. (Noticed it first 2 wks ago but didn't check on meter. Shot it was from radioactive disposal going on in body on VAST+.)
